This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through <http://www.regulations.gov> or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide discussed in this document, compared to the general population.

II. What action is the agency taking?

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the Administrator determines that emergency conditions exist which require the exemption. The Washington Department of Agriculture, Idaho State Department of Agriculture, and the Oregon Department of Agriculture have requested the Administrator to issue a specific exemption regional request for use of hop beta acids in honey bee hives to control varroa mites. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the applicants assert that the varroa mite is a highly destructive pest and is having a catastrophic effect on honey bee populations. The parasitic mite is considered the primary pest of honeybees and its control is necessary for successful beekeeping in the PNW. According to the applicants, the currently available registered products no longer successfully control varroa mites, because repeated use has contributed to widespread development of mite resistance. Further, some of the

alternative products have been reported to cause bee mortality, have labeling limitations which make them impractical for large beekeeping operations, or provide inconsistent mite control. Varroa mite outbreaks are also associated with colony viruses, which result in large colony losses.

The Applicants propose to make no more than three treatments per year of two cardboard strips, coated with liquid product per brood super, during the spring, summer and fall. Approximately 181,000 honey bee colonies could be treated in all counties throughout Washington, Idaho, and Oregon, requiring 2,172,000 strips for three treatments. The total amount of hop beta acids applied would be 4,170 kilograms (2,172,000 × 1.92 grams of hop beta acids per strip), which is equivalent to 9,194 pounds, if all honey bee colonies in the PNW were treated.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA require publication of a notice of receipt of an application for this specific exemption regional request which proposes use of a new chemical (*i.e.*, an active ingredient) which has not been registered by EPA. The notice provides an opportunity for public comment on the application. The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the Washington, Oregon, and Idaho Departments of Agriculture.
