(2) You will be presumed to have a material Year 2000 problem if, at any time on or after August 31, 1999, you:

(i) Do not have written procedures reasonably designed to identify, assess, and remediate any material Year 2000 problems in your mission critical systems under your control;

(ii) Have not verified your Year 2000 remediation efforts through reasonable internal testing of your mission critical systems under your control and reasonable testing of your external links under your control; or

(iii) Have not remediated all exceptions related to your mission critical systems contained in any independent public accountant's report prepared on your behalf pursuant to §240.17Ad-18(f).

(g) Beginning August 31, 1999, and ending March 31, 2000, you must make backup records for all master securityholder files at the close of each business day and must preserve these backup records for a rolling five business day period in a manner that will allow for the transfer and conversion of the records to a successor transfer agent. If you have a material Year 2000 problem, you must preserve for at least one year the five day backup records immediately preceding the day the problem was discovered. In addition, you must make at the close of business on December 27 through 31, 1999, a backup copy for all master securityholder files and preserve these records for at least one year. Such backup records must permit the timely restoration of such systems to their condition existing prior to experiencing the material Year 2000 problem.
