

Delineators will be used along the perimeter of areas of the roadway where no pipeline was laid and there was a drop-off sufficient for equipment to overturn. Delineators are installed along the perimeter of the impoundment so that, for both directions of travel, the reflective surfaces of at least three delineators along each elevation will always be visible to the driver and spaced at intervals sufficient to indicate the edges and altitude of the roadway; (6) access to the locked gate will be limited to individuals who have received and successfully completed training consisting of applicable task training, and a supervised tour of the impoundment roadway. A training form will be completed for each employee that receives the training and will detail the topics covered in the training. Personnel deemed essential by the petitioner to operate equipment in the area who has not received the training will be accompanied by a person who has received the specified training. Training will be valid for four years from the date of completion; (7) records of the training will be maintained for four years and made available to MSHA upon request; and (8) to enable U.S. Silver to not berm the inside of the impoundment roadway not only prevents a diminution of safety for miners, it provides an alternative method of achieving the results of the standard which at all times guarantees no less than the same measure of protection to all miners at the Galena Mine afforded by the standard.

BILLING CODE 4510-43-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Notice of Withdrawal.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and 30 CFR part 44 govern the application, processing, and disposition of petitions for modification. This notice is to withdraw a petition for modification for the Speed Mining, Inc., American Eagle Mine, MSHA I.D. No. 46-05437. MSHA published a notice in the **Federal**

Register on January 14, 2011 (76 FR 2725).

FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations and Variances at 202-693-9447 (voice), barron.barbara@dol.gov (e-mail), or 202-693-9441 (telefax). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary determines that: (1) An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or (2) that the application of such standard to such mine will result in a diminution of safety to the miners in such mine. In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification. However, petitioner requested a modification of 30 CFR 75.1403-5(g), which is a safeguard and is within the authority of an Authorized Representative of the Secretary to prescribe or modify. See 30 CFR 75.1403-1. Therefore, the Speed Mining, Inc., American Eagle Mine, MSHA I.D. No. 46-05437, Petition for Modification is withdrawn.

Dated: April 12, 2011.
