SUPPLEMENTARY INFORMATION:

Extension of Comment Period

On October 19, 2010 (75 FR 64412), MSHA published a proposed rule, Lowering Miners’ Exposure to Respirable Coal Mine Dust, Including Continuous Personal Dust Monitors. In response to requests from interested parties, MSHA is extending the comment period from February 28, 2011, to May 2, 2011. In support of their requests, commenters noted the comprehensive, extensive nature of the proposal. All comments and supporting documentation must be received or postmarked by May 2, 2011.

Request for Comments

MSHA solicits comments from the mining community on all aspects of the proposed rule.

MSHA is interested in commenters’ views on what actions should be taken by MSHA and the mine operator when a single shift respirable dust sample meets or exceeds the Excessive Concentration Value (ECV). In this situation, if operators use a CPDM, what alternative actions to those contained in the proposed rule would you suggest that MSHA and the operator take? MSHA is particularly interested in alternatives to those in the proposal and how such alternatives would be protective of miners.

Clarification

A commenter at the first public hearing suggested that the timeframe for miners’ review of the Continuous Personal Dust Monitor (CPDM) Performance Plan be expanded. For clarification, MSHA, in developing the proposed rule, relied on the timeframe and process in the existing requirements for mine ventilation plans. In the proposal, MSHA did not intend to change the existing timeframe and process and stated that the proposed rule is consistent with ventilation plan requirements and would allow miners’ representatives the opportunity to meaningfully participate in the process.

Dated: January 10, 2011.

Joseph A. Main,

Assistant Secretary of Labor for Mine Safety and Health.
