#### Discussion

The NRC published a proposed rule that would amend its regulations in part 40 of title 10 of the Code of Federal Regulations to require that the initial distribution of source material to exempt persons or general licensees be explicitly authorized by a specific license, which would include new reporting requirements. The proposed rule is intended to provide the Commission with more complete and timely information on the types and quantities of source material distributed for use either under exemption or by general licensees. In addition, the NRC is proposing to modify the existing possession and use requirements of the general license for small quantities of source material to better align the requirements with current health and safety standards. Finally, the NRC is proposing to revise, clarify, or delete certain source material exemptions from licensing to make the exemptions more risk informed. This proposed rule would affect manufacturers and distributors of certain products and materials containing source material and certain persons using source material under general license and under exemptions from licensing.

The proposed rule was published on July 26, 2010 (75 FR 43425) and the public comment period was to have expired November 23, 2010. The NRC has determined a need to develop draft implementation guidance to support this proposed rule and plans to publish the draft implementation guidance no
