

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Statement of Organization, Functions, and Delegations of Authority; Office of the National Coordinator for Health Information Technology

ACTION: Notice.

SUMMARY: The Office of the National Coordinator for Health Information Technology has reorganized one of its functions in order to more effectively meet the mission outlined by The Health Information Technology for Economic and Clinical Health (HITECH) Act, part of the American Recovery and Reinvestment Act of 2009 (ARRA). The reorganization affects two of the Director-level offices: The Office of the Chief Scientist and the Office of Economic Analysis and Modeling.

FOR FURTHER INFORMATION CONTACT: Sam Shellenberger, Office of the National Coordinator, Office of the Secretary, 200 Independence Ave., NW., Washington, DC 20201, 202-690-7151.

Part A, Office of the Secretary, Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services, Chapter AR, Office of the National Coordinator for Health Information Technology (ONC), as last amended at 74 FR 62785-62786, dated December 1, 2009, and as corrected at 75 FR 49494, dated August 13, 2010, is amended as follows:

I. Under Part A, Chapter AR, Office of the National Coordinator for Health Information Technology, Section AR.20 Functions, delete Chapter B in its entirety and replace with the following:

B. Office of Economic Analysis, Evaluation and Modeling (ARB): The Office of Economic Analysis, Evaluation and Modeling works with and reports directly to the National Coordinator. The Office: (1) Provides advanced policy analysis of health information technology strategies and policies to the National Coordinator; (2) applies research methodologies to perform evaluation studies of health information technology grant programs; and, (3) applies advanced mathematical or quantitative modeling to the U.S. health care system for simulating the microeconomic and macroeconomic effects of investing in health information technology. Such modeling will be used with varying public policy scenarios to perform advanced health care policy analysis for requirements of the Recovery Act, such as reductions in health care costs resulting from adoption and use of health information technology.

The results of these analyses provided to the National Coordinator will inform strategies to enhance the use of health

information technology in improving the quality and efficiency of health care and improving public health.

II. Under Part A, Chapter AR, Office of the National Coordinator for Health Information Technology, Section AR.20 Functions, Chapter C, remove the following language from the Office of the Chief Scientist (ARC) and renumber the remaining items in the paragraph accordingly:

“(1) Applying research methodologies to perform evaluation studies of health information technology grant programs;”

III. Delegation of Authority. Pending further delegation, directives or orders by the Secretary or by the National Coordinator for Health Information Technology, all delegations and redelegations of authority made to officials and employees of affected organizational components will continue in them or their successors pending further redelegations, provided they are consistent with this reorganization.

Authority: 44 U.S.C. 3101.

Dated: January 31, 2011.

J. Holland, Jr.,

Assistant Secretary for Administration.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-5960 and send comments to Carol E. Walker, Acting CDC Reports Clearance Officer, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an e-mail to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have

practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Cops and Cars: Reducing Law Enforcement Officer Deaths in Motor Vehicle Crashes—NEW—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Occupational hazards facing law enforcement officers (LEOs) include psychological, biological, physical, and chemical stressors. While homicides, suicides, and stress-related cardiovascular disease have been well documented in the literature, much less is known about work related motor vehicle incidents in this occupation. Motor vehicle incidents and crashes are the leading cause of occupational death among LEOs. This is not surprising given that LEOs spend a large amount of time conducting vehicle patrols, can be involved in dangerous high-speed pursuits, and often perform work alongside interstates and roadways near speeding motor vehicles. While seatbelt use significantly reduces the chance of dying in a motor-vehicle crash, there is some anecdotal evidence that LEOs do not wear seatbelts and often for good reasons. For example, one of the leading reasons why officers report not wearing seatbelts was the tendency of the belt to get caught on their gun holster and therefore inhibit their safety while in the field. A better understanding of how officers view seatbelt usage, ways to decrease barriers to usage in the field, and possible gateways to this behavior change is needed before developing evidence-based interventions.

The Occupational Safety and Health Act, Public Law 91-596 (section 20[a] [1]) authorizes the National Institute for Occupational Safety and Health (NIOSH) to conduct research to advance the health and safety of workers. NIOSH is proposing to conduct a population-based, cross-sectional survey among LEOs in the State of Iowa to measure motor-vehicle safety practices, perceptions of these practices, and prior occupational motor-vehicle crashes.
