

livelihood. The activity of lecturing, publishing pamphlets, and disseminating his ideas is not an activity engaged in by the taxpayer for profit.

*Example 3.* The taxpayer, very successful in the business of retailing soft drinks, raises dogs and horses. He began raising a particular breed of dogs many years ago in the belief that the breed was in danger of declining, and he has raised and sold the dogs in each year since. The taxpayer recently began raising and racing thoroughbred horses. The losses from the taxpayer's dog and horse activities have increased in magnitude over the years, and he has not made a profit on these operations during any of the last 15 years. The taxpayer generally sells the dogs only to friends, does not advertise the dogs for sale, and shows the dogs only infrequently. The taxpayer races his horses only at the "prestige" tracks at which he combines his racing activities with social and recreational activities. The horse and dog operations are conducted at a large residential property on which the taxpayer also lives, which includes substantial living quarters and attractive recreational facilities for the taxpayer and his family. Since (i) the activity of raising dogs and horses and racing the horses is of a sporting and recreational nature, (ii) the taxpayer has substantial income from his business activities of retailing soft drinks, (iii) the horse and dog operations are not conducted in a businesslike manner, and (iv) such operations have a continuous record of losses, it could be determined that the horse and dog activities of the taxpayer are not engaged in for profit.

*Example 4.* The taxpayer inherited a farm of 65 acres from his parents when they died 6 years ago. The taxpayer moved to the farm from his house in a small nearby town, and he operates it in the same manner as his parents operated the farm before they died. The taxpayer is employed as a skilled machine operator in a nearby factory, for which he is paid approximately \$8,500 per year. The farm has not been profitable for the past 15 years because of rising costs of operating farms in general, and because of the decline in the price of the produce of this farm in particular. The taxpayer consults the local agent of the State agricultural service from time to time, and the suggestions of the agent have generally been followed. The manner in which the farm is operated by the taxpayer is substantially similar to the manner in which farms of similar size, and which grow similar crops in the area, are operated. Many of these other farms do not make profits. The taxpayer does much of the required labor around the farm himself, such as fixing fences, planting crops, etc. The activity of farming could be found, based on all the facts and circumstances, to be engaged in by the taxpayer for profit.

*Example 5.* A, an independent oil and gas operator, frequently engages in the activity of searching for oil on undeveloped and unexplored land which is not near proven fields. He does so in a manner substantially similar to that of others who engage in the same activity. The chances, based on the experience of A and others who engaged in this activity, are strong that A will not find a commercially profitable oil deposit when he drills on land not established geologically to be proven oil bearing land. However, on the rare occasions that these activities do result in discovering a well, the operator generally realizes a very large return from such activity. Thus, there is a small chance that A will make a large profit from his soil exploration activity. Under these circumstances, A is engaged in the activity of oil drilling for profit.

*Example 6.* C, a chemist, is employed by a large chemical company and is engaged in a wide variety of basic research projects for his employer. Although he does no work for his employer with respect to the development of new plastics, he has always been interested in such development and has outfitted a workshop in his home at his own expense which he uses to experiment in the field. He has patented several developments at his own expense but as yet has realized no income from his inventions or from such patents. C conducts his research on a regular, systematic basis, incurs fees to secure consultation on his projects from time to time, and makes extensive efforts to "market" his developments. C has devoted substantial time and expense in an effort to develop a plastic sufficiently hard, durable, and malleable that it could be used in lieu of sheet steel in many major applications, such as automobile bodies. Although there may be only a small chance that C will invent new plastics, the return from any such development would be so large that it induces C to incur the costs of his experimental work. C is sufficiently qualified by his background that there is some reasonable basis for his experimental activities. C's experimental work does not involve substantial personal or recreational aspects and is conducted in an effort to find practical applications for his work. Under these circumstances, C may be found to be engaged in the experimental activities for profit.

[T.D. 7198, 37 FR 13683, July 13, 1972]

**§ 1.183-3 Election to postpone determination with respect to the pre-emption described in section 183(d). [Reserved]**

**§ 1.183-4 Taxable years affected.**

The provisions of section 183 and the regulations thereunder shall apply only with respect to taxable years beginning

## § 1.186-1

26 CFR Ch. I (4-1-01 Edition)

after December 31, 1969. For provisions applicable to prior taxable years, see section 270 and § 1.270-1.

[T.D. 7198, 37 FR 13685, July 13, 1972]

### § 1.186-1 Recoveries of damages for antitrust violations, etc.

(a) *Allowance of deduction.* Under section 186, when a compensatory amount which is included in gross income is received or accrued during a taxable year for a compensable injury, a deduction is allowed in an amount equal to the lesser of (1) such compensatory amount, or (2) the unrecovered losses sustained as a result of such compensable injury.

(b) *Compensable injury—(1) In general.* For purposes of this section, the term *compensable injury* means any of the injuries described in subparagraph (2), (3), or (4) of this paragraph.

(2) *Patent infringement.* An injury sustained as a result of an infringement of a patent issued by the United States (whether or not issued to the taxpayer or another person or persons) constitutes a compensable injury. The term *patent issued by the United States* means any patent issued or granted by the United States under the authority of the Commissioner of Patents pursuant to 35 U.S.C. 153.

(3) *Breach of contract or of fiduciary duty or relationship.* An injury sustained as a result of a breach of contract (including an injury sustained by a third party beneficiary) or a breach of fiduciary duty or relationship constitutes a compensable injury.

(4) *Injury suffered under certain antitrust law violations.* An injury sustained in business, or to property, by reason of any conduct forbidden in the antitrust laws for which a civil action may be brought under section 4 of the Act of October 15, 1914 (15 U.S.C. 15), commonly known as the Clayton Act, constitutes a compensable injury.

(c) *Compensatory amount—(1) In general.* For purposes of this section, the term, *compensatory amount* means any amount received or accrued during the taxable year as damages as a result of an award in, or in settlement of, a civil action for recovery for a compensable injury, reduced by any amounts paid or incurred in the taxable year in securing such award or settlement. The

term *compensatory amount* includes only amounts compensating for actual economic injury. Thus, additional amounts representing punitive, exemplary, or treble damages are not included within the term. Where, for example, a taxpayer recovers treble damages under section 4 of the Clayton Act, only one-third of the recovery representing economic injury constitutes a compensatory amount. In the absence of any indication to the contrary, amounts received in settlement of an action shall be deemed to be a recovery for an actual economic injury except to the extent such settlement amounts exceed actual damages claimed by the taxpayer in such action.

(2) *Interest on a compensatory amount.* Interest attributable to a compensatory amount shall not be included within the term *compensatory amount*.

(3) *Settlement of a civil action for damages—(i) Necessity for an action.* The term *compensatory amount* does not include an amount received or accrued in settlement of a claim for a compensable injury if the amount is received or accrued prior to institution of an action. An action shall be considered as instituted upon completion of service of process, in accordance with the laws and rules of the court in which the action has been commenced or to which the action has been removed, upon all defendants who pay or incur an obligation to pay a compensatory amount.

(ii) *Specifications of the parties.* If an action for a compensable injury is settled, the specifications of the parties will generally determine compensatory amounts unless such specifications are not reasonably supported by the facts and circumstances of the case. For example, the parties may provide that the sum of \$1,000 represents actual damages sustained as the result of antitrust violations and that the total amount of the settlement after the trebling of damages is \$3,000. In such case, only the sum of \$1,000 would be a compensatory amount. In the absence of specifications of the parties, the complaint filed by the taxpayer may be considered in determining what portion of the amount of the settlement is a compensatory amount.
