Federal Energy Regulatory Commission

[Docket No. CP10-50-000]

Petal Gas Storage, L.L.C.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Cavern 12A Conversion Gas Storage Project and Request for Comments on Environmental Issues

March 19, 2010.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Cavern 12A Conversion Gas Storage Project involving construction and operation of facilities proposed by Petal Gas Storage, L.L.C. (Petal) in Forrest County, Mississippi. This EA will be used by the Commission in its decision-

making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process we will use to gather input from the public and interested agencies on the project. Your input will help the Commission staff determine what issues need to be evaluated in the EA. Please note that the scoping period will close on April 23, 2010.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives are asked to notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice that Petal provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC Web site (<http://www.ferc.gov>).

Summary of the Proposed Project

Petal proposes to purchase an existing salt-brine storage cavern (12A) from an affiliate, and convert it into a natural gas storage cavern. The proposed facilities would mostly be within Petal's existing storage field on the Petal Salt Dome. The project would increase Petal's firm natural gas storage capacity to meet anticipated growing demand for storage services in the Southeastern United States. Petal would rework the existing well and expand the underground storage capacity of Cavern 12A through solution mining. Cavern 12A would have an overall capacity of about 8.2 billion cubic feet (Bcf), consisting of 5.0 Bcf of working gas and 3.2 Bcf of cushion gas.

The proposed facilities include:

- Existing Cavern 12A to be converted from brine storage to natural gas storage;
- New 16-inch-diameter pipeline, about 1,525-feet-long, connecting Cavern 12A with Petal's existing withdrawal header between existing Caverns 6 and 7; and
- New appurtenant facilities grouped near existing Petal Compressor Station 2, including a withdrawal separator, heat exchanger, hot oil pump, pressure regulator, and Triethylene Glycol contactor and regeneration skid.

The general location of the proposed facilities is shown in Appendix 1.¹

Land Requirements for Construction

Petal estimated that about 39 acres of land would be disturbed by construction of the proposed facilities. About 5.8 acres would be retained for Petal's permanent operational easement, following construction. The remaining temporary construction acreage would be restored to its former condition and uses.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us² to discover and address concerns the public may have about proposals. This process is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to be addressed in the EA. All comments received will be considered during the preparation of the EA.

In the EA we will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils;
- Water resources and wetlands;
- Vegetation and wildlife;
- Cultural resources;
- Land use;
- Air quality and noise; and
- Safety and reliability.

¹ The appendices referenced in this notice are not being printed in the **Federal Register**. Copies of appendices were sent to all those receiving this notice in the mail and are available at <http://www.ferc.gov> using the link called "eLibrary" or from the Commission's Public Reference Room, 888 First Street, NE., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

² "We," "us," and "our" refer to the environmental staff of the Commission's Office of Energy Projects.
