## DELAWARE RIVER BASIN COMMISSION

### Notice of Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold an informal conference followed by a public hearing on Wednesday, March 2, 2011. The hearing will be part of the Commission's regular business meeting. The conference session and business meeting both are open to the public and will be held at the West Trenton Volunteer Fire Company, located at 40 West Upper Ferry Road, West Trenton, New Jersey.

The conference among the commissioners and staff will begin at 10:45 a.m. and will consist of two presentations: report by Partnership for the Delaware Estuary's Executive Director Jennifer Adkins on PDE's climate-ready estuary project; and report by a representative of Columbia University's Columbia Earth Institute on

that institution's water management and climate project.

The subjects of the public hearing to be held during the 1:30 p.m. business meeting include the dockets listed below:

1. *Warren County (Pequest River) Municipal Utilities Authority, D-1971-094 CP-4.* An application for renewal of the Belvidere Wastewater Treatment Plant (WWTP). The existing 0.5 million gallon per day (mgd) WWTP will continue to discharge treated effluent to Water Quality Zone 1D of the Delaware River at River Mile 197.0. The facility is located in White Township, Warren County, New Jersey within the section of the non-tidal Delaware River known as the Lower Delaware, which is classified as Special Protection Waters.

2. *Fleetwood Borough Authority, D-1987-054 CP-3.* An application to renew the approval for discharge of up to 0.7 mgd of treated effluent from existing Outfall No. 001 at the Fleetwood WWTP. The WWTP discharges to Willow Creek at River Mile 92.47-86.7-0.6-6.4 (Delaware River—Schuylkill River—Maiden Creek—Willow Creek), in Richmond Township, Berks County, Pennsylvania.

3. *Village of Monticello, D-1981-038 CP-2.* An application to approve modifications to the existing 3.1 mgd Monticello WWTP. Modifications include retrofit of three sequencing batch reactors (SBR) in the facility's two existing oxidation ditches and a stormwater retention basin; converting one of the existing clarifiers to an aerobic digester and the other to an equalization basin; and converting sludge lagoon No. 2 into reed beds. Outfall No. 001 will continue to discharge to Tannery Brook, a tributary of the Neversink River at River Mile 253.64-27.3-1.91-3.24-1.54 (Delaware River—Neversink River—Sheldrake Stream—Kiamesha Creek—Tannery Brook). The project is located within the Village of Monticello, Sullivan County, New York in the drainage area of the section of the non-tidal Delaware River known as the Middle Delaware, which is classified as Special Protected Waters.

4. *Lake Adventure Community Association, D-1993-062 CP-2.* An application for approval to modify the treatment process of the existing 0.16 mgd Lake Adventure WWTP from extended aeration to a sequencing batch reactor (SBR). The WWTP will continue to discharge to an unnamed tributary of Shohola Creek at River Mile 273.2-13.25-0.91 (Delaware River—Shohola Creek—UNT), within the drainage area of the section of the non-tidal Delaware River known as the Upper Delaware, which is classified as Special Protection

Waters. The WWTP is located in Dingman Township, Pike County, Pennsylvania.

5. *Superior Water Company, D-2001-015 CP-3.* An application for approval of an existing groundwater withdrawal (GWD) project to increase an individual well allocation and continue to supply up to 36.82 million gallons per month (mgm) of water to the applicant's public water supply system from 10 existing wells. The applicant requests that the individual allocation for Well No. SWC-8 be increased from 2.2 mgm to 6.7 mgm. The current individual well allocation is below historic use and is inadequate to meet typical peak demands. The project is located in the Brunswick and Lockatong Formations in the Zacharias, Scioto, and Minister Creeks watersheds in Douglass, New Hanover, Upper Frederick, and Worcester townships in Montgomery County, Pennsylvania, within the Southeastern Pennsylvania GWPA.

6. *NuStar Asphalt Refining, LLC, D-2001-027-3.* An application for renewal of a surface water withdrawal (SWWD) project to supply up to 7.79 mgm of surface water from existing Intakes Nos. 1 and 2 for the applicant's industrial processes, heating, and fire emergency testing. Intake No. 2 was added to the facility in July 2004, a modification that was not reflected in Docket No. D-2001-027-1, the most recent Commission approval for the project. The applicant's pending application was the subject of a previous notice as Docket No. D-2003-021-2. No increase in the applicant's water allocation is proposed. The project intakes withdraw water from the tidal portion of Mantua Creek in the Mantua Creek Watershed in the Borough of Paulsboro, Gloucester County, New Jersey.

7. *Superior Tube Company, D-1996-013-2.* An application for approval of a combined surface and groundwater withdrawal project to continue to supply up to 13.4 mgm of water to the applicant's industrial facility from 11 existing wells and a surface water intake located in Perkiomen Creek. The previous docket approval expired on April 21, 2008. The project wells are located in the Brunswick Formation in Lower Providence Township, Montgomery County, Pennsylvania.
