The AC21 will meet in Washington, DC, up to four (4) times per year.

Membership: Under the AC21 Charter, members of the AC21 will be knowledgeable in one or more of the following areas: recombinant-DNA (rDNA) research and applications using plants; rDNA research and applications using animals; rDNA research and applications using microbes; food science; silviculture and related forest science; fisheries science; ecology; veterinary medicine; the broad range of farming or agricultural practices; weed science; entomology; nematology; plant pathology; biodiversity; applicable laws and regulations relevant to agricultural biotechnology policy; risk assessment; consumer advocacy and public attitudes; public health/epidemiology; ethics, including bioethics; human medicine; biotechnology industry activities and structure; intellectual property rights systems; and international trade. Members will be selected by the Secretary of Agriculture in order to achieve a balanced representation of viewpoints to address effectively USDA biotechnology policy issues under consideration.

One specific focus will be on mechanisms that might be employed to help the market balance risks and rewards in different production sectors. Accordingly, Committee membership will concentrate on areas most relevant to those deliberations.
