

relevance and potential risk of the results observed from initial laboratory animal studies. In addition, EPA will be updating the assessment of triclosan exposure in the 2008 RED using the newly released 2005–2006 NHANES urinary monitoring results. The Agency will pay close attention to this ongoing research and will amend the regulatory decision if the science supports such a change. Also, the Agency has previously indicated that because of the amount of research being planned and currently in progress, it will undertake another comprehensive review of triclosan beginning in 2013.

Triclosan is also recognized as an emerging contaminant of concern by EPA's Office of Water. Through its authority under the Clean Water Act, EPA is conducting an effects assessment for triclosan that may be used by States and authorized Tribes to establish water quality standards for triclosan.

Under the Safe Drinking Water Act, EPA evaluated triclosan for inclusion on the third contaminant candidate list (CCL 3). The CCL 3 was published on October 8, 2009 (74 FR 51850) and includes contaminants that are currently unregulated in drinking water, that are known or anticipated to occur in public water systems, and which may require regulation under the Safe Drinking Water Act. EPA developed the CCL 3 using a multi-step process recommended by the National Academies of Science and the National Drinking Water Advisory Council. EPA considered the best available occurrence and health effects data to evaluate a universe of approximately 7,500 contaminants, from which EPA identified the list of 116 contaminants that present the greatest public health concern in drinking water. Triclosan was included in the universe of contaminants evaluated. However, EPA determined triclosan did not present as great a public health concern in drinking water as the contaminants that were selected for the CCL 3 list.

A related petition was filed with FDA by the same organizations that filed the EPA petition. The Agency is also aware of FDA's ongoing effort to finalize the topical antimicrobial over-the-counter (OTC) drug monograph under which some products containing triclosan are regulated. EPA and FDA intend to collaborate and share information throughout the public comment and petition response process as well as FDA's ongoing rule development.

III. Summary of the Petition

The Agency received a petition from Beyond Pesticides, and Food & Water Watch on January 28, 2010 that seeks

relief under several regulatory statutes. Under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA), the petitioners ask EPA to act to cancel and suspend the registration of pesticides containing triclosan. Under the Clean Water Act (CWA), the petitioners request that the Administrator impose technology-based effluent limitations, health-based toxic pollutant water quality pretreatment requirements, and biosolids regulation for triclosan. Under the Safe Drinking Water Act (SDWA), the petitioners request that the Administrator conduct a comprehensive assessment of the appropriateness of regulating triclosan under SDWA. Under the Endangered Species Act (ESA), the petitioners request that the Administrator comply fully with ESA, including consultation and biological assessment requirements. EPA has established a public docket, which contains a copy of the petition and will contain all comments received in response to this Notice. The docket may be accessed as described in this Notice. The statutes mentioned and the specific relief requested under each statute is summarized as follows:

- *FIFRA*. The petition states that “The hazards associated with Triclosan use and exposure during the pendency of a long review does not meet EPA's statutory duty to protect health and the environment. That is, because scientific studies demonstrate that the substance is used so pervasively that it is present in most people's bodies, EPA must take the most protective steps provided for under the statute to protect public health. In this regard, petitioners request that EPA (1) issue a notice of cancellation of the registrations of all products containing triclosan, pursuant to 7 U.S.C. 136d(b)(1), and (2) at the same time issue an emergency order pursuant to 7 U.S.C. 136d(c)(3) to suspend immediately those registrations.”

- *Clean Water Act*. The petition states that “numerous studies, including those of EPA, have established the substantial presence, and therefore serious threat, of triclosan to human health and the environment through the means of pollution of the nation's navigable waters. EPA's failures in this regard, in petitioners' view, are “arbitrary, capricious,” and otherwise “not in accordance with law.” Therefore, the Administrator should use her authority under the Act to evaluate these health and environmental effects thoroughly and act decisively, based on the abundance of scientific evidence and the express requirements of the CWA, to require proper regulation of triclosan.

She should use her authority to impose technology-based effluent limitations, health-based pollutant water quality pretreatment requirements, and biosolids regulation.

- *Safe Drinking Water Act*. The petition states that “EPA's reregistration decision sets the stage for a violation of the SWDA, in that triclosan would be allowed to contaminate drinking water at levels that threaten human health and the environment. For this reason, petitioners request that the Administrator conduct a comprehensive assessment of the appropriateness of regulating triclosan under the SDWA.”

- *Endangered Species Act*. The petition states that “because triclosan is present in the large environment, EPA's registration of that substance creates potential jeopardy for listed threatened and endangered species and may destroy or adversely modify designated critical habitats. This presence has been abundantly demonstrated throughout this petition. Accordingly, Petitioners request that the Administrator comply fully with the ESA, including the consultation and biological assessment requirements. Petitioners note, in this regard, that notwithstanding FIFRA's primary rule in regulating pesticides, courts have held that EPA must comply with ESA in its administration of FIFRA.”

FEDERAL COMMUNICATIONS COMMISSION

Public Safety and Homeland Security Bureau; Federal Advisory Committee Act; Communications Security, Reliability, and Interoperability Council Meeting

AGENCY: Federal Communications Commission.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice advises interested persons that the FCC Communications Security, Reliability, and Interoperability Council will hold its fourth meeting on December 13, 2010, at 9 a.m. in the Commission Meeting Room of the Federal Communications Commission.

DATES: December 13, 2010.

ADDRESSES: Federal Communications Commission, Room TW-C305

(Commission Meeting Room), 445 12th Street, SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Jeffery Goldthorp, Designated Federal Officer of the FCC's CSRIC, (202) 418-1096 (voice) or jeffery.goldthorp@fcc.gov (e-mail); or Lauren Kravetz, Deputy Designated Federal Officer of the FCC's CSRIC, 202-418-7944 (voice) or lauren.kravetz@fcc.gov (e-mail).

SUPPLEMENTARY INFORMATION: The notice of this meeting was first published in the **Federal Register** on November 30, 2010, only 14 days in advance of the meeting. While the publication did not meet the 15-day requirement for advance publication, exceptional circumstances warrant proceeding with the meeting on December 13, 2010. CSRIC members were informed of the December 13th meeting at the October public meeting of the Council and have been informed informally of the December meeting date on more than one occasion since then. A significant number of Council members have made business and travel plans in accordance with this schedule, and there is no date within one month of the planned date that will accommodate Council members' schedules. Delaying the meeting will also cause undue financial burdens on many of the members who have made travel arrangements.

In addition, it is not possible at this time to schedule a half-day meeting in the FCC's Commission Meeting Room for any date within one month of December 13, 2010. As the Council's meeting planned for March 2011 is scheduled to be the final meeting of the CSRIC before expiration of the CSRIC charter on March 18, 2011, delaying the meeting scheduled for December 13, 2010 threatens the Council's ability to complete its work. As a significant amount of the Council's work focuses on public safety issues, it is critical that the December 13, 2010 meeting proceed as planned so as not to delay implementation of solutions and best practices for public safety communications and cybersecurity. Recognizing the one-day delay in **Federal Register** publication, the agency issued a Public Notice of this meeting on November 29, 2010 to mitigate the late **Federal Register** publication and as an additional way of advising the public of this meeting and their right to attend. As the December 13, 2010 meeting date was announced at the October public meeting of the Council, the meeting has now been broadly announced to the public more than once. The November 30, 2010, **Federal Register** notice is available at <http://frwebgate3.access.gpo.gov/cgi-bin/>
