SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-63819; File No. SR-CBOE-2010-106]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Order Approving a Proposed Rule Change, as Modified by Amendment No. 1, To Amend Margin Requirements for Credit Options

February 2, 2011.

I. Introduction

On December 1, 2010, the Chicago Board Options Exchange, Incorporated ("Exchange" or "CBOE") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change as described below. On December 14, 2010, the Exchange filed Amendment No. 1 to the proposed rule change.³ The

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Amendment No. 1 to SR-CBOE-2010-106 replaced and superseded the original rule filing in its entirety.

proposed rule change was published for comment in the **Federal Register** on December 21, 2010.⁴ The Commission received no comment letters on the proposed rule change. This order approves the proposed rule change.

II. Description of the Proposal

The Exchange proposes to amend Rule 12.3(l), *Margin Requirements*, to make CBOE's margin requirements for Credit Options consistent with FINRA Rule 4240, *Margin Requirements for Credit Default Swaps*. CBOE's Credit Options consist of two variations—Credit Default Options and Credit Default Basket Options. Credit Default Options and Credit Default Basket Options are also referred to as "Credit Event Binary Options." Effectively, both contracts operate in the same manner as credit default swap contracts.

As with a credit default swap contract, the buyer of a Credit Option contract is buying protection from the seller of the Credit Option. This protection is in the form of a monetary payment from the Credit Option seller to the Credit Option buyer in the event that the issuer of debt securities, or Reference Entity, specified as underlying the Credit Option contract has a Credit Event,⁵ consequently defaulting on the payment of principal and interest on its debt securities. When a Credit Option buyer and seller initially open their positions via a transaction consummated on the Exchange, the Credit Option buyer's account is charged (debited) for the cost of the protection. The Credit Option seller's account is credited. For the protection, there is only a one-time debit and credit to the buyer and seller, respectively. If, prior to expiration of the Credit Option, a Credit Event⁶ occurs, the Credit Option contract is settled with a credit to the Credit Option buyer's account for a predetermined payout amount (e.g., \$1,000), based on the Exchange's contract specifications. The Credit Option seller's account is debited (charged) for the payout amount.

Credit Default Options have a single Reference Entity. Credit Default Basket Options have multiple Reference Entities. If a Credit Default Basket

CBOE amended its rules to permit it to, among other things, list credit options designating a single credit event, such as failure-to-pay default, another event of default, or a restructuring.
