

§ 382.40a

(2) Carriers who do not operate aircraft with more than a 19-seat capacity shall ensure that those personnel involved in providing boarding assistance are trained to proficiency in the use of the boarding assistance equipment used by the carrier and appropriate boarding assistance procedures that safeguard the safety and dignity of passengers.

[Amdt. 6, 61 FR 56423, Nov. 1, 1996]

§ 382.40a Boarding assistance for large aircraft.

(a) Paragraphs (b) and (c) of this section apply to air carriers conducting passenger operations with aircraft having a seating capacity of 31 or more passengers at airports with 10,000 or more annual enplanements, in any situation where passengers are not boarded by level-entry loading bridges or accessible passenger lounges.

(b) Carriers shall, in cooperation with the airports they serve, provide boarding assistance to individuals with disabilities using mechanical lifts, ramps, or other suitable devices that do not require employees to lift or carry passengers up stairs.

(c)(1) Each carrier that does not provide passenger boarding by level-entry loading bridges or accessible passenger lounges shall negotiate in good faith with the airport operator at each airport concerning the acquisition and use of boarding assistance devices. The carrier(s) and the airport operator shall, by no later than March 4, 2002, sign a written agreement allocating responsibility for meeting the boarding assistance requirements of this section between or among the parties. The agreement shall be made available, on request, to representatives of the Department of Transportation.

(2) The agreement shall provide that all actions necessary to ensure accessible boarding for passengers with disabilities are completed as soon as practicable, but no later than December 4, 2002. All air carriers and airport operators involved are jointly responsible for the timely and complete implementation of the agreement.

(3) Under the agreement, carriers may require that passengers wishing to receive boarding assistance requiring the use of a lift for a flight check in for

14 CFR Ch. II (1-1-02 Edition)

the flight one hour before the scheduled departure time for the flight. If the passenger checks in after this time, the carrier shall nonetheless provide the boarding assistance by lift if it can do so by making a reasonable effort, without delaying the flight.

(4) Level-entry boarding assistance under the agreement is not required with respect to float planes or with respect to any widebody aircraft determined by the Department of Transportation to be unsuitable for boarding assistance by lift, ramp, or other device on the basis that no existing boarding assistance device on the market will accommodate the aircraft without a significant risk of serious damage to the aircraft or injury to passengers or employees.

(5) When level-entry boarding assistance is not required to be provided under paragraph (c)(4) of this section, or cannot be provided as required by paragraphs (b) and (c) of this section (e.g., because of mechanical problems with a lift), boarding assistance shall be provided by any available means to which the passenger consents, except hand-carrying as defined in §382.39(a)(2).

(6) The agreement shall ensure that all lifts and other accessibility equipment are maintained in proper working condition.

(d) The training of carrier personnel required by §382.61 shall include, for those personnel involved in providing boarding assistance, training to proficiency in the use of the boarding assistance equipment used by the carrier and appropriate boarding assistance procedures that safeguard the safety and dignity of passengers.

[Doc. No. 1999-6159, 66 FR 22115, May 3, 2001]

§ 382.41 Stowage of personal equipment.

(a) All stowage of qualified individuals with a disability's wheelchairs and other equipment covered by this part in aircraft cabins shall be in accordance with 14 CFR 121.589 and 14 CFR 121.285(c) or 14 CFR 135.87, as applicable.

(b) Carriers shall permit qualified individuals with a disability using personal ventilators/respirators to bring
