**SUPPLEMENTARY INFORMATION:** Section 1605 of the Recovery Act requires that no appropriated funds may be used for the construction, alteration, maintenance, or repair of a public building or public work unless all of the iron, steel, and manufactured goods used in the project are produced in the United States, or unless a waiver is granted by the head of the Federal department or agency. A waiver may be granted if the head of the Federal department or agency determines that one of three exceptions applies: (1) The application of Section 1605 requirements would be inconsistent with the public interest; (2) the iron, steel, or relevant manufactured good is not produced in the United States in sufficient and reasonably available quantities and of satisfactory quality; or (3) the cost of domestic iron, steel or relevant manufactured goods will increase the cost of the overall project by more than 25 percent.

In accordance with Section 1605(c) of the Recovery Act, the Senior Center Contracting Official (SOCO) 772d ESS/PK has determined that the above items of manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality.

The domestic nonavailability determination for these products is based on extensive market research and thorough investigation of the domestic manufacturing landscape. This research identified that these products are manufactured almost exclusively in China.
