

monument, which can be readily recognized and recovered. The station number and plus distance to the point of intersection with a line of the public-land surveys should be ascertained and noted, together with the course and distance along the section line to the nearest existing corner, at a sufficient number of points throughout the township to permit accurate platting of the relative position of the right-of-way to the public-land survey.

(4) If the right-of-way is across or within lands which are not covered by the public-land surveys, the map shall be made in terms of the boundary survey of the land to the extent it would be required above to be made in terms of the public-land surveys.

(5) All subdivisions of the public-land surveys within the limits of the survey should be shown in their entirety, based upon the official subsisting plats, with the subdivisions, section, township, and range clearly marked.

(6) The width of the canal, ditch, or lateral at high-water line should be given and the width of all other rights-of-way shall be given. If the width is not uniform, the location and amount of the change in width must be definitely shown. In the case of a pipeline, the diameter of the line should be given. The total distance of the right-of-way on the Federal lands shall be stated.

(7) Each copy of the map should bear upon its face a statement of the engineer who made the survey and the certificate of the applicant. The statement and certificate referred to are embodied in Forms 1 and 2 (Appendix A) which are made a part hereof and which should be modified so as to be appropriate to the act invoked and the nature of the project.

(8) Whenever it is found that a public land survey monument or reservation boundary monument will be destroyed or rendered inaccessible by reason of the proposed development, at least two permanent marked witness monuments should be established at suitable points, preferably on the surveyed lines. A brief description of the witness monuments and the connecting courses and distances to the original corners should be shown.

(b) *Evidence of water right.* If the project involves the storage, diversion, or conveyance of water, the applicant must file a statement of the proper State official, or other evidence, showing that he has a right to the use of the water. Where the State official requires an applicant to obtain a right-of-way as a prerequisite to the issuance of evidence of a water right, if all else be regular, a right-of-way may be granted conditioned only upon the applicant's filing the required evidence of water right from the State official within specified reasonable time. The conditional right-of-way will terminate at the expiration of the time allowed.

**§ 14.26 Payment required; exceptions; default; revision of charges.**

(a) Except as provided in paragraphs (b) and (c) of this section, the charge for use and occupancy of lands under the regulations of this part will be the fair market value of the permit, right-of-way, or easement, as determined by appraisal by the authorized officer. Periodic payments or a lump-sum payment, both payable in advance, will be required at the discretion of such officer: (1) When periodic payments are required, the applicant will be required to make the first payment before the permit, right-of-way, or easement will be issued; (2) upon the voluntary relinquishment of such an instrument before the expiration of its term, any payment made for any unexpired portion of the term will be returned to the payer upon a proper application for repayment to the extent that the amount paid covers a full permit, right-of-way, or easement year or years after the formal relinquishment: *Provided*, That the total rental received and retained by the Government for that permit, right-of-way, or easement, shall not be less than \$25. The amount to be so returned will be the difference between the total payments made and the value of the expired portion of the term calculated on the same basis as the original payments.

(b) Except as provided in paragraph (c) of this section, the charge for use and occupancy of lands under the regulations of this part shall not be less than \$25 per five-year period for any

## § 14.27

permit, right-of-way, or easement issued.

(c) No charge will be made for the use and occupancy of lands under the regulations of this part:

(1) Where the use and occupancy are exclusively for irrigation projects, municipally operated projects, or non-profit or Rural Electrification Administration projects, or where the use is by a Federal governmental agency.

(2) Where the permit, right-of-way, or easement is granted under the regulations in Subpart D.

(d) If a charge required by this section is not paid when due, and such default shall continue for 30 days after notice, action may be taken to cancel the permit, right-of-way, or easement. After default has occurred, structures, buildings, or other equipment may be removed from the servient lands except upon written permission first obtained from the authorized officer.

(e) At any time not less than five years after either the grant of the permit, right-of-way, or easement or the last revision of charges thereunder, the authorized officer, after reasonable notice and opportunity for hearing, may review such charges and impose such new charges as may be reasonable and proper commencing with the ensuing charge year.

(f) The provisions of this section shall not have the effect of changing, modifying, or amending the rental rates or charges imposed for existing water power projects under rights-of-way previously approved by this Department.

## § 14.27 Application and use procedure.

### § 14.28 Incomplete application and reports.

Where an application is incomplete or not in conformity with the law or regulations the authorized officer may, in his discretion, (1) notify the applicant of the deficiencies and provide the applicant with an opportunity to correct the deficiencies; or (2) the authorized officer may reject the application.

### § 14.29 Timely construction.

(a) Unless otherwise provided by law, a period of up to five years from the date a right-of-way is granted is al-

## 36 CFR Ch. I (7-1-01 Edition)

lowed for completion of construction. Within 90 days after completion of construction or after all restoration stipulations have been complied with, whichever is later, proof of construction, on forms approved by the Director, shall be submitted to the authorized officer.

(b) The time for filing proof of construction may be extended by the authorized officer, unless prohibited by law, upon a satisfactory showing of the need therefor and the filing of a progress report, demonstrating that due diligence toward completion of the project is being exercised, for reasonable lengths of time not to exceed a total of ten years from the date of issuance of the right-of-way.

### § 14.30 Nonconstruction, abandonment or nonuse.

Unless otherwise provided by law, rights-of-way are subject to cancellation by the authorized officer for failure to construct within the period allowed and for abandonment or nonuse.

### § 14.31 Deviation from approved right-of-way.

No deviation from the location of an approved right-of-way shall be undertaken without the prior written approval of the authorized officer. The authorized officer may require the filing of an amended application in accordance with §14.20 wherein the authorized officer's judgment the deviation is substantial.

### § 14.32 Revocation or cancellation.

### § 14.33 Order of cancellation.

All rights-of-way approved pursuant to this part, shall be subject to cancellation for the violation of any of the provisions of this part applicable thereto or for the violation of the terms or conditions of the right-of-way. No right-of-way shall be deemed to be cancelled except on the issuance of a specific order of cancellation.

### § 14.34 Change in jurisdiction over lands.

A change in jurisdiction over the lands from one Federal agency to another will not cancel a right-of-way involving such lands. It will however,
