

- Where can urban trails connect to Federal lands; and
- How should the Las Vegas Perimeter Open Space and Trail concept, located primarily on BLM lands, be considered?

You may submit comments on issues and planning criteria in writing to the BLM at public scoping meetings or you may submit them to the BLM using one of the methods listed in the **ADDRESSES** section of this notice. To be most helpful, you should submit comments within the 60-day public comment period. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that the entire comment—including personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. The minutes and list of attendees for each scoping meeting will be available to the public and open for 30 days after the meeting to any participant who wishes to clarify the views he or she expressed. The BLM will evaluate the identified issues, to be addressed in the plan, and will place them into one of three categories:

1. Issues to be resolved in the plan;
2. Issues to be resolved through policy or administrative action; or
3. Issues beyond the scope of this plan.

The BLM will provide an explanation in the Draft RAMP/CTTM/EIS as to why an issue is placed in category 2 or 3. The public is also encouraged to help identify any management questions and concerns that should be addressed in the plan. The BLM will work collaboratively with interested parties to identify the management decisions that are best suited to local, regional, and national needs and concerns.

The BLM will use an interdisciplinary approach to develop the plan in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in the planning process: Renewable energy, lands and realty, minerals management, outdoor recreation, air resources, visual resources, vegetation, cultural resources, paleontology, botany, special status species, wildlife and fisheries, hydrology, sociology and economics.

#### Mount Diablo Meridian

##### *Parcel One*

T. 24S., R. 8E.,  
Sec. 11, SW $\frac{1}{4}$ SW $\frac{1}{4}$ .

The area described contains 40 acres, more or less, in Monterey County.

Parcel one is proposed for sale at the appraised fair market value of \$68,200.

##### *Parcel Two*

T. 24S., R. 8E.,  
Sec 12, SW $\frac{1}{4}$ SW $\frac{1}{4}$ .

The area described contains 40 acres, more or less, in Monterey County.

Parcel two is proposed for sale at the appraised fair market value of \$68,200. The public lands were first identified as suitable for disposal in the 1984 BLM Hollister Resource Management Plan (RMP) and remain available for sale under the 2007 Hollister RMP revision, and are not needed for any other Federal purpose. Disposal of the lands would be in the public interest. The lands are difficult and uneconomic to manage as part of the public lands because they lack legal access, and are small parcels isolated from other public lands. The BLM has completed a mineral potential report which concluded there are no known mineral values in the lands proposed for sale. The BLM proposes that conveyance of the Federal mineral interests would occur simultaneously with the sale of the lands.

On January 28, 2011, the above described lands will be segregated from
