The proposed amendment would revise the PBAPS, Units 2 and 3, Technical Specification Section 4.3.1.1.a concerning the spent fuel pool k-infinity value. The amendment application dated June 25, 2008, (Agencywide Documents Access and Management System (ADAMS) Accession No. ML081820348), was supplemented by letters dated November 6, 2008, March 9, 2009, June 12, 2009, December 18, 2009, and March 26, 2010 (ADAMS Accession Nos. The amendment application and each of the supplement letters include attachments that contain sensitive unclassified non-safeguards information (SUNSI), and are not available to the public. See Section V, Further Information, and the Order providing instructions for requesting access to the withheld information.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), Section 50.92, this means that operation of the facility in accordance with the proposed amendment would
