[Docket No. FAA-2010-0936; Airspace Docket No. 10-AEA-23]

**Amendment of Class E Airspace and Revocation of Class E Airspace; Easton, MD**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action amends Class E surface airspace and airspace 700 feet above the surface, and removes Class E airspace designated as an extension to Class D airspace at Easton, MD. The Easton Non-Directional Beacon (NDB) has been decommissioned and new Standard Instrument Approach Procedures (SIAPs) have been developed for Easton Airport/Newnam Field. This action enhances the safety and airspace management of Instrument Flight Rules (IFR) operations at the airport.

**DATES:** Effective 0901 UTC, May 5, 2011. The Director of the Federal Register approves this incorporation by reference

action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

**SUPPLEMENTARY INFORMATION:****History**

On October 22, 2010, the FAA published in the **Federal Register** a notice of proposed rulemaking to amend Class E surface airspace and airspace 700 feet above the surface, and remove Class E airspace designated as an extension to Class D airspace at Easton, MD (75 FR 65250) Docket No. FAA-2010-0936. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9U dated August 18, 2010, and effective September 15, 2010, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 amends the Class E surface airspace and Class E airspace extending upward from 700 feet above the surface to accommodate new SIAPs developed for Easton Airport/Newnam Field, Easton, MD, as the Easton NDB has been decommissioned. This eliminates the need for Class E airspace designated as an extension to Class D surface area, and, therefore, will be removed for the continued safety and management of IFR operations at the airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic

procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends Class E airspace at Easton, MD.

The Class E airspace designations listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 amends Class E airspace extending upward from 700 feet above the surface at Charleston, WV, to accommodate new standard instrument approach procedures developed at Yeager Airport. This action is necessary for the safety and management of IFR operations at the airports.
