SUPPLEMENTARY INFORMATION:

I. Abstract

This information collection pertains to volunteers who contribute their time to conduct frog call surveys at assigned survey routes that are part of the North American Amphibian Monitoring Program. Volunteers use an on-line data entry system to submit their data. This information is used by scientists and federal, state, and local agencies to monitor amphibian populations and detect population trends. Responses are voluntary. Please go to: <http://www.pwrc.usgs.gov/naamp> for more information about the NAAMP.

II. Data

OMB Control Number: 1028-0078.

Title: North American Amphibian Monitoring Program (NAAMP).

Type of Request: Extension of a currently approved collection.

Affected Public: General public; individual households.

Respondent Obligation: Voluntary.

Frequency of Collection: 3 times per year.

Estimated Number of Annual Responses: 1,700.

Annual Burden Hours: 5,100 hours. We estimate an average of 3 hours per response. This includes driving time to and from the survey route locations; listening periods at each sampling station; and data entry.

Estimated Reporting and Recordkeeping "Non-Hour Cost"

Burden: The estimated non-hour cost for this collection includes: A thermometer (a one-time cost per respondent) and mileage. The thermometer is needed to record air temperature during the survey. The cost of such thermometers is approximately \$15. The total operational costs consist of a mileage estimate in accomplishing a survey, calculated by using the mileage reimbursement rate of \$0.50 cents per mile (as used in travel reimbursement for federal employees) times 15 miles

(the approximate distance of a calling survey route), for a total of \$7.50 per survey.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number.

III. Request for Comments

We are soliciting comments as to: (a) Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) how to enhance the quality, usefulness, and clarity of the information to be collected; and (d) how to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.
