SUPPLEMENTARY INFORMATION:

Title: Update of Nursery Stock Regulations.

OMB Number: 0579-0190.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to restrict the importation, entry, and interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture. APHIS regulations contained in "Subpart—Nursery Stock Plants, Roots, Bulbs, Seeds, and Other Plant Products (§§ 319.37 through 319.37-14) restrict, among other things, the importation of living plants, plant parts, seeds, and plant cuttings for planting or propagation.

In accordance with these regulations, individuals who are involved in growing, exporting, and importing nursery stock must provide information to APHIS about the commodities they wish to bring into the United States. This information serves as the supporting documentation needed to issue required forms and documents, and is vital to help ensure that plant pests are not introduced into the United States.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5 hours per response.

Respondents: Foreign national plant protection organizations; exporters and importers of nursery stock.

Estimated annual number of respondents: 30.

Estimated annual number of responses per respondent: 5.

Estimated annual number of responses: 150.

Estimated total annual burden on respondents: 75 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC this 16th day of November 2010.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
