

substances that can be used to support the first two steps (hazard identification and dose-response evaluation) of the risk assessment process. When supported by available data, IRIS provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic noncancer health effects as well as assessments of potential carcinogenic effects resulting from chronic exposure. Combined with specific exposure information, government and private entities use IRIS to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.

This data call-in is a step in the IRIS process. As literature searches are completed, the results will be posted on the IRIS Web site (<http://www.epa.gov/iris>). The public is invited to review the literature search results and submit additional information to EPA.

Request for Public Involvement in IRIS Assessments

EPA is soliciting public involvement in assessments on the IRIS agenda. While EPA conducts a thorough literature search for each chemical substance, there may be unpublished studies or other primary technical sources that are not available through the open literature. EPA would appreciate receiving scientific information from the public during the information gathering stage for the assessments listed in this notice or any other assessments on the IRIS agenda. Interested persons may provide scientific analyses, studies, and other pertinent scientific information. While EPA is primarily soliciting information on new assessments, the public may submit information on any chemical substance at any time.

EPA is announcing the availability of additional literature searches on the IRIS Web site (<http://www.epa.gov/iris>). The public is invited to review the literature search results and submit additional information to EPA. Literature searches are now available for cobalt (CAS No. 7440-48-4) and inorganic cobalt compounds, vanadium pentoxide (CASRN 1314-62-1), vinyl acetate (108-05-4), and Libby Amphibole asbestos at <http://www.epa.gov/iris> under "IRIS Agenda and Literature Searches." The literature search for Libby Amphibole asbestos encompasses publicly available and peer reviewed literature that is specific to Libby Amphibole asbestos, rather than general asbestos, in an effort to support the development of an IRIS human health assessment specific for Libby Amphibole asbestos (CASRN 1332-21-4). Instructions on how to submit information are provided below under General Information.
