

§ 634.27

32 CFR Ch. V (7-1-02 Edition)

(4) Maintaining an aggressive program to detect and apprehend persons who drive while privileges are suspended or revoked.

(5) Using sound discretion and judgment in deciding when to apprehend, issue citations, or warn the offender.

(b) Selective enforcement will be used when practical. Selective enforcement deters traffic violations and reduces accidents by the presence or suggested presence of law enforcement personnel at places where violations, congestion, or accidents frequently occur. Selective enforcement applies proper enforcement measures to traffic congestion and focuses on selected time periods, conditions, and violations that cause accidents. The military services use selective enforcement because that practice is the most effective use of resources.

(c) Enforcement activities against intoxicated driving will include—

(1) Detecting, apprehending, and testing persons suspected of driving under the influence of alcohol or drugs.

(2) Training law enforcement personnel in special enforcement techniques.

(3) Enforcing blood-alcohol concentration standards. (See §634.34.)

(4) Denying installation driving privileges to persons whose use of alcohol or other drugs prevents safe operation of a motor vehicle.

(d) Installation officials will formally evaluate traffic enforcement at least once a year. That evaluation will examine procedures to determine if the following elements of the program are effective in reducing traffic accidents and deaths:

(1) Selective enforcement measures.

(2) Suspension and revocation actions.

(3) Chemical breath-testing programs.

§ 634.27 Speed-measuring devices.

Speed-measuring devices will be used in traffic control studies and enforcement programs. Signs may be posted to indicate speed-measuring devices are being used.

(a) *Equipment purchases.* Installations located in States having a formal training and certification program will purchase the same brand and model of

equipment used by the State and will ensure operators attend an appropriate training program. Otherwise, equipment in appropriate Service or DLA tables of allowances will be used.

(b) *Training and certification standards.* (1) The commander of each installation using traffic radar will ensure that personnel selected as operators of such devices meet training and certification requirements prescribed by the States in which the installation is located. Specific information on course dates, costs, and prerequisites for attending may be obtained by contacting the State agency responsible for police traffic radar training.

(2) Installation commanders located in States or overseas areas where no formal training program exists, or where the military personnel are unable or ineligible to participate in police traffic radar training programs, may implement their own training program or use a selected civilian institution or manufacturer's course.

(3) The objective of the civilian or manufacturer-sponsored course is to improve the effectiveness of speed enforcement through the proper and efficient use of speed-measurement radar. On successful completion, the course graduate must be able to—

(i) Describe the association between excessive speed and accidents, deaths, and injuries, and describe the traffic safety benefits of effective speed control.

(ii) Describe the basic principles of radar speed measurement.

(iii) Identify and describe the Service's policy and procedures affecting radar speed measurement and speed enforcement.

(iv) Identify the specific radar instrument used and describe the instrument's major components and functions.

(v) Demonstrate basic skills in calibrating and operating the specific radar instrument(s).

(vi) Demonstrate basic skills in preparing and presenting records and courtroom testimony relating to radar speed measurement and enforcement.

(c) *Recertification.* Recertification of operators will occur every 3 years.
