

into one set of criteria. The Operation and Maintenance had additions to evaluate the function of the practice onsite to ensure the purpose(s) is/are achieved.

Residue and Tillage Management, Ridge Till (Code 346)—A new Purpose of “Reduce Energy Use” and accompanying additional Criteria were added. Criteria were added to the Operation and Maintenance section of the standard to evaluate the effectiveness of the practice to achieve the planned Purpose(s).

Residue Management, Seasonal (Code 344)—A new Purpose of “Develop Renewable Energy Systems” and accompanying additional Criteria were added to provide crop residues for biofuel feedstocks and additional criteria to harvest crop residues for biofuel feedstocks for renewable energy production. Where Practice Applies section was revised to include all cropland where biomass is removed for biofuel feedstocks. Additional Operation and Maintenance criteria were added to evaluate the onsite application of the practice to ensure the planned purposes are achieved.

Silvopasture Establishment (Code 381)—A new Purpose of “Develop Renewable Energy Systems” and accompanying additional Criteria were added.

Tree/Shrub Establishment (Code 612)—A new Purpose of “Develop Renewable Energy Systems” and accompanying additional Criteria were added.

Waste Recycling (Code 633)—The title was changed from “Waste Utilization” to “Waste Recycling.” A new Purpose of “Reduce Energy Use” and accompanying Criteria were added. The application is more focused to processing and recycling agriculture waste material into a valuable by-product.

Windbreak/Shelterbelt—Establishment (Code 380)—A new Purpose of “Reduce Energy Use” and accompanying additional Criteria were added.

Woody Residue Treatment (formerly Forest Slash Treatment) (Code 384)—The title was changed from “Forest Slash Treatment” to “Woody Residue Treatment.” A new Purpose of “Develop Renewable Energy Systems” and accompanying additional Criteria were added.

Signed this 4th day of April 2011, in Washington, DC.

Dave White,

Chief, Natural Resources Conservation Service.

BILLING CODE 8610-01-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.
Title: Automated Export System (AES).

OMB Control Number: 0607-0152.
Form Number(s): AES, AESDirect, AESWeblink.

Type of Request: Revision of a currently approved collection.

Burden Hours: 791,607.

Number of Respondents: 288,747.

Average Hours per Response: 3 minutes per AES record.

Needs and Uses: The Census Bureau requires mandatory filing of all export

information via the Automated Export System (AES). This requirement is mandated through Public Law 107-228, of the Foreign Trade Relations Act of 2003. This law authorizes the Secretary of Commerce with the concurrences of the Secretary of State and the Secretary of Homeland Security to require all persons who file export information according to Title 13, United States Code (U.S.C.), Chapter 9, to file such information through the AES.

The AES record provides the means for collecting data on U.S. exports. Title 13, U.S.C., Chapter 9, Sections 301-307, mandates the collection of these data. The regulatory provisions for the collection of these data are contained in the FTR, Title 15, Code of Federal Regulations (CFR), Part 30. The official export statistics collected from these tools provide the basic component for the compilation of the U.S. position on merchandise trade. These data are an essential component of the monthly totals provided in the U.S. International Trade in Goods and Services Press Release, a principal economic indicator and a primary component of the Gross Domestic Product (GDP).

These data collected from the AES record are also used for export control purposes under Title 50, U.S.C., Export Administration Act, to detect and prevent the export of certain items by unauthorized parties or to unauthorized destinations or end users.

The information collected via the AES shows what is being exported (description and commodity classification number), how much is exported (quantity, shipping weight, and value), how it is being exported (mode of transport, exporting carrier, and whether containerized), from where (state of origin and port of export), to where (port of unloading and country of ultimate destination), and when a commodity is exported (date of exportation). The identification of the U.S. Principal Party in Interest (USPPI) shows who is exporting goods for consumption (control purposes), while the USPPI and/or the forwarding or other agent information provides a contact for verification of the information.

The proposed changes will require the addition of new data elements in the AES as well as modifications to current data elements. The fields that will be added/modified are conditional data elements. Therefore, these data elements will only be required if that element applies to the specific shipment being exported. In addition, AES filings will be mandatory for shipments of all used self-propelled vehicles and household
