

naturally in the aquaculture facility. Disaster benefits under this subpart are limited to aquacultural species that were planted or seeded on property owned or leased by the producer where that land has readily identifiable boundaries, and over which the producer has total control of the waterbed and the ground under the waterbed. Producers who only have control over a column of water will not be eligible for disaster benefits under this subpart.

(d) For ornamental nursery crops, disaster benefits under this subpart are limited to ornamental nursery crops that were grown in a container or controlled environment for commercial sale on property owned or leased by the producer, and cared for and managed using good nursery growing practices. Indigenous crops are not eligible for benefits under this subpart.

(e) For Christmas trees, disaster benefits under this subpart are limited to losses which exceed 35 percent of the value of the Christmas trees present at the time of the disaster. Christmas tree producers seeking disaster assistance under this subpart must provide acreage data, dates of plantings and the quantity of trees planted on each date.

§ 1477.210 Other specialty crops.

(a) Other special provisions to assess losses and calculate disaster assistance under this subpart apply to the following crops and such other crops as may be identified in instructions issued by the Deputy Administrator: turfgrass sod, honey and maple sap.

(b) For turfgrass sod, disaster benefits under this subpart are limited to turfgrass sod which would have matured and been harvested during 1998, when a disaster caused in excess of 35 percent of the expected production to die.

(c) For honey, disaster benefits under this subpart are limited to table and nontable honey produced commercially for human consumption. For calculating benefits, all honey is considered a single crop, regardless of type or variety of floral source or intended use.

(d) For maple sap, disaster benefits under this subpart are limited to maple sap produced on private property in a controlled environment by a commercial operator for sale as sap or syrup.

The maple sap must be produced from trees that are: located on land the producer controls by ownership or lease; managed for production of maple sap; and are at least 30 years old and 12 inches in diameter.

Subpart C—Multi-Year Crop Loss Disaster Assistance Program

§ 1477.300 Multi-year crop losses.

(a) The disaster benefits under this subpart, the 1998 Crop Loss Disaster Assistance Program Multi-year Losses, will be equal to 25 percent of the producer's previous loss payments for the qualifying losses if the producer received:

(1) Crop insurance indemnity payments for crop losses on insured crops under the RMA-administered program, excluding replanting or raisin reconditioning payments; or

(2) Payments from the Non-insured Crop Disaster Assistance Program for multi-year crop losses, including any 1994 ad hoc disaster payment of a non-insurable crop.

(b) In order to receive benefits under this subpart, the producer must have received (a)(1) or (a)(2) in at least 3 of the 5 crop years running from 1994 through 1998 and only such losses shall be considered qualifying losses for purposes of paragraph (a) of this section.

(c) For multi-year eligibility based on crop insurance indemnity payments, RMA will determine the producers that meet the eligibility requirements along with indemnity amounts and pass the data to FSA.

(d) For NAP multi-year eligibility, FSA will determine eligible producers. Because the multi-year payments are based on payments previously received, area loss provisions apply.

(e) For purposes of paragraph (a) of this section, the "Federal loss payments" shall only be those payments which were received for qualifying losses under the programs identified in paragraphs (a)(1) and (a)(2) of this section. In addition, benefits under this part will be permitted only where the qualifying losses were suffered by the identical producers, as determined
