

over the last year in refining the prioritization process. These include the need for more preliminary information on candidate drugs (for example, information on frequency of use and frequency of condition) as well as expert input, a better approach for mass outreach, enhancement of NIH interagency collaborations, and improvement in the overall prioritization process.

The revised process includes:

- A Well-defined process, using a systematic approach with clear objectives and outcomes;
- Well-defined objective criteria that are mutually exclusive and of a manageable number;
- A dynamic process, including transparency, stakeholder input, and leadership; and
- Expert involvement to inform and contribute to the process.

For 2010, NIH solicited nominations for the BPCA Priority List of Needs in Pediatric Therapeutics through a "Request for Information" (RFI) announcement as part of NIH's authority and responsibility to establish the program for pediatric drug testing and development outlined in the BPCA legislation. The BPCA Priority List consists of key therapeutic needs in the medical treatment of children and adolescents. The list is organized by Therapeutic Area, which can be a group of conditions, a subgroup of the population, or a setting of care. Each calendar year, a few Therapeutic Areas are selected for discussion and further prioritization. Below is a summary of the revised BPCA prioritization process:

- In early 2010, the RFI was issued to solicit nominations for future studies of pediatric therapeutics under the BPCA.

- The Obstetric and Pediatric Pharmacology Branch of the NICHD received 107 nominations, 67 of which met the criteria for review.

- All nominations were reviewed and evaluated on six key criteria, as follows:

- Relevance to BPCA Mission and Goals
 - No disqualifying ethical concerns
 - Evidence: consideration of the level of evidence available and current gaps
 - Impact: potential effect on children, society, and delivery of care
 - Population: consideration of the different populations that may benefit from the research
 - Feasibility: consideration of the resources available to conduct the study
 - Twenty-two volunteer health professional evaluators scored the 67 nominations according to evidence, impact, and the pediatric population affected. Each nomination was reviewed by a panel of three evaluators.

- Therapeutic Area working groups (several Therapeutic Areas are determined annually) were developed and met through the 2010 year to discuss the gaps in knowledge in the therapeutic approaches to diseases in gastroenterology, endocrinology, and neurology.

- Minutes of all working group meetings conducted under the BPCA can be found on the BPCA Web site, <http://bpca.nichd.nih.gov>.

- As a final step in the process, the NICHD, with input from the FDA, ranked the nominations based on the evaluators' scores, quality and quantity of existing studies, and feasibility of the proposed study. The result was a tiered list of nominations considered for listing. Tier One represents the highest percentage of scores: nominations of interest to the NICHD for prioritization. Tier Two represents the average percentage of scores: nominations of possible interest to the NICHD at a later time. Tier Three represents the lowest percentage of scores: Nominations of least interest to the NICHD at this time for prioritization.

The NICHD sponsored the annual BPCA prioritization meeting, held November 9–10, 2010, with stakeholders from the NIH, the FDA, the American Academy of Pediatrics, other pediatric organizations and societies, and patient advocates. The meeting allowed the NICHD to review the present progress from ongoing research and to discuss the proposed Therapeutic Areas from the 2010 nominations to be prioritized for future study under the BPCA and added to the existing BPCA priority list.

Below is an updated list of Therapeutic Areas and drugs that have been prioritized for study since the inception of the BPCA. It includes new areas of prioritization from Tier One nominations of the 2010 outreach and a summary of the NICHD's plans and progress in all these areas.

Priority List of Needs in Pediatric Therapeutics 2011

In accordance with the BPCA legislation, the list outlines priority needs in pediatric therapeutics for multiple Therapeutic Areas listed below. The priority list can be found on the BPCA Web site at the following address: <http://bpca.nichd.nih.gov>
