**SUPPLEMENTARY INFORMATION:** The information collected by the FERC-725B, Reliability Standards for Critical Infrastructure Protection (OMB Control No. 1902-0248), is required to

implement the statutory provisions of section 215 of the Federal Power Act (FPA) (16 U.S.C. 824o). On January 18, 2008, the Commission issued order 706, approving eight Critical Infrastructure Protection (CIP) Reliability Standards submitted by the North American Electric Reliability Corporation (NERC) for Commission approval.<sup>1</sup>

The CIP Reliability Standards require certain users, owners, and operators of the Bulk-Power System to comply with specific requirements to safeguard critical cyber assets.<sup>2</sup> These standards help protect the nation's Bulk-Power System against potential disruptions from cyber attacks.<sup>3</sup> The CIP Reliability Standards include one actual reporting requirement and several recordkeeping requirements. Specifically, CIP-008-1 requires responsible entities to report cyber security incidents to the Electricity Sector-Information Sharing and Analysis Center (ES-ISAC). In addition, the eight CIP Reliability Standards require responsible entities to develop various policies, plans, programs, and procedures.<sup>4</sup>

The CIP Reliability Standards do not require a responsible entity to report to the Commission, ERO or Regional Entities, the various policies, plans, programs and procedures. However, a showing of the documented policies, plans, programs and procedures is required to demonstrate compliance with the CIP Reliability Standards.

**Action:** The Commission is requesting a three-year extension of the existing collection with no changes to the requirements.

**Burden Statement:** The extent of the reporting burden is influenced by the number of identified critical assets and related critical cyber assets pursuant to CIP-002. An entity identifying one or more critical cyber assets, including assets located at remote locations, will likely require more resources to demonstrate compliance with the CIP Reliability Standards compared to an entity that identifies no critical assets. The Commission has developed

<sup>1</sup> CIP-002-1, CIP-003-1, CIP-004-1, CIP-005-1, CIP-006-1, CIP-007-1, CIP-008-1, and CIP-009-1.

<sup>2</sup> In addition, in accordance with section 215(d)(5) of the FPA, the Commission proposed to direct NERC to develop modifications to the CIP Reliability Standards to address specific concerns identified by the Commission.

<sup>3</sup> For a description of the CIP Reliability Standards, see the Critical Infrastructure Protection Section on NERC's Web site at <http://www.nerc.com/page.php?cid=220>.

<sup>4</sup> The October notice issued in this docket contains more information on the reporting requirements and can be found at [http://elibrary.ferc.gov/idmws/File\\_list.asp?document\\_id=13857625](http://elibrary.ferc.gov/idmws/File_list.asp?document_id=13857625). The full text of the standards can be found on NERC's Web site at <http://www.nerc.com/page.php?cid=220>.
