The Basic Aluminum Castings Co., Cleveland, OH; Notice of Revised Determination on Reconsideration

By application dated December 3, 2010, The International Union, United Automobile, Aerospace and Agricultural Implement Workers of America, Region 2B, requested administrative reconsideration of the negative determination regarding workers' eligibility to apply for Trade Adjustment Assistance (TAA) applicable to workers and former workers of The Basic Aluminum Castings Co., Cleveland, Ohio (subject firm). The determination was issued on October 14, 2010. The Department's Notice of Determination was published in the **Federal Register** on November 3, 2010 (75 FR 67773). Workers at the subject firm are engaged in employment related to the production of aluminum die castings.

New information revealed that, during the period of investigation, imports of articles like or directly competitive aluminum die castings produced by the subject firm have increased. Specifically, the Department of Labor conducted a survey of the subject firm's major declining customer regarding their purchases of aluminum die castings during the relevant period. The survey revealed increased customer reliance on imported aluminum die castings.

Finally, Section 222(a)(2)(A)(iii) has been met because the increased imports of aluminum die castings by a customer of the subject firm contributed importantly to the worker group separations and sales/production declines at the subject firm.

Conclusion

After careful review of the additional facts obtained during the reconsideration investigation, I determine that workers of The Basic Aluminum Castings Co., Cleveland, Ohio, who are engaged in employment related to the production of aluminum die castings, meet the worker group certification criteria under Section 222(a) of the Act, 19 U.S.C. 2272(a). In accordance with Section 223 of the Act, 19 U.S.C. 2273, I make the following certification:

"All workers of The Basic Aluminum Castings Co., Cleveland, Ohio, who became totally or partially separated from employment on or after December 2, 2008, through two years from the date of this revised certification, and all workers in the group threatened with total or partial separation from employment on date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended."

Signed in Washington, DC, this 21st day of January 2011.

Certifying Officer, Office of Trade Adjustment Assistance.

SUPPLEMENTARY INFORMATION: *Title of Collection:* EHR Generic Clearance.

OMB Approval Number: 3145-0136.

Abstract: The National Science Foundation requests renewal of program accountability and communication data collections (e.g., surveys, face-to-face and telephone interviews, observations, and focus groups) that describe and track the impact of NSF funding that focuses on the Nation's science, technology, engineering, and mathematics (STEM) education and STEM workforce. NSF funds grants, contracts, and cooperative agreements to colleges, universities, and other eligible institutions, and provides graduate research fellowships to individuals in all parts of the United States and internationally.

The Directorate for Education and Human Resources (EHR), a unit within NSF, promotes rigor and vitality within the Nation's STEM education enterprise to further the development of the 21st century's STEM workforce and public scientific literacy. EHR does this through diverse projects and programs that support research, extension, outreach, and hands-on activities that service STEM learning and research at all institutional (e.g., pre-school through postdoctoral) levels in formal and informal settings; and individuals of all ages (birth and beyond). EHR also focuses on broadening participation in STEM learning and careers among United States citizens, permanent residents, and nationals, particularly those individuals traditionally underemployed in the STEM research workforce, including but not limited to women, persons with disabilities, and racial and ethnic minorities.

At the request of OMB an EHR Generic Clearance was established in 1995 to integrate management, monitoring, and evaluation information pertaining to the NSF's Education and Training (E&T) portfolio in response to the Government Performance and Results Acts (GPRA) of 1993. Under this generic survey clearance (OMB 3145-0136), data from the NSF administrative databases are incorporated with findings gathered through initiative-, divisional-, and program-specific data collections. The scope of the EHR Generic Clearance primarily covers descriptive information gathered from education and training projects that are funded by NSF. Most programs subject to EHR Generic data collection are funded by the EHR Directorate, but some are funded in whole or in part by disciplinary directorates or multi-disciplinary or cross-cutting programs.
