Spring 2010 Semiannual Agenda of Regulations

AGENCY: Office of the Secretary, Commerce.

ACTION: Semiannual regulatory agenda.

SUMMARY: In compliance with Executive Order 12866, entitled "Regulatory Planning and Review," and the Regulatory Flexibility Act, as amended, the Department of Commerce (Department), in the spring and fall of each year, publishes in the **Federal Register** an agenda of regulations under development of review over the next 12 months. Rulemaking actions are grouped according to prerulemaking, proposed rules, final rules, long-term actions, and rulemaking actions completed since the fall 2009 agenda. The purpose of the agenda is to provide information to the public on regulations currently under review, being proposed, or issued by the Department. The agenda is intended to facilitate comments and views by interested members of the public.

The Department's spring 2010 regulatory agenda includes regulatory activities that are expected to be conducted during the period April 1, 2010, through March 31, 2011.

FOR FURTHER INFORMATION CONTACT:

Specific: For additional information about specific regulatory actions listed in the agenda, contact the individual identified as the contact person.

General: Comments or inquiries of a general nature about the agenda should be directed to Tricia Choe, Acting Chief Counsel for Regulation, Office of the Assistant General Counsel for Legislation and Regulation, U.S. Department of Commerce, Washington, DC 20230; telephone: 202-482-3151.

SUPPLEMENTARY INFORMATION: Executive Order 12866 requires agencies to publish an agenda of those regulations that are under consideration pursuant to this order. By memorandum of January 15, 2010, the Office of Management and Budget issued guidelines and procedures for the preparation and publication of the spring 2010 Unified Agenda of Federal Regulatory and Deregulatory Actions. The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, requires agencies to publish, in the spring and fall of each year, a regulatory flexibility agenda that contains a brief description of the subject of any rule likely to have a significant economic impact on a substantial number of small entities. The agenda also identifies those entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act.

In addition, beginning with the fall 2007 edition, the Internet became the basic means for disseminating the Unified Agenda. The complete Unified Agenda will be available online at www.reginfo.gov, in a format that offers users a greatly enhanced ability to obtain information from the Agenda database.

Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), the Department of Commerce's printed agenda entries include only:

(1) Rules that are in the Agency's regulatory flexibility agenda, in accordance with the Regulatory Flexibility Act, because they are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules that the Agency has identified for periodic review under section 610 of the Regulatory Flexibility Act.

Printing of these entries is limited to fields that contain information required by the Regulatory Flexibility Act's Agenda requirements. Additional information on these entries is available in the United Agenda published on the Internet. In addition, for fall editions of the Agenda, the entire Regulatory Plan will continue to be printed in the **Federal Register**, as in past years, including the Department of Commerce's Regulatory Plan.

Within the Department, the Office of the Secretary and various operating units may issue regulations. Operating

units, such as the National Oceanic and Atmospheric Administration (NOAA), the Bureau of Industry and Security, and the Patent and Trademark Office issue the greatest share of the Department's regulations.

A large number of regulatory actions reported in the agenda deal with fishery management programs of NOAA's National Marine Fisheries Service (NMFS). To avoid repetition of programs and definitions, as well as to provide some understanding of the technical and institutional elements of the NMFS programs, an "Explanation of Information Contained in NMFS Regulatory Entries" is provided below.

Explanation of Information Contained in NMFS Regulatory Entries

The Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) (the Act) governs the management of fisheries within the Exclusive Economic Zone (EEZ). The EEZ refers to those waters from the outer edge of the State boundaries, generally 3 nautical miles, to a distance of 200 nautical miles. Fishery Management Plans (FMPs) are to be prepared for fisheries that require conservation and management measures. Regulations implementing these FMPs regulate domestic fishing and foreign fishing where permitted. Foreign fishing may be conducted in a fishery in which there is no FMP only if a preliminary fishery management plan has been issued to govern that foreign fishing. Under the Act, eight Regional Fishery Management Councils (Councils) prepare FMPs or amendments to FMPs for fisheries within their respective areas. In the development of such plans or amendments and their implementing regulations, the Councils are required by law to conduct public hearings on the draft plans and to consider the use of alternative means of regulating.

The Council process for developing FMPs and amendments makes it difficult for NMFS to determine the significance and timing of some regulatory actions under consideration by the Councils at the time the semiannual regulatory agenda is published.

The Department's spring 2010 regulatory agenda follows.

Cameron F. Kerry,
General Counsel.

DOC

International Trade Administration—Long-Term Actions

Sequence Number	Title	Regulation Identifier Number
50	Commercial Availability of Fabric and Yarn	0625-AA59

National Oceanic and Atmospheric Administration—Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
51	Maximize Retention and Monitoring Program in the Shore-Based Pacific Whiting Fishery	0648-AR63
52	American Lobster Fishery; Fishing Effort Control Measures To Complement Interstate Lobster Management Recommendations by the Atlantic States Marine Fisheries Commission	0648-AT31
53	South Atlantic Fishery Ecosystem Plan Comprehensive Amendment	0648-AV31
54	Collection and Use of Tax Identification Numbers From Holders of and Applicants for National Marine Fisheries Service Permits	0648-AV76
55	Amendment 17 to the South Atlantic Fishery Management Council Snapper Grouper Fishery Management Plan ...	0648-AW11
56	Amendment 2 to the Fishery Management Plan for the Queen Conch Fishery of Puerto Rico and the U.S. Virgin Islands	0648-AW15
57	Marine Mammal Protection Act Stranding Regulation Revisions	0648-AW22
58	Amendment 4 to the Atlantic Herring Fishery Management Plan	0648-AW75
59	Allowable Modifications to the Turtle Excluder Device (TED) Requirements	0648-AW93
60	Regulatory Amendment To Correct and Clarify Amendment 13 and Subsequent Frameworks of the Northeast Multispecies Fishery Management Plan	0648-AW95
61	Amendment 11 to the Atlantic Mackerel, Squid, Butterfish Fishery Management Plan	0648-AX05
62	Amendment 30 to the Fishery Management Plan for Bering Sea and Aleutian Islands King and Tanner Crabs Arbitration Regulations	0648-AX47
63	Salmon Bycatch Reduction Management Measures for the Fishery Management Plan 91 in the Bering Sea Aleutian Islands	0648-AX89
64	Revoke Inactive Quota Share and Annual Individual Fishing Quota From a Holder of Quota Share Under the Pacific Halibut and Sablefish Fixed Gear Individual Fishing Quota Program	0648-AX91
65	2010 Summer Flounder, Scup, and Black Sea Bass Recreational Management Measures	0648-AY04
66	Maximized Retention Monitoring Program for Catcher Vessels in the Pacific Whiting Mothership Fishery in the Pacific Coast Groundfish Fishery	0648-AY17
67	Fisheries of the Caribbean, Gulf of Mexico, South Atlantic; Gulf of Mexico Fisheries; Generic Amendment for Annual Catch Limits	0648-AY22
68	Regulatory Amendment To Revise Charter Halibut Logbook Submission Requirements	0648-AY38
69	Addendum IV to the Weakfish Interstate Management Plan—Bycatch Trip Limit	0648-AY41
70	Framework 21 to the Atlantic Sea Scallop Fishery Management Plan	0648-AY43
71	Fishery Management Plan Amendment 95 for Skates Management in the Groundfish Fisheries of the Bering Sea and Aleutian Islands	0648-AY48
72	Amendment 2; Fishery Management Plan for Queen Conch Fishery of Puerto Rico and U.S. Virgin Islands, and Amendment 5; Reef Fish Fishery Management Plan of Puerto Rico and U.S. Virgin Islands	0648-AY55
73	Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; Interim 2010 Tribal Whiting Regulations	0648-AY59
74	Fisheries Off West Coast States; West Coast Salmon Fisheries; 2010 Management Measures	0648-AY60
75	Marine Mammal Protection Act Permit Regulation Revisions	0648-AV82
76	Take and Import Marine Mammals: Proposed Rule for Take of Marine Mammals Incidental to Routine Operations of 13 Power Generating Stations in Central and Southern California	0648-AW59
77	Reduce Sea Turtle Bycatch in Atlantic Trawl Fisheries	0648-AY61

National Oceanic and Atmospheric Administration—Final Rule Stage

Sequence Number	Title	Regulation Identifier Number
78	Certification of Nations Whose Fishing Vessels Are Engaged in IUU Fishing or Bycatch of Protected Living Marine Resources	0648-AV51
79	Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (MSRA) Environmental Review Procedure	0648-AV53
80	Revise Regulations Governing the North Pacific Groundfish Observer Program	0648-AW24

DOC

National Oceanic and Atmospheric Administration—Final Rule Stage (Continued)

Sequence Number	Title	Regulation Identifier Number
81	Amendment 3 to the Northeast Skate Complex Fishery Management Plan	0648-AW30
82	Atlantic Highly Migratory Species; Atlantic Shark Management Measures	0648-AW65
83	Amendment 31 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico	0648-AX67
84	Snapper-Grouper Fishery Management Plan of the South Atlantic	0648-AX75
85	Framework Adjustment 44 and Specifications for the Northeast Multispecies Fishery Management Plan	0648-AY29
86	FY 2010 Atlantic Deep-Sea Red Crab Specifications	0648-AY51
87	Provide Regulations for Permits for Capture, Transport, Import, and Export of Protected Species for Public Display, and for Maintaining a Captive Marine Mammal Inventory	0648-AH26
88	Protective Regulations for Killer Whales in the Northwest Region Under the Endangered Species Act and Marine Mammal Protection Act	0648-AV15
89	Rulemaking To Establish Take Prohibitions for the Threatened Southern Distinct Population Segment of North American Green Sturgeon	0648-AV94
90	Taking and Importing Marine Mammals; U.S. Naval Surface Warfare Center Panama City Division Mission Activities	0648-AW80
91	Rule To Revise the Critical Habitat Designation for the Endangered Leatherback Sea Turtle	0648-AX06
92	Critical Habitat Designation for Cook Inlet Beluga Whale Under the Endangered Species Act	0648-AX50
93	Taking of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Training Operations Conducted Within the Gulf of Mexico Range Complex	0648-AX86

National Oceanic and Atmospheric Administration—Long-Term Actions

50. COMMERCIAL AVAILABILITY OF FABRIC AND YARN

Legal Authority: PL 106-200, sec 112(b)(5)(B); PL 106-200, sec 211; EO 13191; PL 107-210, sec 3103

Abstract: This rule implements certain provisions of the Trade and Development Act of 2000 (the Act). Title I of the Act (the African Growth and Opportunity Act or AGOA), title II of the Act (the United States-Caribbean Basin Trade Partnership Act or CBTPA), and title XXXI of the Trade Act of 2002 (the Andean Trade Promotion and Drug Eradication Act or ATPDEA) provide for quota- and duty-free treatment for qualifying apparel products from designated beneficiary countries. AGOA and CBTPA authorize quota- and duty-free treatment for apparel articles that are both cut (or knit-to-shape) and sewn or otherwise

assembled in one or more designated beneficiary countries from yarn or fabric that is not formed in the United States or a beneficiary country, provided it has been determined that such yarn or fabric cannot be supplied by the domestic industry in commercial quantities in a timely manner. The President has delegated to the Committee for the Implementation of Textile Agreements (the Committee), which is chaired by the Department of Commerce, the authority to determine whether yarn or fabric cannot be supplied by the domestic industry in commercial quantities in a timely manner under the AGOA, the ATPDEA, and the CBTPA, and has authorized the Committee to extend quota- and duty-free treatment to apparel of such yarn or fabric. The rule provides the procedure for interested parties to

submit a request alleging that a yarn or fabric cannot be supplied by the domestic industry in commercial quantities in a timely manner, the procedure for public comments, and relevant factors that will be considered in the Committee's determination. The rule also outlines the factors to be considered by the Committee in extending quota- and duty-free treatment.

NATIONAL MARINE FISHERIES SERVICE

51. MAXIMIZE RETENTION AND MONITORING PROGRAM IN THE SHORE-BASED PACIFIC WHITING FISHERY

Legal Authority: 16 USC 1801 et seq

Abstract: The Pacific Fishery Management Council (Pacific Council) at their October 21-25, 1996, meeting in San Francisco, California addressed the treatment and disposition of salmon in the groundfish trawl fisheries, specifically the shore-based whiting fishery. At that meeting, the Pacific Council discussed the retention of salmon in the shore-based whiting fishery and took action to maintain a viable shore-based whiting fishery by using exempted fishing permits (EFPs). These EFPs allowed the shore-based whiting fleet to temporarily deliver unsorted catch to processing plants and provided for the monitoring of incidentally taken salmon until a permanent monitoring program could be implemented. In keeping with the Pacific Council's recommendation, NMFS is proceeding with implementing a monitoring program for the shore-based whiting fishery. This action will aid in the sustainable management of Pacific Coast salmon and groundfish fisheries while providing an important economic opportunity to those associated with the harvest, processing, and selling of whiting taken by the shore-based whiting fleet. The need for implementing a permanent monitoring program in the shore-based Pacific whiting fishery is to provide for a full retention fishery by enabling the shore-based whiting fleet, comprised exclusively of catcher vessels, to deliver unsorted catch to processing plants. This practice is necessary to ensure that whiting landings are of market quality, while abiding by Federal groundfish regulations and those implementing the Pacific Coast salmon and groundfish fishery management plans (FMPs).

52. AMERICAN LOBSTER FISHERY; FISHING EFFORT CONTROL MEASURES TO COMPLEMENT INTERSTATE LOBSTER MANAGEMENT RECOMMENDATIONS BY THE ATLANTIC STATES MARINE FISHERIES COMMISSION

Legal Authority: 16 USC 5101 et seq

Abstract: The National Marine Fisheries Service announces that it is considering, and seeking public comment on, revisions to Federal American lobster regulations for the Exclusive Economic Zone (EEZ) associated with effort control measures as recommended for Federal implementation by the Atlantic States Marine Fisheries Commission (ASFMFC), as outlined in the Interstate Fishery Management Plan (ISFMP) for American Lobster. This action will evaluate effort control measures in certain Lobster Conservation Management Areas including: limits on future access based on historic participation criteria; procedures to allow trap transfers among qualifiers and impose a trap reduction or conservation tax on any trap transfers; and a trap reduction schedule to meet the goals of the ISFMP.

53. SOUTH ATLANTIC FISHERY ECOSYSTEM PLAN COMPREHENSIVE AMENDMENT

Legal Authority: 16 USC 1801 et seq

Abstract: The purpose of this action is to develop an ecosystem-based approach to resource management. The South Atlantic Council plans to develop a Fishery Ecosystem Plan (FEP) Comprehensive Amendment, which would modify all its Fishery Management Plans (FMPs). The initial amendment would include the following: (1) Various actions to comply with new essential fish habitat requirements; (2) establishment of deep water coral Habitat Areas of Particular Concern, with gear limitations, such as the establishment of allowable trawl areas; and (3) other possible actions necessary to implement ecosystem-based fishery management.

54. COLLECTION AND USE OF TAX IDENTIFICATION NUMBERS FROM HOLDERS OF AND APPLICANTS FOR NATIONAL MARINE FISHERIES SERVICE PERMITS

Legal Authority: 31 USC 7701; 16 USC 1801 et seq; 16 USC 1361 et seq; 16 USC 1531 et seq

Abstract: In conformance with the Debt Collection Improvement Act of 1996 (Debt Collection Act), the National Marine Fisheries Service (NMFS) will issue a rule to require that each existing holder of and future applicant for a permit, license, endorsement, authorization, transfer or like instrument issued by the agency provide a Taxpayer Identification Number (TIN) (business, employer identification number or individual,

DOC—NOAA

Proposed Rule Stage

social security number) and Date of Incorporation or Date of Birth, as appropriate. Under the Debt Collection Act, NMFS is required to collect the TIN to report on and collect any delinquent non-tax debt owed to the Federal Government. NMFS plans to use Date of Incorporation or Date of Birth information for administrative aspects of permitting procedures with appropriate confidentiality safeguards pursuant to the Privacy Act. The rule will specify: (a) The particular uses that may be made of the reported TIN; (b) the effects, if any, of not providing the required information; (c) how the information will be used to ascertain if the permit holder or applicant owes delinquent non-tax debt to the Government pursuant to the Debt Collection Act; (d) the effects on the permit holder or applicant when such delinquent debts are owed; and (e) the agency's intended communications with the permit holder or applicant regarding the relationship of such delinquent debts to its permitting process and the need to resolve such debts as a basis for completing permit issuance or renewal. The rule will amend existing agency permit regulations and contain all appropriate modified and new collections-of-information pursuant to the Paperwork Reduction Act.

55. AMENDMENT 17 TO THE SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL SNAPPER GROUPER FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801

Abstract: Amendment 17 is intended to establish management reference points (MSY, OY) for red snapper; establish a rebuilding plan (rebuilding

timeframe and rebuilding strategy) for red snapper; specify Annual Catch Limits (ACL), Annual Catch Targets (ACT), and Accountability Measures (AM) for 10 species undergoing overfishing; and modify management measures to ensure future catch is equal to or below the ACL.

56. AMENDMENT 2 TO THE FISHERY MANAGEMENT PLAN FOR THE QUEEN CONCH FISHERY OF PUERTO RICO AND THE U.S. VIRGIN ISLANDS

Legal Authority: 16 USC 1801

Abstract: St. Croix queen conch landings by commercial fishermen alone have exceeded sustainable harvest levels since the 2000-2001 fishing season. In 2005-2006, the commercial harvest was over four times sustainable levels. Additionally, there is an unknown but significant recreational harvest. Overfishing of queen conch has led to resource collapse in other regions and in some cases, long-term resource loss. According to the NMFS Report on the Status of the U.S. Fisheries for 2006, queen conch is overfished and undergoing overfishing. Under current fishing practices, reductions in mortality are not expected to be sufficient in the queen conch fishery. Without a reduction in mortality, queen conch are not expected to achieve the rebuilding goals established in the Sustainable Fisheries Amendment of 2005. Therefore, a change in fishing practices is needed to help achieve the necessary reductions in queen conch fishing mortality.

57. MARINE MAMMAL PROTECTION ACT STRANDING REGULATION REVISIONS

Legal Authority: 16 USC 1379; 16 USC 1382; 16 USC 1421

Abstract: The National Marine Fisheries Service (NMFS) is considering proposing changes to its implementing regulations (50 CFR 216) governing the taking of stranded marine mammals under section 109(h), section 112(c), and title IV of the Marine Mammal Protection Act and is soliciting public comment to better inform the process. NMFS intends to clarify the requirements and procedures for responding to stranded marine mammals and for determining the disposition of rehabilitated marine mammals, which includes the procedures for the placement of non-releasable animals and for authorizing the retention of releasable rehabilitated marine mammals for scientific research, enhancement, or public display. This action will be analyzed under the National Environmental Policy Act with an Environmental Assessment.

58. AMENDMENT 4 TO THE ATLANTIC HERRING FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: The goal of Amendment 4 is to improve catch monitoring and ensure compliance with the Reauthorized Magnuson-Stevens Fishery Conservation and Management Act (MSRA). The management measures developed in this amendment may address one or more of the following objectives: (1) To implement measures to improve the long-term monitoring of catch (landings and bycatch) in the herring fishery; (2) to implement annual catch limits and accountability measures consistent with the MSRA; (3) to implement other management measures as necessary to ensure compliance with the new provisions of the MSRA; (4) to develop a sector allocation process or other limited access privilege program for the herring fishery; and (5) in the context of objectives 1-4 (above), to consider the health of the herring resource and the important role of herring as a forage fish and a predator fish throughout its range.

The New England Fishery Management Council will develop conservation and management measures to address the issues identified above and meet the goals/objectives of the amendment. Any conservation and management measures developed in this amendment also must comply with all applicable laws.

59. ALLOWABLE MODIFICATIONS TO THE TURTLE EXCLUDER DEVICE (TED) REQUIREMENTS

Legal Authority: 16 USC 1531 et seq

Abstract: NMFS proposes to revise the TED requirements to allow new materials and modifications to existing approved TED designs. Specifically, proposed allowable modifications include the use of flat bar, box pipe, and oval pipe for use in currently-approved TED grids; an increase in mesh size on escape flaps from 1-5/8 inches to 2 inches; the use of the Boone single straight cut and triangular escape openings; specifications on the use of TED grid brace bars; and the use of the Chauvin Shrimp Kicker to improve shrimp retention.

60. REGULATORY AMENDMENT TO CORRECT AND CLARIFY AMENDMENT 13 AND SUBSEQUENT FRAMEWORKS OF THE NORTHEAST MULTISPECIES FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: This action would make corrections and clarifications to the final rule implementing Amendment 13 to the Northeast Multispecies Fishery Management Plan, as well as subsequent groundfish actions. These corrections are administrative in nature and are intended to correct inaccurate references and other inadvertent errors and to clarify specific regulations to maintain consistency with the intent of Amendment 13 and subsequent actions.

61. AMENDMENT 11 TO THE ATLANTIC MACKEREL, SQUID, BUTTERFISH FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: Amendment 11 may consider: (1) Limited access in the Atlantic mackerel (mackerel) fishery; (2) implementation of annual catch limits (ACLs) and accountability measures (AMs) for mackerel and butterfish required under the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act of 2006 (MSRA); (3) updating of the description and identification of essential fish habitat (EFH) for all life stages of mackerel, Loligo squid, Illex squid, and butterfish (including gear impacts on Loligo squid egg EFH); and (4) possible limitations on at-sea processing of mackerel.

62. AMENDMENT 30 TO THE FISHERY MANAGEMENT PLAN FOR BERING SEA AND ALEUTIAN ISLANDS KING AND TANNER CRABS ARBITRATION REGULATIONS

Legal Authority: 16 USC 1862; PL 109–241; PL 109–479

Abstract: The proposed action would implement Amendment 30 to the Fishery Management Plan for Bering Sea and Aleutian Islands King and Tanner Crabs to make minor modifications to the arbitration system used to settle price and other disputes among harvesters and processors in the Bering Sea/Aleutian Islands crab rationalization program.

63. SALMON BYCATCH REDUCTION MANAGEMENT MEASURES FOR THE FISHERY MANAGEMENT PLAN 91 IN THE BERING SEA ALEUTIAN ISLANDS

Legal Authority: 16 USC 1801 et seq; 16 USC 3631 et seq; 16 USC 773 et seq; PL 108–447

Abstract: This fishery management plan amendment and rulemaking will implement the North Pacific Fishery Management Council's recommendations for management measures to minimize to the extent practicable Chinook salmon bycatch in the Bering Sea pollock fishery. These management measures provide two options for the pollock sectors (e.g., inshore catcher vessels, offshore catcher-processors, catcher vessels

delivering to motherships, or CDQ entities): fish under a lower Chinook salmon cap or participate in an incentive program and fish under a higher cap. Under the first option, the fleet as a whole may choose to fish under a transferable cap of 47,591 Chinook salmon, which would be allocated by season and sector. Once each sector reaches its specific cap, it would be prohibited from continuing to fish for pollock for the remainder of the season. Alternatively, vessels or CDQ entities may choose to participate in private contracts called incentive plan agreements (IPA) which would describe how participants would maintain low bycatch even when their bycatch levels are well below the hard cap approved. Those vessels or CDQ entities participating in an IPA would be allocated a transferable share of up to 60,000 Chinook salmon. This cap would be reduced for any vessels or CDQ entities not participating in an IPA and those vessels and CDQ entities would fish under a lower, non-transferable cap. In addition to the annual cap levels, if any sector operating under an IPA exceeds its proportion of 47,591 Chinook salmon three times in any seven-year period, the sector's maximum bycatch limit will be permanently reduced to its proportional share of the 47,591 cap. If the FMP amendments and proposed rule are approved, fishing under the new Chinook salmon bycatch management measures would start in 2011.

64. REVOKE INACTIVE QUOTA SHARE AND ANNUAL INDIVIDUAL FISHING QUOTA FROM A HOLDER OF QUOTA SHARE UNDER THE PACIFIC HALIBUT AND SABLEFISH FIXED GEAR INDIVIDUAL FISHING QUOTA PROGRAM

Legal Authority: 16 USC 1801 et seq; 16 USC 773 (Halibut Act)

Abstract: This action would amend existing commercial fishing regulations for the fixed-gear Pacific Halibut and sablefish individual fishing quota program at 50 CFR 679. The amendment would revoke inactive quota share unless the quota share permit holder affirmatively notifies NMFS in writing within 60 days of the agency's preliminary determination of inactivity that they choose to (a) retain the inactive IFQ quota share, (b) activate the quota share through transfer or by fishing, or (c) appeal the preliminary determination. Quota share that is not activated through this process and is revoked would be proportionally distributed to the quota share pool. This regulatory revision is based on the recommendations of the North Pacific Fishery Management Council in June 2006 and again in February 2009. Amending the regulations would improve the efficiency of the Pacific Halibut and Sablefish IFQ program and augment operational flexibility of participating fisherman.

66. MAXIMIZED RETENTION MONITORING PROGRAM FOR CATCHER VESSELS IN THE PACIFIC WHITING MOTHERSHIP FISHERY IN THE PACIFIC COAST GROUND FISH FISHERY

Legal Authority: 16 USC 1801

Abstract: The action would implement a monitoring program for catcher vessels in the mothership sector of the Pacific whiting fishery off the coast of Washington, Oregon, and California. The monitoring program would consist of a camera and other sensors to monitor fishing activity in order to maintain the integrity of the maximized retention requirements found at 50 CFR 660.306 (f)(7). Maximized retention encourages full retention of all catch while allowing minor discard events to occur. This ensures that unsorted catch is available for observers to monitor on board the mothership processors and thereby maintains the integrity of data collected under the observer program.

67. FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, SOUTH ATLANTIC; GULF OF MEXICO FISHERIES; GENERIC AMENDMENT FOR ANNUAL CATCH LIMITS

Legal Authority: 16 USC 1801

Abstract: The generic amendment is intended to modify five of the Council's Fishery Management Plan (FMPs). These include FMPs for: Reef Fish Resources, Shrimp, Stone Crab, Coral and Coral Reef Resources, and Red Drum. NMFS and the Council will develop these Annual Catch Limits (ACLs) in co-operation with the Scientific and Statistical Committee and the Southeast Fisheries Science Center. NMFS, in collaboration with the Council, will develop a DEIS to evaluate alternatives and actions for the ACLs. Some examples of these actions include: establishing sector specific ACLs, selecting levels of risk associated with species yields, considering removal or withdrawal of species from FMPs, and delegating species or species assemblages to state regulators.

69. • ADDENDUM IV TO THE WEAKFISH INTERSTATE MANAGEMENT PLAN—BYCATCH TRIP LIMIT

Legal Authority: 16 USC 5101

Abstract: NMFS takes this action to modify management restrictions in the Federal weakfish fishery in a manner consistent with the Commission's Weakfish Management Board's (Board) approved Addendum IV to Amendment 4 to the ISFMP for Weakfish. In short, the proposed Federal regulatory change would decrease the incidental catch allowance for weakfish in the EEZ in non-directed fisheries using smaller mesh sizes, from 150 pounds to no more than 100 pounds per day or trip, whichever is longer in duration. In addition it would impose a one fish possession limit on recreational fishers.

70. • FRAMEWORK 21 TO THE ATLANTIC SEA SCALLOP FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801 et seq

Abstract: Framework Adjustment 21 to the Atlantic Sea Scallop Fishery Management Plan (Framework 21) will set specifications for the 2010 scallop fishing year, which begins March 1, 2010, including adjustments to the total allowable catch, days-at-sea (DAS) allocations, scallop access area rotation schedule, and access area trip allocations. This framework is for a single year because the Council is working on Amendment 15, which will establish a process for implementing annual catch limits that are required to be in place in 2011 for the scallop fishery. Framework 21 must also comply with the requirements of the March 14, 2008 (amended February 5, 2009), Biological Opinion completed for the Atlantic Sea Scallop fishery, which requires the amount of allocated scallop fishing effort by limited access DAS scallop vessels that can be used in the Mid-Atlantic to be limited during the time of year when sea turtle distribution overlaps with scallop fishing activity. In addition, Framework 21 considers minor adjustments to the limited access general category individual fishing quota program, scheduled to be implemented March 1, 2010, and the observer set-aside program.

71. • FISHERY MANAGEMENT PLAN AMENDMENT 95 FOR SKATES MANAGEMENT IN THE GROUND FISH FISHERIES OF THE BERING SEA AND ALEUTIAN ISLANDS

Legal Authority: 16 USC 773 et seq; PL 108-447; PL 106-31; PL 106-554; PL 109-479; PL 105-277; 16 USC 1801; 16 USC 1540

Abstract: NMFS proposes regulations to implement Amendment 95 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP). If approved, Amendment 95 would move skates from the "other species" category to the target species list in the FMP. By listing skates as target species, a directed fishery for skates in the Bering Sea and Aleutian Islands Management Area (BSAI) may be managed to reduce the potential for overfishing skates. This proposed action is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act, the FMP, and other applicable laws.

72. • AMENDMENT 2; FISHERY MANAGEMENT PLAN FOR QUEEN CONCH FISHERY OF PUERTO RICO AND U.S. VIRGIN ISLANDS, AND AMENDMENT 5; REEF FISH FISHERY MANAGEMENT PLAN OF PUERTO RICO AND U.S. VIRGIN ISLANDS

Legal Authority: 16 USC 1801

Abstract: The Magnuson-Stevens Fishery Conservation and Management Act (MSRA: Pub. L. 94-265), as amended through January 12, 2007, requires the establishment of annual

catch limits (ACLs) and accountability measures (AMs) during 2010 for all species that are considered to be overfished or undergoing overfishing. The present amendment is being promulgated to meet those MSRA mandates as well as to establish framework procedures with which to effect future changes to the management plan and to restructure the fisheries management units for grouper and snapper. Various alternatives are included in the draft amendment, including maintenance of the status quo for each action as well as various alternatives regarding the year-sequences used to establish ALCs and the strategies to be employed to account for overages and to respond to needed changes in management methods.

75. MARINE MAMMAL PROTECTION ACT PERMIT REGULATION REVISIONS

Legal Authority: 16 USC 1374

Abstract: The National Marine Fisheries Service (NMFS) is considering changes to its implementing regulations (50 CFR 216) governing the issuance of permits for scientific research and enhancement activities under Section 104 of the Marine Mammal Protection Act and is soliciting public comment to better inform the process. NMFS intends to streamline and clarify general permitting requirements and requirements for scientific research and enhancement permits, simplify procedures for transferring marine mammal parts, possibly apply the General Authorization (GA) to research activities involving Level A harassment of non-endangered marine mammals,

and implement a “permit application cycle” for application submission and processing of all marine mammal permits. NMFS intends to write regulations for marine mammal photography permits and is considering whether this activity should be covered by the GA.

76. TAKE AND IMPORT MARINE MAMMALS: PROPOSED RULE FOR TAKE OF MARINE MAMMALS INCIDENTAL TO ROUTINE OPERATIONS OF 13 POWER GENERATING STATIONS IN CENTRAL AND SOUTHERN CALIFORNIA

Legal Authority: 16 USC 1361 et seq

Abstract: NMFS proposes to govern the take of marine mammals by Level A harassment (injury) and mortality from 13 power generating stations located on the coast of central and southern California incidental to routine power plant operations for a period of five years, under the authority of section 101(a)(5)(A) of the Marine Mammal Protection Act. Under that authority NMFS also must prescribe mitigation, monitoring, and reporting requirements in connection with take authorizations. Incidental takings of marine mammals, including California sea lions, harbor seals, and northern elephant seals can and do occur as a result of the operation of circulating water systems (CWS) by the electrical power generation plants located on the coast of central and southern California described in the incidental take authorization applications. These CWS

are an integral part of these power stations that provide continuous cooling water necessary for power generation and safety of the facility. The typical location of entrainment occurs as water is taken into the plant via submerged structures or canals. Intake velocities may be strong enough to pull live animals into the plant, particularly if they are actively seeking prey in the vicinity of intake structures. Confinement within intake plumbing could lead to confusion and panic, especially for young, immature animals. If the animal is unable to escape, it could (1) Drown or become fatally injured in transit between intake and large sedimentation basins within the plants known as forebays; (2) survive the transit and succumb in the forebay due to exhaustion, illness, or disease; or (3) survive the transit and be rescued by plant personnel using cages specially designed for such an activity. It is also likely that previously dead animals may end up entrained as well.

77. ● REDUCE SEA TURTLE BYCATCH IN ATLANTIC TRAWL FISHERIES

Legal Authority: 16 USC 1531 et seq

Abstract: NMFS is initiating a rulemaking action to reduce injury and mortality to endangered and threatened sea turtles resulting from incidental take, or bycatch, in trawl fisheries in the Atlantic waters. NMFS will likely address the size of the turtle excluder device (TED) escape opening currently required in the summer flounder trawl fishery, the definition of a summer flounder trawler and the use of TEDS in this fishery; the use of TEDs in the croaker and weakfish flynet, whelk, Atlantic sea scallop, and calico scallop trawl fisheries of the Atlantic Ocean; and new seasonal and temporal

DOC—NOAA

Proposed Rule Stage

boundaries for TED requirements. In addition, this rule will address the definition of the Gulf Area applicable to the shrimp trawl fishery in the southeast Atlantic and Gulf of Mexico. The purpose of the rule is to aid in the protection and recovery of listed sea turtle populations by reducing mortality in trawl fisheries through the use of TEDs.

NATIONAL MARINE FISHERIES SERVICE**78. CERTIFICATION OF NATIONS WHOSE FISHING VESSELS ARE ENGAGED IN IUU FISHING OR BYCATCH OF PROTECTED LIVING MARINE RESOURCES**

Legal Authority: 16 USC 1801 et seq; 16 USC 1826d to 1826k

Abstract: The National Marine Fisheries Service (NMFS) is establishing a process of identification and certification to address illegal, unreported, or unregulated (IUU) activities and bycatch of protected species in international fisheries. Nations whose fishing vessels engage, or have been engaged, in IUU fishing or bycatch of protected living marine resources would be identified in a biennial report to Congress, as required under section 403 of the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (MSRA) of 2006. NMFS would subsequently certify whether identified nations have taken appropriate corrective action with respect to the activities of its fishing vessels, as required under section 403 of MSRA.

79. MAGNUSON–STEVENS FISHERY CONSERVATION AND MANAGEMENT REAUTHORIZATION ACT (MSRA) ENVIRONMENTAL REVIEW PROCEDURE

Legal Authority: 16 USC 1801

Abstract: Section 107 of the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (MSRA) (Pub. L. 109-479) requires NOAA Fisheries to revise and update agency procedures for complying with the National Environmental Policy Act (NEPA) in the context of fishery management actions. It further requires that NOAA Fisheries consult with the Council on Environmental Quality (CEQ) and the Regional Fishery Management Councils (Councils) and involve the public in the development of the revised procedures. The MSRA provides that the resulting procedures will be the sole environmental impact assessment procedure for fishery management actions, and that they must conform to the time lines for review and approval of fishery management plans and plan amendments. They must also integrate applicable environmental analytical procedures, including the time frames for public input, with the procedure for the preparation and dissemination of fishery management plans, plan amendments, and other actions taken or approved pursuant to this Act in order to provide for timely, clear, and concise analysis that is useful to decision makers and the public, reduce

extraneous paperwork, and effectively involve the public. NOAA Fisheries is currently consulting with the councils, the public and CEQ to develop a proposed procedure.

80. REVISE REGULATIONS GOVERNING THE NORTH PACIFIC GROUND FISH OBSERVER PROGRAM

Legal Authority: 118 Stat 110; 16 USC 773 et seq; 16 USC 1801 et seq; 16 USC 3631 et seq; PL 108–199

Abstract: This rulemaking revises Federal regulations relevant to numerous administrative and procedural requirements applicable to observer providers, observers, and industry participating in the North Pacific Groundfish Observer Program. Specifically, this action would: Modify the current permit issuance process so that observer and observer provider permit issuance is a discretionary National Marine Fisheries Service (NMFS) decision; amend current Federal regulations addressing observer behavior involving drugs, alcohol, and physical sexual conduct to remove NMFS oversight of observer behavior

DOC—NOAA

Final Rule Stage

that does not affect job performance; require that observer providers submit policies related to these activities and continue to notify NMFS upon learning of an incident; revise Federal regulations so that observer providers are allowed to provide observers or technical staff for purposes of exempted fishing permits, scientific research permits, or other scientific research activities; revise the definition of “fishing day” in Federal regulations; require observer providers to annually submit detailed economic information to NMFS; specify a date by which observers who have collected data in the previous fishing year would be required to be available for debriefing; and implement housekeeping issues related to errors or clarifications in existing regulations at 50 CFR 679.50.

81. AMENDMENT 3 TO THE NORTHEAST SKATE COMPLEX FISHERY MANAGEMENT PLAN

Legal Authority: 16 USC 1801

Abstract: NMFS proposes regulations to implement measures in Amendment 3 to the Northeast Skate Complex Fishery Management Plan (Skate FMP). Amendment 3 was developed by the New England Fishery Management Council (Council) to rebuild overfished skate stocks (thorny and smooth skates) and implement annual catch limits (ACLs) and accountability measures (AMs) consistent with the requirements of the reauthorized Magnuson-Stevens Fishery Conservation and Management Act. Amendment 3 would establish an ACL and annual catch target (ACT) for the skate complex, total allowable landings (TAL) for the skate wing and

bait fisheries, seasonal quotas for the bait fishery, reduced possession limits, in-season possession limit triggers, and other measures to improve management of the skate fisheries. This rule also includes skate fishery specifications for fishing years (FY) 2010 through 2011.

82. ATLANTIC HIGHLY MIGRATORY SPECIES; ATLANTIC SHARK MANAGEMENT MEASURES

Legal Authority: 16 USC 1801 et seq

Abstract: This rule evaluates the management measures for small coastal sharks (SCS) based on the results of the 2007 SCS stock assessment. This rulemaking could consider, among other things, commercial quotas and trip limits, recreational minimum size and bag limits, time/area closures, and the public display quota. In addition, this rule implements a rebuilding plan for blacknose sharks. To the extent that blacknose sharks are caught in fisheries that are not targeted highly migratory species fisheries, the National Marine Fisheries Service (NMFS) will work with the appropriate Regional Fishery Management Council, Interstate Commission, and States to implement regulations through their processes to rebuild blacknose sharks. This action is necessary in light of recent stock assessments, which have determined that blacknose sharks are overfished with overfishing occurring. As needed, this rule may include other items to clarify existing regulations.

83. AMENDMENT 31 TO THE FISHERY MANAGEMENT PLAN FOR THE REEF FISH RESOURCES OF THE GULF OF MEXICO

Legal Authority: 16 USC 1801

Abstract: In September 2008, NOAA's National Marine Fisheries Service (NMFS) released a report based on observer data that indicated the total number of loggerhead sea turtle takes by the eastern Gulf of Mexico reef fish bottom longline fishery was much greater than that authorized in the most recent biological opinion. In response, the Gulf of Mexico Fishery Management Council (Council) requested NMFS take emergency action to reduce the number of takes by the fishery during the short term while the Council develops long-term measures in Amendment 31. Measures being considered include: (1) Modifying baits; (2) area, season, and depth restrictions;

DOC—NOAA

Final Rule Stage

(3) reducing effort through a longline endorsement program; and (4) using observers or electronic monitoring to close the fishery once a sea turtle take threshold has been met.

88. PROTECTIVE REGULATIONS FOR KILLER WHALES IN THE NORTHWEST REGION UNDER THE ENDANGERED SPECIES ACT AND MARINE MAMMAL PROTECTION ACT

Legal Authority: 16 USC 1361 et seq; 16 USC 1531 to 1543

Abstract: The National Marine Fisheries Service (NMFS) is considering whether to propose regulations to protect killer whales (*Orcinus orca*) in the Pacific Northwest. The Southern Resident killer whale distinct population segment (DPS) was listed as endangered under the Endangered Species Act (ESA) on November 18,

2005 (70 FR 69903). In the final rule announcing the listing, NMFS identified vessel effects, including direct interference and sound, as a potential contributing factor in the recent decline of this population. Both the Marine Mammal Protection Act (MMPA) and the ESA prohibit take, including harassment, of killer whales, but these statutes do not prohibit specified acts. NMFS is now considering whether to propose regulations that would prohibit certain acts, under our general authorities under the ESA and MMPA and their implementing regulations. The Proposed Recovery Plan for Southern Resident killer whales (71 FR 69101; November 29, 2006) includes as a management action the evaluation of current guidelines and the need for regulations and/or protected areas. The scope of this ANPR encompasses the activities of any person or conveyance that may result in the unauthorized taking of killer whales and/or that may cause detrimental individual-level and population-level impacts. NMFS requests comments on whether—and if so, what type of—conservation measures, regulations, and, if necessary, other measures would be appropriate to protect killer whales from the effects of these activities.

89. RULEMAKING TO ESTABLISH TAKE PROHIBITIONS FOR THE THREATENED SOUTHERN DISTINCT POPULATION SEGMENT OF NORTH AMERICAN GREEN STURGEON

Legal Authority: 16 USC 1531 to 1543

Abstract: Under section 4(d) of the Federal Endangered Species Act (ESA), the Secretary of Commerce is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. This rule would apply the prohibitions under ESA section 9(a)(1)(A) through 9(a)(1)(G) for threatened Southern DPS green sturgeon, but would include certain exceptions and exemptions from the take prohibitions. Exceptions are included for certain scientific research, emergency fish rescue, law enforcement, and habitat restoration activities that meet the criteria specified in the protective regulations under Section 4(d) of the ESA for Southern DPS green sturgeon. Exemptions are included for state scientific research, fisheries activities, and tribal activities conducted under NMFS approved ESA 4(d) programs. Thus, take of Southern DPS fish may be authorized under ESA section 7 or 10, or under an exception or exemption to the take prohibitions if the activities are conducted in compliance with NMFS criteria or NMFS-approved plans.

90. TAKING AND IMPORTING MARINE MAMMALS; U.S. NAVAL SURFACE WARFARE CENTER PANAMA CITY DIVISION MISSION ACTIVITIES

Legal Authority: 16 USC 1361 et seq

Abstract: On April 3, 2008, the National Marine Fisheries Service (NMFS) received an application from the Navy requesting an authorization for the take of 15 species/stocks of cetacean incidental to the proposed mission activities in the Naval Surface Warfare Center Panama City Division (NSWC PCD) study area over the course of 5 years. These mission activities are classified as military readiness activities. The purpose of the proposed mission activities is to enhance NSWC PCD's capability and capacity to meet littoral and expeditionary warfare requirements by providing Research, Development, Test, and Evaluation (RDT&E) and in service engineering for expeditionary maneuver warfare, operations in extreme environments, mine warfare, maritime operations, and coastal operations. The Navy states that these training activities may cause various impacts to marine mammal species in the NSWC PCD study area. The Navy requests an authorization to take individuals of these cetacean species by Level B Harassment. Further, the Navy requests an authorization to take 1 individual each of bottlenose, Atlantic spotted, and pantropical spotted dolphins per year by injury, as a result of the proposed mission activities.

NMFS is issuing a proposed rule to govern the take of these marine mammals by Level B harassment (behavior) and Level A harassment (injury) incidental to the aforementioned mission activities in the Naval NSWC PCD study area for a period of five years, under the authority of section 101(a)(5)(A) of the Marine Mammal Protection Act. Under that authority NMFS also must prescribe mitigation, monitoring, and reporting requirements in connection with take authorizations.

91. RULE TO REVISE THE CRITICAL HABITAT DESIGNATION FOR THE ENDANGERED LEATHERBACK SEA TURTLE**Legal Authority:** 16 USC 1531 et seq

Abstract: The National Marine Fisheries Service, announces a rule to revise leatherback turtle (*Dermochelys coriacea*) critical habitat under the Endangered Species Act of 1973, as amended. The leatherback is currently listed as endangered throughout its range, and critical habitat consists of Sandy Point Beach and adjacent waters, St. Croix, U.S. Virgin Islands. This rule would revise critical habitat to include waters along the U.S. West Coast.

97. MODIFYING MAXIMUM RETAINABLE AMOUNTS (MRAS) FOR SELECTED GROUND FISH SPECIES CAUGHT BY THE NON-AMERICAN FISHING ACT TRAWL CATCHER PROCESSOR SECTOR

Legal Authority: 16 USC 1801

Abstract: The National Marine Fisheries Service issues this action to amend regulations specifying the current interval of time allowed for determining the maximum retainable amount (MRA) of selected groundfish species that can be retained by non-American Fishery Act trawl catcher processors. This action would change MRA regulations located at 50 CFR 679.20(e) that establish the calculation of MRAs for groundfish species that are closed to directed fishing by increasing the interval of time each vessel in this sector would have to retain the MRA specified in regulation for several species in the Bering Sea and Aleutian Islands. This action is intended to promote the goals and objectives of the Fishery Management Plan (FMP) for Groundfish of the Bering Sea and Aleutian Islands Management Area.

RIN: 0648–AW12**100. FISHERIES IN THE WESTERN PACIFIC; WESTERN PACIFIC PELAGIC FISHERIES; AMENDMENT 18 TO THE PELAGICS FISHERY MANAGEMENT PLAN; SHALLOW-SET LONGLINE SWORDFISH FISHERY****Legal Authority:** 16 USC 1801

Abstract: Amendment 18 removes the annual limit on the number of fishing gear deployments (sets) for the Hawaii-based pelagic longline fishery. The amendment also revises the current maximum limit on the number of physical interactions that occur annually between loggerhead sea turtles and vessels registered for use under Hawaii longline limited access permits while shallow-setting. Other measures currently applicable to the fishery remain unchanged. Amendment 18 is intended to increase opportunities for the shallow-set fishery to sustainably harvest swordfish and other fish species, without jeopardizing the continued existence of sea turtles and other protected resources.

RIN: 0648–AW49**101. HALIBUT CHARTER VESSEL MORATORIUM****Legal Authority:** 16 USC 773 to 773k

Abstract: This action implements a moratorium on the entry of additional charter vessels into the guided sport fishery for Pacific halibut in waters of International Pacific Halibut

Commission regulatory areas 2C (Southeast Alaska) and 3A (Central Gulf of Alaska). This moratorium limits the number of charter vessels that may participate in the guided sport fishery for halibut in these areas. NMFS would issue a moratorium permit to a licensed charter vessel fishing business owner based on his or her past participation in the charter vessel fishery for halibut and to a Community Quota Entity representing specific rural communities. All moratorium permit holders would be subject to limits on the number of permits they could hold and on the number of charter vessel anglers who could catch and retain halibut on the permitted charter vessel. This action is proposed to achieve the halibut fishery management goals of the North Pacific Fishery Management Council. The intended effect is to curtail growth of fishing capacity in the guided sport fishery for halibut.

RIN: 0648–AW92**102. ATLANTIC HIGHLY MIGRATORY SPECIES; 2009 NORTH AND SOUTH ATLANTIC COMMERCIAL QUOTAS****Legal Authority:** 16 USC 1801 et seq

Abstract: This rule establishes the 2009 fishing season quotas for North and South Atlantic swordfish based on recent updated landings information and recommendations from the 2008 annual meeting of the International Commission for the Conservation of Atlantic Tunas (ICCAT). This rule is necessary to ensure that current swordfish quotas account for underharvests and reserve transfer from the 2008 fishing year, consistent with regulations at 50 CFR part 635 and ICCAT recommendations that establish

DOC—NOAA

103. AMENDMENT 29 TO THE FISHERY MANAGEMENT PLAN FOR REEF FISH RESOURCES OF THE GULF OF MEXICO

Legal Authority: 16 USC 1801

Abstract: Grouper and tilefish species in the Gulf of Mexico are managed under the reef fish fishery management plan. Past management practices under the plan have contributed to overcapitalization in these fisheries, which the Council now seeks to address. The amendment creates an individual fishing quota (IFQ) program to further control effort in the commercial grouper and tilefish fisheries in the Gulf of Mexico. The IFQ program was supported by over 80 percent of all eligible fishermen voting in a referendum for the IFQ program. The proposed rule would implement the IFQ program, establish design elements for the program, and allow consolidation of commercial permit landings history through permit stacking.

104. WESTERN AND CENTRAL PACIFIC FISHERIES FOR HIGHLY MIGRATORY SPECIES; IMPLEMENTATION OF THE LONGLINE CATCH LIMITS ADOPTED AT THE FIFTH SESSION OF THE WESTERN AND CENTRAL PACIFIC FISHERIES COMMISSION

Legal Authority: 16 USC 6901 et seq

Abstract: This rule implements the decisions adopted at the Fifth Session of the Western and Central Pacific Fisheries Commission (Commission) to reduce or otherwise control the fishing mortality rate from longline fishing of bigeye tuna and potentially other highly migratory fish species in the Western and Central Pacific Ocean. Pursuant to the Western and Central Pacific Fisheries Convention Implementation Act, the Secretary of Commerce is authorized to implement regulations to carry out the obligations of the United States under the Western and Central Pacific Fisheries Convention (Convention), including the implementation of Commission decisions. At its Fifth Regular Session, in December 2008, the Commission adopted specific catch limits in longline fisheries for certain highly migratory fish species in the Convention's area of application for 2009, 2010, and 2011. This rule fulfills the international obligations of the United States regarding these catch limits. Moreover, this rule could establish a framework for implementing future Commission decisions of a similar nature.

105. FISHERIES OFF WEST COAST STATES; PACIFIC COAST GROUND FISH FISHERY; DATA COLLECTION FOR THE TRAWL RATIONALIZATION PROGRAM

Legal Authority: 16 USC 1801

Abstract: NMFS plans to collect data to support implementation of a future trawl rationalization program under the Pacific Coast Groundfish Fishery Management Plan (FMP). NMFS may collect ownership information from all potential participants in the trawl rationalization program. In addition, NMFS is notifying potential participants on notice that the agency intends to use the Pacific States Marine Fisheries Commission's Pacific Fisheries Information Network (PacFIN) and the NMFS, Northwest Fisheries Science Center's Pacific whiting observer (NORPAC) databases to determine initial allocation of quota share for the trawl rationalization program.

106. AMENDMENT 10 TO THE ATLANTIC MACKEREL, SQUID, AND BUTTERFISH FISHERY MANAGEMENT PLAN**Legal Authority:** 16 USC 1801 et seq

Abstract: The purpose of Amendment 10 is to: (1) Develop a rebuilding program that allows the butterfish stock to rebuild in the shortest amount of time possible (but not to exceed ten years) and permanently protects the long-term health and stability of the rebuilt stock; (2) minimize bycatch and the fishing mortality of unavoidable bycatch, to the extent practicable, in mackerel, squid, and butterfish (MSB) fisheries; and (3) minimize the race to fish and promote efficient use of fishing capital in Loligo and Illex fisheries while providing a means for the industry to proactively engage in resource governance and to provide greater flexibility in developing management measures that fit localized needs through the development of sectors in the Loligo and Illex fisheries.

107. FISHING RESTRICTIONS IN THE LONGLINE AND PURSE SEINE FISHERIES IN THE EASTERN PACIFIC OCEAN IN 2009, 2010, AND 2011**Legal Authority:** 16 USC 951–961 ; 16 USC 971 et seq

Abstract: NMFS is proposing regulations under the Tuna Conventions Act of 1950 to implement

a resolution adopted by the Inter-American Tropical Tuna Commission (IATTC Resolution C-09-01). That resolution requires that the United States restrict the catch of bigeye tuna in the longline fishery and the effort in the purse seine fishery in the eastern Pacific Ocean in each of the years 2009, 2010, and 2011 to prevent overfishing of bigeye and yellowfin tuna. First, NMFS would implement a 500 metric ton (mt) catch limit on bigeye tuna caught by longline vessels greater than 24 meters in length in the IATTC Convention Area in 2009, 2010, and 2011. Second, NMFS would prohibit purse seine vessels of class size 4-6 (carrying capacity greater than 182 metric tons) from fishing for yellowfin, bigeye, and skipjack tunas in the IATTC Convention Area for a period of 59 days in 2009, 62 days in 2010, and 73 days in 2011. Notwithstanding this closure, purse seine vessels of class size 4 (between 182 and 272 mt carrying capacity) may make a single fishing trip of up to 30 days during the closed period. Third, class size 4-6 purse seine vessels would be prohibited from fishing for yellowfin, bigeye, and skipjack tunas between 96° and 100° W. longitude and between 4° N. and 3° S. latitude from September 29 to through October 29 for 2009, 2010, and 2011. And lastly, class size 4-6 purse seine vessels would continue to be required to retain all tuna caught unless it is unfit for human consumption for reasons other than size (which continues a long-term requirement).

109. • 2010 PACIFIC HALIBUT FISHERIES; CATCH SHARING PLAN**Legal Authority:** 16 USC 1801

Abstract: NMFS takes this action to approve and implement changes to the Pacific Halibut Catch Sharing Plan (Plan) for the International Pacific Halibut Commission's (IPHC or Commission) regulatory Area 2A off Washington, Oregon, and California (Area 2A). NMFS proposes to implement the portions of the Plan and management measures that are not implemented through the IPHC, which includes tribal regulations and the sport fishery allocations and management measures for Area 2A. These actions are intended to enhance the conservation of Pacific halibut, to provide greater angler opportunity where available, and to protect yelloweye rockfish and other overfished groundfish species from incidental catch in the halibut fisheries.

RIN: 0648-AY31**110. HARBOR PORPOISE TAKE REDUCTION PLAN REGULATIONS****Legal Authority:** 16 USC 1361 et seq

Abstract: The National Marine Fisheries Service is taking this action to reduce the number of harbor porpoise taken in sink gillnet fisheries in the Gulf of Maine and Mid-Atlantic. The Harbor Porpoise Take Reduction Plan of 1999 implemented measures to reduce the incidental capture of harbor porpoises in sink gillnets to below the stock's Potential Biological Removal level (PBR). Measures included management areas in which deterrent

devices (pingers) are required on gillnets; gear modifications; and seasonal closures. Between 2001 and 2005, incidental takes of harbor porpoise showed an increasing trend, and currently takes exceed PBR. This action would implement measures developed through discussions with the Harbor Porpoise Take Reduction Team, which was reconvened in 2007, when it was clear that existing measures were not sufficient to keep porpoise bycatch to below PBR. For the Gulf of Maine, this action would expand pinger use in Massachusetts Bay to include November; establish Stellwagen Bank Management Area, requiring pingers from November-May; establish Coastal Gulf of Maine Consequence Closure Area and require closure in October and November only if, after the most current two years, the average bycatch rate exceeds the trigger rate of .031, identified from observed compliant boats from the Mid-Coast, Massachusetts Bay, and Stellwagen Bank Management Areas; create Southern New England Management Area (includes current Cape Cod South Management Area); require pingers from December-May; establish Cape Cod South Expansion and Eastern Cape Cod Consequence Closure Areas; and require closure from February-April only if, after the most current two

years, the average bycatch rate exceeds the trigger rate of 0.023, identified from observed compliant vessels fishing in the Southern New England Management Area. For the Mid Atlantic, this action would establish Mudhole South Management Area; close from February 1-March 15; and modify the tie-down requirement.

**114. EXAMINATION OF PATENT
APPLICATIONS THAT INCLUDE
CLAIMS CONTAINING ALTERNATIVE
LANGUAGE**

Legal Authority: 35 USC 2(b)(2)

Abstract: The U.S. Patent and
Trademark Office (Office) is
considering revising the rules of
practice to address Markush-type and
other claims written so as to claim an
invention in the alternative. The search
and examination of Markush-type and
other claims written in the alternative
generally consume a disproportionate
amount of Office resources as compared
to other types of claims, because these
claims can encompass multiple
independent and distinct inventions
and determining the patentability of
such a claim may require a separate
examination of each of the alternatives
within the claim. The Office anticipates
that requiring applicants who choose
this claim-drafting format to ensure a
certain degree of relatedness among the
members of a Markush group or the
alternatives presented in the claims
will allow the Office to do a better,
more thorough, and reliable
examination of Markush-type and other
claims written in the alternative.

**115. FISCAL YEAR 2009 REVISION OF
REQUEST FOR CONTINUED
EXAMINATION, 18-MONTH
PUBLICATION, AND OTHER
MISCELLANEOUS COST-RECOVERY
PATENT FEES**

Legal Authority: 35 USC 2(b)(2); 35
USC 41(d); 35 USC 132(b)

Abstract: The USPTO is taking this
action to revise the rules of practice
to adjust the fee or set a fee for certain
processes and services for which the
USPTO is required to set a cost-
recovery fee. The USPTO is specifically
adjusting the fee for a request for

continued examination, 18-month
publication, and a certificate of
correction (applicant's mistake) fee, and
set a fee for requesting a corrected
republication of a patent application
publication. The rules of practice
currently do not set a fee, or do not
set a fee that recovers the USPTO's
costs, for these processes or services.
The USPTO is adjusting or setting these
fee amounts such that they more
accurately reflect the Office costs for
these processes or services.
