

nutrition education, and breastfeeding promotion and support).

The proposed revision of the WIC Financial Management and Participation Report (FNS-798) and its addendum (FNS-798A) will modify the format for reporting unliquidated NSA obligations. The current FNS-798 requires unliquidated NSA obligations to be reported in the columns corresponding to the 12 months of the fiscal year in which the obligations are incurred. These obligation amounts are then revised downward as outlays and deobligations are made. WIC State agencies have determined reporting downward adjustments for outlays and deobligations is more laborious when reported by obligation month rather than as an adjustment to a cumulative amount. Therefore, the proposed revision will return to a prior format to allow WIC State agencies to report unliquidated NSA obligations as a cumulative year-to-date total.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 3.35 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The total annual burden on respondents was previously 4,523 hours. This revision does not change the total annual burden of 190 hours.

Affected Public: State, Local and Tribal Agencies; Respondent Type: Directors or Administrators of WIC state agencies.

Estimated Number of Respondents: 90 respondents.

Estimated Number of Responses per Respondent: 15.

Estimated Total Annual Burden on Respondents: 4,523 hours.

Dated: January 12, 2011.

SUPPLEMENTARY INFORMATION:

Background

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure that fair practices are used in trade.

The CCFA establishes or endorses permitted maximum levels for individual additives; prepares priority lists of food additives for risk assessment by the Joint FAO/WHO Expert Committee on Food Additives (JECFA); assigns functional classes to individual food additives; recommends specifications of identity and purity for food additives for adoption by Codex; considers methods of analysis for the determination of additives in food; and considers and elaborates standards or codes for related subjects, such as labeling of food additives when sold as such.

The Committee is hosted by China.
