**SUPPLEMENTARY INFORMATION:**

*Title:* The Effect of Entry-Level Motorcycle Rider Training on Motorcycle Crashes.

*Type of Request:* New information collection request.

*Abstract:* Motorcycle fatalities in the United States decreased in 2009 for the first time after steadily increasing for 11 years. However, even with this decline, the number of motorcycle fatalities in 2009 was nearly double that from a decade ago.

Motorcycle rider training is a part of most States' motorcycle safety programs, and funds are set aside under Section 2010 of SAFETEA-LU in part to help States increase their motorcycle training. A study conducted by Billheimer (1998) found that trained riders with less than 500 miles of riding experience had a lower crash rate than untrained riders during the 6 months after training. Other studies conducted on the effectiveness of motorcycle rider training in the United States, however, have not found an effect of motorcycle rider training on crashes. Thus, the extent to which motorcycle rider training reduces crash involvement is unclear.

The National Highway Traffic Safety Administration (NHTSA) plans on using information from surveys and archival records to examine the impact of entry-level motorcycle rider training on safe motorcycle riding, as one component of
