#### § 707.7 Payment of dividends.

(a) *Permissible methods—(1) Balance on which dividends are calculated.* Credit unions shall calculate dividends on the full amount of principal in an account for each day by use of either the daily balance method or the average daily balance method. Credit unions shall calculate dividends by use of a daily rate of at least  $\frac{1}{365}$  of the dividend rate. In a leap year a daily rate of  $\frac{1}{366}$  of the dividend rate may be used.

(2) *Determination of minimum balance to earn dividends.* A credit union shall use the same method to determine any minimum balance required to earn dividends as it uses to determine the balance on which dividends are calculated. A credit union may use an additional method that is unequivocally beneficial to the member.

(b) *Compounding and crediting policies.* This section does not require credit unions to compound or credit dividends at any particular frequency.

(c) *Date dividends begin to accrue.* Dividends shall begin to accrue not later than the day specified in section 606 of the Expedited Funds Availability Act (12 U.S.C. 4005) and implementing Regulation CC (12 CFR part 229). Dividends shall accrue on funds until the day funds are withdrawn.

The word “profit” shall not be used in referring to interest paid on an account.

(b) *Permissible rates.* If an advertisement states a rate of return, it shall state the rate as an “annual percentage yield,” using that term. (The abbreviation “APY” may be used provided the term “annual percentage yield” is stated at least once in the advertisement.) The advertisement shall not state any other rate, except that the “dividend rate,” using that term, may be stated in conjunction with, but not more conspicuously than, the annual percentage yield to which it relates.

(c) *When additional disclosures are required.* Except as provided in paragraph (e) of this section, if the annual percentage yield is stated in an advertisement, the advertisement shall state

For dividend-bearing accounts other than term share accounts, a statement that the annual percentage yield is accurate as of the last dividend declaration date. In the event that disclosure of an annual percentage yield as of the last dividend declaration date might be inaccurate because of known or contemplated dividend rate changes, the credit union may disclose the prospective annual percentage yield. Such prospective annual percentage yield may be disclosed either in lieu of, or in addition to, the dividend rate and annual percentage yield as of the last dividend declaration date.

#### **APPENDIX A TO PART 707—ANNUAL PERCENTAGE YIELD CALCULATION**

The annual percentage yield (APY) measures the total amount of dividends a credit union pays on an account based on the dividend rate and the frequency of compounding. The annual percentage yield is expressed as an annualized rate, based on a 365-day year. (Credit unions may calculate the annual percentage yield based on a 365-day or a 366-day year in a leap year.) Part I of this appendix discusses the annual percentage yield calculations for account disclosures and adver-

tisements, while Part II discusses annual percentage yield earned calculations for statements. The annual percentage yield reflects only dividends and does not include the value of any bonus, as that term is defined in part 707, that may be provided to the member to open, maintain, increase or renew an account. Dividends, interest or other earnings are not to be included in the annual percentage yield if such amounts are determined by circumstances that may or may not occur in the future. These formulas apply to both dividend-bearing and interest-bearing accounts held by credit unions.

#### **PART I. ANNUAL PERCENTAGE YIELD FOR ACCOUNT DISCLOSURES AND ADVERTISING PURPOSES**

In general, the annual percentage yield for account disclosures under §§ 707.4 and 707.5 and for advertising under § 707.8 is an annualized rate that reflects the relationship between the amount of dividends that would be earned by the member for the term of the account and the amount of principal used to calculate those dividends. The amount of dividends that would be earned may be projected based on the most recent past declared rate or an anticipated future rate, whichever the credit union judges to most reasonably approximate the dividends to be earned. Special rules apply to accounts with tiered and stepped dividend rates, and to certain term share accounts with a stated maturity greater than 1 year.

##### *A. General Rules*

Except as provided in Part I. E. of this appendix, the annual percentage yield shall be calculated by the formula shown below. Credit unions may calculate the annual percentage yield using projected dividends based on either the rate at the last dividend declaration date or the rate anticipated at a future date. The credit union must disclose whichever option it uses to members. Credit unions shall calculate the annual percentage yield based on the actual number of days for the term of the account. For accounts without a stated maturity date (such as a typical share or share draft account), the calculation shall be based on an assumed term of 365 days. In determining the total dividends figure to be used in the formula, credit unions shall assume that all principal and dividends remain on deposit for the entire term, and that no other transactions (deposits or withdrawals) occur during the term. (This assumption shall not be used if a credit union requires, as a condition of the account, that members withdraw dividends during the term. In such a case, the dividends (and annual percentage yield calculation) shall reflect that requirement.) For term share accounts that are offered in multiples of months, credit unions may base the number
