

Subpart B—Determination Of Acreage and Compliance

§ 718.101 Measurements.

(a) Measurement services include, but are not limited to, measuring land and crop areas, quantities of farm-stored commodities, and appraising the yields of crops when required for program administration purposes. The county committee shall provide measurement service if the producer requests such service and pays the cost, except that service shall not be provided to determine total acreage of a crop when the request is made:

(1) After the established final reporting date for the applicable crop except as provided in § 718.103;.

(2) After the farm operator has furnished the county office production evidence when required for program administration purposes except as provided in this subpart; or

(3) In connection with a late-filed report of acreage, unless there is evidence of the existence and use made of the crop, the lack of the crop or a disaster condition affecting the crop.

(b) The acreage requested to be measured by staking and referencing shall not exceed the effective farm allotment for marketing quota crops or acreage of a crop that is limited to a specific number of acres to meet any program requirement.

(c) When a producer requests, pays for, and receives written notice that measurement services have been furnished, the measured acreage shall be guaranteed to be correct and used for all program purposes for the current year even though an error is later discovered in the measurement thereof, if the producer has taken action with an economic significance based on the measurement service, and the entire crop required for the farm was measured. If the producer has not taken action with an economic significance based on the measurement service, the producer shall be notified in writing that an error was discovered and the nature and extent of such error. In such cases, the corrected acreage will be used for determining program compliance for the current year.

(d) When a measurement service reveals acreage in excess of the per-

mitted acreage by more than the allowable tolerance, the producer must destroy the excess acreage and pay for an authorized employee of FSA to verify destruction, in order to keep the measurement service guarantee.

§ 718.102 Acreage reports.

(a) In order to be eligible for benefits, participants in the programs specified in paragraph (b)(1) through (3) of this section and those who are subject to the regulations cited in paragraph (b)(4) and (5) of this section must submit accurate information as required by these provisions.

(b)(1) Participants in the program authorized by part 1412 of this title must report the acreage of fruits and vegetables planted for harvest on a farm enrolled in such program;

(2) Participants in the programs authorized by parts 1421 and 1427 of this title must report the acreage planted to a commodity for harvest for which a marketing assistance loan or loan deficiency payment is requested; and

(3) Participants in the programs authorized by parts 704 and 1410 of this title must report the use of the land enrolled in such programs;

(4) Participants in the programs authorized by parts 723 and 1464 of this title (except burley tobacco producers) must report the acreage planted to tobacco by kind (except burley tobacco) on all farms that have an effective allotment or quota greater than zero; and

(5) Participants in the programs authorized by parts 729 and 1446 of this title must report the acreage planted to peanuts by type.

(c) The reports required under paragraph (a) of this section shall be timely filed by the farm operator, farm owner, or a duly authorized representative with the county committee by the final reporting date applicable to the crop as established by the county committee and State committee.

(d) Peanut producers shall provide the county office evidence of disposition of any peanuts that are kept on the farm, including:

(1) Type and quantity for use for seed on any farm in which the producer has an interest; and

(2) Type, quantity, names, and addresses of purchases for peanuts sold or given to others.

(e) Peanut producers shall provide the county office information for acquisition of seed peanuts from other sources, including:

(1) Name and address of person who sold or gave producer the peanuts;

(2) Type, farmer's stock or shelled basis, and quantity; and

(3) Acquisition date.

§ 718.103 Late-filed reports.

(a) A farm operator's report may be accepted after the established date for reporting if evidence is still available for inspection which may be used to make a determination with respect to the existence and use made of the crop, the lack of the crop or a disaster condition affecting the crop.

(b) The farm operator shall pay the cost of a farm visit by an authorized FSA employee unless the County Committee has determined that failure to report in a timely manner was beyond the producer's control.

§ 718.104 Revised reports.

(a) The farm operator may revise a report of acreage with respect to 1996 and subsequent years to change the acreage reported if the county committee determines that the revision does not have an adverse impact on the program and the acreage has not already been determined by FSA.

(b) Revised reports shall be filed and accepted:

(1) At any time for all crops if evidence exists for inspection and determination of the existence and use made of the crop, the lack of the crop, or a disaster condition affecting the crop; and

(2) If the requirements of paragraph (a) have been met and the producer was in compliance with all other program requirements by the applicable established crop reporting date.

§ 718.105 Tolerances, variances, and adjustments for tobacco and peanuts.

(a) Tolerance or variance for tobacco and peanuts is the amount by which the determined acreage may differ from the reported acreage or allotment

and still be considered in compliance with program requirements. Tolerance or variance for tobacco is the amount by which the determined acreage may differ from the reported acreage or allotment and still be considered in compliance with program requirements.

(b) Tolerance rules apply to those fields for which a staking and referencing was performed but such acreage was not planted according to those measurements or when a measurement service is not requested for acreage destroyed to meet program requirements. Tolerance rules do not apply to:

(1) Official fields when the entire field is devoted to one crop;

(2) Those fields for which staking and referencing was performed and such acreage was planted according to those measurements; or

(3) The adjusted acreage for farms using measurement after planting which have a determined acreage greater than the marketing quota crop allotment.

(c) An administrative variance is applicable to all marketing quota crop acreages. Marketing quota crop acreages as determined in accordance with this part shall be deemed in compliance with the effective farm allotment or program requirement when the determined acreage does not exceed the effective farm allotment by more than an administrative variance determined as follows:

(1) For all kinds of tobacco subject to marketing quotas, except dark air-cured and fire-cured the larger of 0.1 acre or 2 percent of the allotment; and

(2) For dark air-cured and fire-cured tobacco, an acreage based on the effective acreage allotment as provided in the table as follows:

Effective acreage allotment is within this range	Administrative variance
0.01 to 0.99	0.01
1.00 to 1.49	0.02
1.50 to 1.99	0.03
2.00 to 2.49	0.04
2.50 to 2.99	0.05
3.00 to 3.49	0.06
3.50 to 3.99	0.07
4.00 to 4.49	0.08
4.50 and up	0.09

(d) A tolerance applies to tobacco other than flue-cured or burley, if the
