

the value of the single trust and an inclusion ratio of zero, but only if the election is made prior to June 24, 1996. If the executor makes the transitional election, the other separate trust, having a value of 75% of the value of the single trust and an inclusion ratio of one, is not treated as subject to the reverse QTIP election.

*Example 3. Denominator of the applicable fraction of QTIP trust.* T bequeaths \$1,500,000 to a trust in which T's surviving spouse, S, receives an income interest for life. Upon the death of S, the property is to remain in trust for the benefit of C, the child of T and S. Upon C's death, the trust is to terminate and the trust property paid to the descendants of C. The bequest qualifies for the estate tax marital deduction under section 2056(b)(7) as QTIP. The executor does not make the reverse QTIP election under section 2652(a)(3). As a result, S becomes the transferor of the trust at S's death when the value of the property in the QTIP trust is included in S's gross estate under section 2044. For purposes of computing the applicable fraction with respect to the QTIP trust upon S's death, the denominator of the fraction is reduced by any Federal estate tax (whether imposed under section 2001, 2101 or 2056A(b)) and State death tax attributable to the trust property that is actually recovered from the trust.

#### § 26.2653-1 Taxation of multiple skips.

(a) *General rule.* If property is held in trust immediately after a GST, solely for purposes of determining whether future events involve a skip person, the transferor is thereafter deemed to occupy the generation immediately above the highest generation of any person holding an interest in the trust immediately after the transfer. If no person holds an interest in the trust immediately after the GST, the transferor is treated as occupying the generation above the highest generation of any person in existence at the time of the GST who then occupies the highest generation level of any person who may subsequently hold an interest in the trust. See § 26.2612-1(e) for rules determining when a person has an interest in property held in trust.

(b) *Examples.* The following examples illustrate the provisions of this section:

*Example 1. T transfers property to an irrevocable trust for the benefit of T's grandchild, GC, and great-grandchild, GGC.* During GC's life, the trust income may be distributed to GC and GGC in the trustee's absolute discretion. At GC's death, the trust property passes to GGC. Both GC and GGC have an in-

terest in the trust for purposes of chapter 13. The transfer by T to the trust is a direct skip, and the property is held in trust immediately after the transfer. After the direct skip, the transferor is treated as being one generation above GC, the highest generation individual having an interest in the trust. Therefore, GC is no longer a skip person and distributions to GC are not taxable distributions. However, because GGC occupies a generation that is two generations below the deemed generation of T, GGC is a skip person and distributions of trust income to GGC are taxable distributions.

*Example 2. T transfers property to an irrevocable trust providing that the income is to be paid to T's child, C, for life.* At C's death, the trust income is to be accumulated for 10 years and added to principal. At the end of the 10-year accumulation period, the trust income is to be paid to T's grandchild, GC, for life. Upon GC's death, the trust property is to be paid to T's great-grandchild, GGC, or to GGC's estate. A GST occurs at C's death. Immediately after C's death and during the 10-year accumulation period, no person has an interest in the trust within the meaning of section 2652(c) and § 26.2612-1(e) because no one can receive current distributions of income or principal. Immediately after C's death, T is treated as occupying the generation above the generation of GC (the trust beneficiary in existence at the time of the GST who then occupies the highest generation level of any person who may subsequently hold an interest in the trust). Thus, subsequent income distributions to GC are not taxable distributions.

#### § 26.2654-1 Certain trusts treated as separate trusts.

(a) *Single trust treated as separate trusts—(1) Substantially separate and independent shares—(i) In general.* If a single trust consists solely of substantially separate and independent shares for different beneficiaries, the share attributable to each beneficiary (or group of beneficiaries) is treated as a separate trust for purposes of chapter 13. The phrase "substantially separate and independent shares" generally has the same meaning as provided in § 1.663(c)-3 of this chapter. However, a portion of a trust is not a separate share unless such share exists from and at all times after the creation of the trust. For purposes of this paragraph (a)(1), a trust is treated as created at the date of death of the grantor if the trust is includible in its entirety in the grantor's gross estate for Federal estate tax purposes. Further, treatment of a single trust as
