

§ 41.4483-1

26 CFR Ch. I (4-1-01 Edition)

not a private roadway. Thus, for purposes of the tax, there is no use of a highway motor vehicle while the vehicle is in "dead storage". The term "use" does not include operation of a new highway motor vehicle on a public highway in the United States if such operation is merely for the purpose of transporting the vehicle from the point of manufacture or assembly to the consumer, whether direct or with intermediate deliveries to such points as are involved in the distribution process. For example, operation of a new vehicle for the purpose of delivering it from the factory to a branch establishment of the manufacturer, or from the factory or branch establishment to a dealer, distributor, or consumer, does not constitute use of the vehicle within the meaning of the regulations in this part; likewise, the further operation of the vehicle by a dealer or distributor for the purpose of delivering the vehicle to a consumer does not constitute use of the vehicle. Similarly, the operation of a secondhand highway motor vehicle by a dealer or distributor for the purpose of delivering the vehicle to a purchaser does not constitute use of the vehicle within the meaning of the regulations in this part. Furthermore, the term "use" does not include operation of a new or secondhand highway motor vehicle, if such operation is exclusively for the purpose of demonstration of the vehicle by a dealer in, or distributor of, new or secondhand highway motor vehicles. Operation of a highway motor vehicle on a private roadway, or other private property, does not constitute use of the vehicle within the meaning of the regulations in this part.

(d) *Customarily used.* A semitrailer or trailer is treated as *customarily used* in connection with a highway motor vehicle if the vehicle is equipped to tow the semitrailer or trailer.

[T.D. 7409, 41 FR 9877, Mar. 8, 1976, as amended by T.D. 7505, 42 FR 42856, Aug. 25, 1977; T.D. 8027, 50 FR 21248, May 23, 1985; T.D. 8159, 52 FR 33584, Sept. 4, 1987; T.D. 8879, 65 FR 17154, Mar. 31, 2000]

§ 41.4483-1 State exemption.

Use of a highway motor vehicle by a State is exempt from the tax imposed by section 4481. For this purpose, the term *use by a State* means the operation

by a State on the public highways in the United States of any highway motor vehicle, whether or not such highway motor vehicle is owned by the State.

[T.D. 8879, 65 FR 17154, Mar. 31, 2000]

§ 41.4483-2 Exemption for certain transit-type buses.

(a) *In general.* Use in any taxable period, or part thereof, of any bus of the transit type by any person who is engaged in the operation of a transit system is exempt from the tax, if such person meets the 60-percent passenger fare revenue test provided for in paragraph (e) of this section, for the applicable period prescribed in paragraph (c) of this section as the test period for such person for such system for such taxable period, or part thereof.

(b) *Buses of the transit type.* The term "transit type", when used in the regulations in this part with reference to a bus, means the type of bus which is designed for the mass transportation of persons within an urban area, as distinguished from the intercity-type bus. A transit-type bus is ordinarily distinguishable from an intercity-type bus by comparison of seats, doors, and baggage facilities. The transit-type bus usually has straight-back seats of the bench type, while the intercity-type bus generally has seats which either can be reclined or are in fact permanently fixed in a reclining position. The transit-type bus is more likely to have an accordion or folding-type door at the front of the bus, and often has a second door in the middle or at the rear for passengers to leave the bus, as opposed to the emergency-type rear door which may or may not be included in the intercity-type bus. The typical transit-type bus does not have facilities for storing baggage whereas the typical intercity-type bus has facilities for storing baggage in a compartment underneath the floor of the bus or in overhead racks, or both. Other characteristics which may be taken into account in distinguishing a transit-type bus from an intercity-type bus include gear ratios, acceleration and maximum speed, and aisle space for standees. The transit-type bus ordinarily has a lower gear ratio to provide for quick starts and because, in general, buses of this
