### § 929.107 Basis for determining cranberry acreage.

(a) To be classified as cranberry acreage pursuant to section 929.48, all such acreage must be producing cranberries on a commercial basis or planted, in accordance with order provisions, so as to produce cranberries on a commercial basis. Commercial crop is synonymous with commercial basis and shall mean acreage that has a sufficient density of growing vines to show that such acreage can produce a commercial crop of at least 50 barrels per acre without replanting or renovation of any kind.

(b) So that the committee may properly identify cranberry acreage, the grower shall furnish, upon request, on forms furnished by the committee, information sufficient for the committee to establish that such grower is the grower for the acreage involved. It shall be the responsibility of the committee to determine by physical inspection or other means whether there is sufficient vine density as to qualify as "cranberry acreage" in accordance with paragraph (a) of this section. In making such determination, the committee shall be guided by standards of comparison between the potential bog and existing bogs in the same area.

(c) If the determination were that all or part of the acreage eligible under paragraph (a) of this section does not have sufficient vine coverage to produce 50 barrels per acre, that portion without sufficient vine coverage will not qualify as cranberry acreage under this section. In the event only a portion of an acreage has sufficient vine population and density to produce 50 barrels of cranberries per acre, such portion will qualify as cranberry acreage pursuant to this section. Since such qualified portion of the acreage would be eligible for a sales history, it must be definitely and permanently delineated.

(d) It shall be the responsibility of the grower to maintain adequate sales
