

we are reporting a \$32,000 increase in annual costs. This adjustment increase is due to an increase in the tariff filing fee from \$775 to \$815.

The Commission established a plan to ensure that payphone service providers (PSPs) were compensated for certain non-coin calls originated from their payphones.

As part of this plan, the Commission required that by October 7, 1997, local exchange carriers were to provide payphone-specific coding digits to PSPs, and that PSPs were to provide those digits from their payphones to interexchange carriers.

The provision of payphone-specific coding digits was a prerequisite to payphone per-call compensation payments by IXCs to PSPs for subscriber 800 and access code calls. The Commission's Wireline Competition Bureau subsequently provided a waiver until March 9, 1998, for those payphones for which the necessary coding digits were not provided to identify calls. The Bureau also on that date clarified the requirements established in the Payphone Orders for the provision of payphone-specific coding digits and for tariffs that LECs must file pursuant to the Payphone Orders.

Section 64.901 requires carriers to separate their regulated costs from nonregulated costs using the attributable cost method of cost allocation, per the principles described in Section 64.901.

Section 64.903(a) requires LECs with annual operating revenues equal to or above the indexed revenue threshold as defined in 47 CFR 32.9000 to file a cost allocation manual (CAM) containing the information specified in Section 64.903(a)(1)-(6).

Section 64.903(b) requires that carriers update their CAMs at least annually, except changes to the cost apportionment table and the description of time reporting procedures must be filed at time implementation. The decrease in burden is due to an Order, FCC 08-12, which granted numerous carriers forbearance from rule compliance.

The Cost Allocation Manual (CAM) is reviewed by the Commission to ensure that all costs are properly classified between regulated and nonregulated activity. Uniformity in the CAMs helps improve the joint cost allocation process. In addition, this uniformity gives the Commission greater reliability in financial data submitted by the carriers through the Automated Reporting Management Information System (ARMIS).
