In addition, he has \$500 of expenses attributable to the services rendered to the occupants of apartments 3 and 4. In determining his net earnings from self-employment, A includes the \$3,600 received from apartments 3 and 4, and the expenses of \$1,100 (\$500 plus one-half of \$1,200) attributable thereto. The rentals and expenses attributable to apartments 1 and 2 are excluded. Therefore, A has \$2,500 of net earnings from self-employment for the taxable year from the building.

(d) *Treatment of business income which includes rentals from real estate.* Except in the case of a real-estate dealer, where an individual or a partnership is engaged in a trade or business the income of which is classifiable in part as rentals from real estate, only that portion of such income which is not classifiable as rentals from real estate, and the expenses attributable to such portion, are included in determining net earnings from self-employment.
