

- Whether to include an adaptive management approach to address future spread of invasive weeds.

If authorized, the decision would describe adaptive management options under specific settings and conditions.

The EIS is a project level analysis. The scope of the project is confined to issues and potential environmental consequences relevant to the decision. This analysis does not attempt to re-evaluate or alter decisions made at higher levels. The decision is subject to and would implement direction from higher levels.

National and regional policies and Forest Plan direction require consideration of effects of all projects on invasive plant spread and prescribe protection measures where practical to limit those effects. Reconsideration of other existing project level decisions or programmatically prescribing protection measures or standards for future Forest management activities (such as travel management, timber harvest, and grazing management) are beyond the scope of this document. Cumulative effects of the Project are addressed where appropriate in Chapter 3 combined with effects of other Forest activities.

Even with careful consideration, unforeseen events can occur that will require additional analyses. Unanticipated events can result in new information that could have a bearing on a decision. Forest Service procedures for addressing such new information, documents, and decisions are thoroughly explained in FSH 1909.15, Section 18.

Preliminary Issues: Key issues identified to date include:

- The current and potential impacts of invasive plants on natural resources such as big game winter habitat, native plant communities, wilderness values, watershed function, and threatened, endangered, or sensitive species and their habitats.

- Economics, effectiveness, and potential impacts of various control methods on natural resources.

- Potential effects on non-target native plants and associated values, wildlife and fish populations, and human health from the application of herbicides.

Scoping Process: This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. Public participation will be especially important at several points during the analysis, beginning with the scoping process (40 CFR 1501.7). The Forest Service will be seeking information,

comments, and assistance from Federal, State, and local agencies, tribes, and other individuals or organizations who may be interested in or affected by the proposed project. This input will be used in preparation of the draft EIS. Continued scoping and public participation efforts will be used by the interdisciplinary team to identify new issues, determine alternatives in response to the issues, and determine the level of analysis needed to disclose potential biological, physical, economic, and social impacts associated with this project.

The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by May 2011. The EPA will publish a notice of availability of the draft EIS in the **Federal Register**. The comment period on the draft EIS will be 45 days from the date the EPA notice appears in the Federal Register. At that time, copies of the draft EIS will be distributed to interested and affected agencies, organizations, and members of the public for their review and comment. It is important that those interested in this proposal on the Medicine Bow-Routt National Forests and Thunder Basin National Grassland participate at that time.

The final EIS is scheduled for completion by April 2012. In the final EIS, the Forest Service is required to respond to substantive comments received during the comment period for the draft EIS. The Forest Supervisor of the Medicine Bow-Routt National Forests and Thunder Basin National Grassland is the responsible official. The Forest Supervisor will decide which, if any, of the proposed project alternatives will be implemented. The decision and reasons for the decision will be documented in appropriate Records of Decision. Those decisions will be subject to Forest Service appeal regulations (36 CFR part 215).

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will become part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however anonymous comments will not provide the respondent with standing to participate

in subsequent administrative review or judicial review.

Dated: November 23, 2010.

Steven R. Currey,

Acting Forest Supervisor.

BILLING CODE 3410-11-P

DEPARTMENT OF AGRICULTURE

Forest Service

Alpine County Resource Advisory Committee (RAC)

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Alpine County Resource Advisory Committee (RAC) will hold a meeting.

DATES: The meeting will be held on December 21st, 2010 and will begin at 6 p.m.

ADDRESSES: The meeting will be held in Alpine County at the Alpine Early Learning Center, 100 Foothill Road, Markleeville, CA 96120.

FOR FURTHER INFORMATION CONTACT: Daniel Morris, RAC Coordinator, USDA, Humboldt-Toiyabe National Forest, Carson Ranger District, 1536 S. Carson Street, Carson City, NV 89701 (775) 884-8140; E-MAIL danielmorris@fs.fed.us.

SUPPLEMENTARY INFORMATION: Agenda items to be covered include: (1) Discussion of Forest Service Issues of interest to the public (2) Public Comment. The meeting is open to the public. Public input opportunity will be provided and individuals will have the opportunity to address the Committee at that time.

Dated: November 22, 2010.

Genny E. Wilson,

Designated Federal Officer.
