## **NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES**

### **National Endowment for the Arts; Public Availability of the National Endowment for the Arts' FY 2010 Service Contract Inventory**

**AGENCY:** National Endowment for the Arts.

**ACTION:** Notice.

**SUMMARY:** In accordance with Section 743 of Division C of the Consolidated Appropriations Act of 2010 (Pub. L. 111-117), the National Endowment for the Arts is publishing this notice to advise the public of the availability of its FY 2010 Service Contract inventory. This inventory provides information on service contract actions over \$25,000 that were made in FY 2010. The information is organized by function to show how contracted resources are distributed throughout the Agency. The inventory has been developed in accordance with guidance issued on November 5, 2010 by the Office of Management and Budget's Office of Federal Procurement Policy (OFPP). OFPP's guidance is available at <http://www.whitehouse.gov/sites/default/files/omb/procurement/memo/service-contract-inventories-guidance-11052010.pdf>. The National Endowment for the Arts has posted its inventory and a summary of the inventory on its Web site at the following link: <http://www.arts.gov/about/Commercial/index.html>.

**FOR FURTHER INFORMATION CONTACT:** Questions regarding the service contract inventory should be directed to Ned

Read in the Office of the Deputy Chairman for Management and Budget at 202-682-5782 or [readn@arts.gov](mailto:readn@arts.gov).

Dated: February 23, 2011.

**Kathy Plowitz-Worden,**  
*Office of Guidelines and Panel Operations,  
National Endowment for the Arts.*

## **NUCLEAR REGULATORY COMMISSION**

**[NRC-2011-0046]**

### **Draft Regulatory Guide: Issuance, Availability**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of Issuance and Availability of Draft Regulatory Guide, DG-1254, "Qualification of Connection Assemblies for Nuclear Power Plants."

#### **FOR FURTHER INFORMATION CONTACT:**

Satish Aggarwal, U. S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-251-7627 or e-mail: [Satish.Aggarwal@nrc.gov](mailto:Satish.Aggarwal@nrc.gov).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Introduction**

The U.S. Nuclear Regulatory Commission (NRC or Commission) is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), entitled "Qualification of Connection Assemblies for Nuclear Power Plants," is temporarily identified by its task number, DG-1254, which should be mentioned in all related correspondence. DG-1254 is proposed Revision 1 of Regulatory Guide 1.156, dated November 1987.

This guide describes a method that the NRC considers acceptable for complying with the Commission's regulations on the environmental qualification of connection assemblies and environmental seals in combination with cables or wires as assemblies for service in nuclear power plants. The environmental qualification helps ensure that connection assemblies can

perform their safety functions during and after a design-basis event.

Title 10 of the Code of Federal Regulations, Part 50, "Domestic Licensing of Production and Utilization Facilities" (10 CFR Part 50), Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," Criterion III, "Design Control," requires, in part, that test programs used to verify the adequacy of specific design features include suitable qualification testing of a prototype unit under the most adverse design conditions.

In 10 CFR 50.49, "Environmental Qualification of Electric Equipment Important to Safety for Nuclear Power Plants," the NRC requires that certain electric equipment important to safety be qualified for its application and specified performance. The regulation also identifies requirements for establishing environmental qualification methods and qualification parameters.

##### **II. Further Information**

The NRC staff is soliciting comments on DG-1254. Comments may be accompanied by relevant information or supporting data and should mention DG-1254 in the subject line. Comments submitted in writing or in electronic form will be made available to the public in their entirety through the NRC's Agencywide Documents Access and Management System (ADAMS).

Comments would be most helpful if received by April 27, 2011. Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

**ADDRESSES:** You may submit comments by any one of the following methods. Please include Docket ID NRC-2011-0046 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site [Regulations.gov](http://Regulations.gov). Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their
