area compared to the national average. The GPCIs reflect the full variation from the national average in the costs of practice expenses and malpractice insurance, but only one-quarter of the difference in area costs for physician work. The general formula calculating the Medicare fee schedule amount for a given service in a given fee schedule area can be expressed as: Payment = [(RVUwork × GPCIwork) + (RVUpractice expense × GPCIpractice expense) + (RVUmalpractice × GPCImalpractice)] × CF.

(c) Payment under the 75th percentile methodology is determined for each VA medical facility by ranking all occurrences (with a minimum of eight) under the corresponding code during the previous fiscal year with charges ranked from the highest rate billed to the lowest rate billed and the charge falling at the 75th percentile as the maximum amount to be paid.

(d) Payments made in accordance with this section shall constitute payment in full. Accordingly, the provider or agent for the provider may not impose any additional charge for any services for which payment is made by VA.

(e) Notwithstanding other provisions of this section, VA, for physician services covered by this section, will pay the lesser of the amount determined under paragraphs (a) through (d) of this section or the amount negotiated with the physician or the physician's agent.
