SUPPLEMENTARY INFORMATION:

Title: Highway Bridge and National Bridge Inspection Programs previously titled National Bridge Inspection Standards.

OMB Control #: 2125-0501.

Background: The Highway Bridge and National Bridge Inspection Programs require bridge inspection and reporting at regular intervals for all highway bridges greater than 20 feet in length located on public roads. Title 23, U.S.C.,

Section 144 defines the Highway Bridge Program. Title 23, U.S.C., Section 151 defines the National Bridge Inspection Program. They are further defined in regulation, 23 CFR 650 C, National Bridge Inspection Standards, and 23 CFR 650 D, Highway Bridge Program. Inspections of fracture critical bridges and underwater inspections are also required at prescribed intervals. The bridge inspection information that is provided to the FHWA on an annual basis is summarized on the Structure Inventory and Appraisal (SI&A) Sheet. The inspection information is used for multiple purposes, including: (1) The determination of the condition of the Nation's bridges; (2) as a basis for setting initial priorities for the replacement or rehabilitation of bridges under the Highway Bridge Program (HBP); and (3) for apportioning HBP funds to the States for bridge replacement or rehabilitation. In order to apportion funds for the HBP, the law requires that a cost to replace or rehabilitate each bridge needs to be determined. In order to determine that cost, the FHWA collects data on new and replaced bridges from the States annually. In addition, the information is used for strategic national defense needs and for preparing an annual report to Congress on the status of the Nation's highway bridges.

Respondents: 52 State highway agencies including the District of Columbia and Puerto Rico, and Federal agencies will be conducting 286,200 inspections.

Estimated Average Burden per Response: The estimated average burden for each inspection is 8 hours. The estimated average burden for each cost collection report is 90 hours. The estimated average burden for follow up on critical findings is 40 hours.

Estimated Total Annual Burden Hours: The annual burden associated with the inspection is 2,289,600 hours. The annual burden associated with the cost report is 4,680 hours. The annual burden associated with follow up on critical findings is 2,080 hours for a combined annual burden of 2,296,360 hours.

Responses =	286,200	
	X	8 hrs
		<u>2,289,600</u>
	+	4,680 90 hours x 52 for unit cost data collection
	+	<u>2,080 40 hours x 52 responses for follow up on critical findings</u>
Burden Hours =		2,296,360
