

(d) *Department not responsible for damage.* The treatment for grapes from Australia prescribed in the Plant Protection and Quarantine Treatment Manual is judged from experimental tests to be safe. However, the Department assumes no responsibility for any damage sustained through or in the course of such treatment.

[55 FR 25953, June 26, 1990]

§ 319.56-2i Administrative instructions prescribing treatments for mangoes from Central America, South America, and the West Indies.

(a) *Authorized treatments.* Treatment with an authorized treatment listed in the Plant Protection and Quarantine Treatment Manual will meet the treatment requirements imposed under § 319.56-2 as a condition for the importation into the United States of mangoes from Central America, South America, and the West Indies. The Plant Protection and Quarantine Treatment Manual is incorporated by reference. For the full identification of this standard, see § 300.1 of this chapter, "Materials incorporated by reference."

(b) *Department not responsible for damage.* The treatments for mangoes prescribed in the Plant Protection and Quarantine Treatment Manual are judged from experimental tests to be safe. However, the Department assumes no responsibility for any damage sustained through or in the course of such treatment.

[65 FR 37669, June 15, 2000]

§ 319.56-2j Conditions governing the entry of apples and pears from Australia (including Tasmania) and New Zealand.²

Apples and pears from Australia (including Tasmania) and New Zealand may be imported only in accordance with § 319.56-2(e) (2) or (3) and under permit and in compliance with this section and the other requirements of this subpart.

(a) *Conditions of entry—(1) Statistical sample inspection.* A biometrically de-

² Apples and pears from Australia (excluding Tasmania) where certain tropical fruit flies occur are also subject to the cold treatment requirements of § 319.56-2d.

signed statistical sample will be taken under § 319.56-6 by the inspector of the plant protection and quarantine programs from each shipment³ of apples and each shipment of pears moved from New Zealand or Australia (including Tasmania), that are offered for entry into the United States and, if inspection of such sample discloses that pests of the family Tortricidae (fruit-leaf roller complex) which are dangerous and destructive pests of apples and pears are not present in the shipment sampled and the shipment therefore does not present a risk of introducing such pest, such fruit may be imported under § 319.56-2(e)(2) without treatment as prescribed in paragraph (a)(2) of this section. If any such pests are found on such inspection the shipment must be treated as prescribed in paragraph (a)(2) of this section.

(2) *Approved fumigation.* Fumigation with methyl bromide in accordance with procedures described in this section is effective against certain insect pests of the family Tortricidae found in Australia (including Tasmania) and New Zealand. Accordingly, this treatment is required as a condition of entry under § 319.56-2(e)(3) for any shipment of apples or pears required to be treated under paragraph (a)(1) of this section.

The fruit may be fumigated in normal atmospheric chambers, under tarpaulins, in van trucks or other enclosures that have been approved for that purpose by an inspector of the plant protection and quarantine programs. When the fumigation is carried out, it must be accomplished in a manner satisfactory to the inspector to insure adequate air and commodity temperatures, and proper volatilization, distribution, and concentration of the fumigant, for effective destruction of all such pests present. Apples and pears to be fumigated may be packed in wooden crates, fiberboard cartons, or other gas-permeable containers. The fruit must be packed so as to provide for

³A shipment is defined as all of a type (genus) of fruit from the same country of origin offered at a U.S. port and from a single carrier, regardless of marks and numbers, growers' lots, Customs entries, or numbers of importers involved.
