NUCLEAR REGULATORY COMMISSION

[Docket No.: 70-7016; NRC-2009-0157]

Notice of Receipt and Availability of Environmental Report Supplement 2 for the Proposed GE-Hitachi Global Laser Enrichment Laser-Based Uranium Enrichment Facility

On January 13, 2009, GE-Hitachi Global Laser Enrichment, LLC (GLE)

was granted an exemption to file its environmental report in advance of its license application. GLE submitted its Environmental Report (ER) on January 30, 2009 (ML090910573), that proposes the construction, operation, and decommissioning of a laser-based uranium enrichment facility. The proposed facility would be located approximately six miles north of the City of Wilmington in New Hanover County, North Carolina.

The U.S. Nuclear Regulatory Commission (NRC or the Commission) published a Notice of Intent to Prepare an Environmental Impact Statement (EIS) on the proposed action and the opportunity for public comment on the scope of issues to be considered in the EIS (74 FR 16237) (April 9, 2009). The comment period was extended to allow members of the public to review the publicly available portions of the license application (July 24, 2009), (74 FR 36781). The license application was submitted on June 26, 2009, (ML091871003).

On May 8, 2009, the NRC granted an exemption to authorize GLE to conduct site preparation and pre-construction activities on the Wilmington site. GLE submitted Supplement 1 to its ER on July 13, 2009, *GLE Environmental Report Supplement 1—Early Construction* (ML092100577). Supplement 1 distinguishes between the environmental impacts of pre-construction activities covered by the exemption and NRC authorized construction activities which will not be undertaken unless a license is granted. On November 13, 2009, GLE submitted Supplement 2 to its ER, *GLE Environmental Report Supplement 2—Revised Roadway and Entrance* (ML093240135). Supplement 2 provides information describing the environmental impacts associated with revising the location of the entrance and roadway into the Wilmington site.

On January 13, 2010, the NRC issued an order that announced the receipt of an application from GLE for a license to possess and use source, byproduct, and special nuclear material and to enrich natural uranium to a maximum of 8 percent U-235 by a laser-based enrichment process. This order also included the Notice of Consideration of Issuance of License; Notice of Hearing and Commission Order; and Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information and Safeguards Information for Contention Preparation (75 FR 1819) (January 13, 2010).

FOR FURTHER INFORMATION CONTACT: For general or technical information

associated with the licensing review of the GLE application, please contact Mr. Timothy Johnson at (301) 492-3121 or Timothy.Johnson@nrc.gov. For general information about the environmental review process, please contact Ms. Jennifer A. Davis at (301) 415-3835 or Jennifer.Davis@nrc.gov.

Copies of GLE's application, safety analysis report, ER, and supplements to its ER (except for portions subject to withholding from public inspection in accordance with 10 CFR 2.390, Availability of Public Records) are available to the public at the Commission's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, 20852. SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available

From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549-0213.

Extension:

Regulation R, Rule 701, SEC File No. 270-562, OMB Control No. 3235-0624.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget a request for approval of extension of the existing collection of information provided for Regulation R, Rule 701 (17 CFR 247.701) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) ("Exchange Act").

Regulation R, Rule 701 requires a broker or dealer (as part of a written agreement between the bank and the broker or dealer) to notify the bank if the broker or dealer makes certain determinations regarding the financial status of the customer, a bank employee's statutory disqualification status, and compliance with suitability or sophistication standards.

The Commission estimates that broker or dealers would, on average, notify 1,000 banks approximately two times annually about a determination regarding a customer's high net worth or institutional status or suitability or sophistication standing as well as a bank employee's statutory disqualification status. Based on these estimates, the Commission anticipates that Regulation R, Rule 701 would result in brokers or dealers making approximately 2,000 notices to banks per year. The Commission further estimates (based on the level of difficulty and complexity of the applicable activities) that a broker or dealer would spend approximately 15 minutes per notice to a bank. Therefore, the estimated total annual reporting and recordkeeping burden for the
