

## Agricultural Marketing Service, USDA

## § 1001.7

prior to the first day of July preceding the effective date of the system. The plants included in the system shall be listed in the sequence in which they shall qualify for pool plant status based on the minimum deliveries required. If the deliveries made are insufficient to qualify the entire system for pooling, the last listed plant shall be excluded from the system, followed by the plant next-to-last on the list, and continuing in this sequence until remaining listed plants have met the minimum shipping requirements; and

(2) Each plant that qualifies as a pool plant within a system shall continue each month as a plant in the system through the following July unless the plant subsequently fails to qualify for pooling, the handler submits a written notification to the market administrator prior to the first day of the month that the plant be deleted from the system, or that the system be discontinued. Any plant that has been so deleted from the system, or that has failed to qualify as a pool plant in any month, will not be part of the system for the remaining months through July. For any system that qualifies in August, no plant may be added in any subsequent month through the following July unless the plant replaces another plant in the system that has ceased operations and the market administrator is notified of such replacement prior to the first day of the month for which it is to be effective.

(g) The applicable shipping percentages of paragraphs (c) and (f) of this section may be increased or decreased by the market administrator if the market administrator finds that such adjustment is necessary to encourage needed shipments or to prevent uneconomic shipments. Before making such a finding, the market administrator shall investigate the need for adjustment either on the market administrator's own initiative or at the request of interested parties if the request is made in writing at least 15 days prior to the month for which the requested revision is desired effective. If the investigation shows that an adjustment of the shipping percentages might be appropriate, the market administrator shall issue a notice stating that an adjustment is being considered and invite

data, views and arguments. Any decision to revise an applicable shipping percentage must be issued in writing at least one day before the effective date.

(h) The term pool plant shall not apply to the following plants:

(1) A producer-handler plant;

(2) An exempt plant as defined in §1000.8(e);

(3) A plant qualified pursuant to paragraph (a) of this section that is located within the marketing area if the plant also meets the pooling requirements of another Federal order and more than 50 percent of its route distribution has been in such other Federal order marketing area for 3 consecutive months;

(4) A plant qualified pursuant to paragraph (a) of this section which is not located within any Federal order marketing area that meets the pooling requirements of another Federal order and has had greater route disposition in such other Federal order's marketing area for 3 consecutive months;

(5) A plant qualified pursuant to paragraph (a) of this section that is located in another Federal order marketing area if the plant meets the pooling requirements of such other Federal order and does not have a majority of its route distribution in this marketing area for 3 consecutive months or if the plant is required to be regulated under such other Federal order without regard to its route disposition in any other Federal order marketing area;

(6) A plant qualified pursuant to paragraph (c) of this section which also meets the pooling requirements of another Federal order and from which greater qualifying shipments are made to plants regulated under the other Federal order than are made to plants regulated under the order in this part, or the plant has automatic pooling status under the other Federal order; and

(7) That portion of a pool plant designated as a "nonpool plant" that is physically separate and operated separately from the pool portion of such plant. The designation of a portion of a regulated plant as a nonpool plant must be requested in writing by the handler and must be approved by the market administrator.
