

Food and Nutrition Service, USDA

§ 275.16

necessary for the development of appropriate corrective action. In these situations, the State agency shall be responsible for gathering additional data necessary to make these determinations. This action may include, but is not limited to, conducting additional full or partial ME reviews in one or more project areas/management units or discussions with appropriate officials.

(e) Deficiencies identified from all management information sources must be analyzed and evaluated together to determine their causes, magnitude, and geographic extent. Causes indicated and deficiencies identified must be examined to determine if they are attributable to a single cause and can be effectively eliminated by a single action. Deficiencies and causes identified must also be compared to the results of past corrective action efforts to determine if the new problems arise from the causal factors which contributed to the occurrence of previously identified deficiencies.

(f) Data analysis and evaluation must be an ongoing process to facilitate the development of effective and prompt corrective action. The process shall also identify when deficiencies have been eliminated through corrective action efforts, and shall provide for the reevaluation of deficiencies and causes when it is determined that corrective action has not been effective.

(g) *Identification of High Error Project Areas/Counties/Local Offices.* FNS may use quality control information to determine which project areas/counties/local offices have reported payment error rates that are either significantly greater than the State agency average or greater than the national error standard of the Program. When FNS notifies a State agency that a “high error” area exists, the State agency shall ensure that corrective action is developed and reported in accordance with the provisions of §275.17. If FNS identifies a “high error” locality which a State agency has previously identified as error-prone and taken appropriate action, no further State agency shall be required. If a State agency’s corrective action plan fails to address problems in FNS-identified “high error” areas, FNS may require a State

agency to implement new or modified cost-effective procedures for the certification of households.

[Amdt. 160, 45 FR 15909, Mar. 11, 1980, as amended by Amdt. 266, 52 FR 3409, Feb. 4, 1987; Amdt. 320, 55 FR 6240, Feb. 22, 1990]

Subpart E—Corrective Action

§ 275.16 Corrective action planning.

(a) Corrective action planning is the process by which State agencies shall determine appropriate actions to reduce substantially or eliminate deficiencies in program operations and provide responsive service to eligible households.

(b) The State agency and project area(s)/management unit(s), as appropriate, shall implement corrective action on all identified deficiencies. Deficiencies requiring action by the State agency or the combined efforts of the State agency and the project area(s)/management unit(s) in the planning, development, and implementation of corrective action are those which:

(1) Result from evaluation of yearly targets (actions to correct errors in individual cases however, shall not be submitted as part of the State agency’s corrective action plan);

(2) Are the cause for non-entitlement to enhanced funding for any reporting period (actions to correct errors in individual cases however, shall not be submitted as part of the State agency’s corrective action plan);

(3) Are the causes of other errors/deficiencies detected through quality control, including error rates of 1 percent or more in negative cases (actions to correct errors in individual cases, however, shall not be submitted as part of the State agency’s corrective action plan);

(4) Are identified by FNS reviews, GAO audits, contract audits, or USDA audits or investigations at the State agency or project area level (except deficiencies in isolated cases as indicated by FNS); and,

(5) Result from 5 percent or more of the State agency’s QC sample being coded “not complete” as defined in §275.12(g)(1) of this part. This standard shall apply separately to both active and negative samples.

§ 275.17

7 CFR Ch. II (1-1-02 Edition)

(6) Result in under issuances, improper denials, or improper terminations of benefits to eligible households where such errors are caused by State agency rules, practices or procedures.

(c) The State agency shall ensure that appropriate corrective action is taken on all deficiencies including each case found to be in error by quality control reviews and those deficiencies requiring corrective action only at the project area level. Moreover, when a substantial number of deficiencies are identified which require State agency level and/or project area/management unit corrective action, the State agency and/or project area/management unit shall establish an order of priority to ensure that the most serious deficiencies are addressed immediately and corrected as soon as possible. Primary factors to be considered when determining the most serious deficiencies are:

- (1) Magnitude of the deficiency as defined in § 275.15(c)(3) of this part;
- (2) Geographic extent of the deficiency (e.g., Statewide/project area or management unit);
- (3) Anticipated results of corrective actions; and
- (4) High probability of errors occurring as identified through all management evaluation sources.

(d) In planning corrective action, the State agency shall coordinate actions in the areas of data analysis, policy development, quality control, program evaluation, operations, administrative cost management, civil rights, and training to develop appropriate and effective corrective action measures.

[Amdt. 160, 45 FR 15909, Mar. 11, 1980, as amended by Amdt. 169, 46 FR 7263, Jan. 23, 1981; Amdt. 262, 49 FR 50598, Dec. 31, 1984; Amdt. 266, 52 FR 3409, Feb. 4, 1987; Amdt. 328, 56 FR 60052, Nov. 27, 1991]

§ 275.17 State corrective action plan.

(a) State agencies shall prepare corrective action plans addressing those deficiencies specified in § 275.16(b) requiring action by the State agency or the combined efforts of the State agency and the project area(s)/management unit(s). This corrective action plan is an open-ended plan and shall remain in effect until all deficiencies in program

operations have been reduced substantially or eliminated. State agencies shall provide updates to their corrective action plans through regular, semiannual updates. These semiannual updates shall be received by FNS by May 1st and November 1st respectively. Such updates must contain:

- (1) Any additional deficiencies identified since the previous corrective action plan update;
- (2) Documentation that a deficiency has been corrected and is therefore being removed from the plan; and
- (3) Any changes to planned corrective actions for previously reported deficiencies.

(b) *Content.* State corrective action plans shall contain, but not necessarily be limited to, the following, based on the most recent information available:

- (1) Specific description and identification of each deficiency;
- (2) Source(s) through which the deficiency was detected;
- (3) Magnitude of each deficiency, if appropriate, as defined in § 275.15(c)(3) of this part;
- (4) Geographic extent of the deficiency (e.g., Statewide/project area or management unit—specific project areas in which the deficiency occurs);
- (5) Identification of causal factor(s) contributing to the occurrence of each deficiency;
- (6) Identification of any action already completed to eliminate the deficiency;

(7) For each deficiency, an outline of actions to be taken, the expected outcome of each action, the target date for each action, and the date by which each deficiency will have been eliminated; and

(8) For each deficiency, a description of the manner in which the State agency will monitor and evaluate the effectiveness of the corrective action in eliminating the deficiency.

(c) FNS will provide technical assistance in developing corrective action plans when requested by State agencies.

(d) State agencies will be held accountable for the efficient and effective operation of all areas of the program. FNS is not precluded from issuing a warning as specified in part 276 because
