

Relocation Allowances

§ 302-7.12

§ 302-7.7 May the origin and destination points be other than that prescribed in § 302-7.6?

Yes, shipments may originate or terminate at any location; however, your reimbursement is limited to the cost of transporting the property in one lot from the authorized origin to the authorized destination.

§ 302-7.8 Is there a time limit for the temporary storage of an authorized HHG shipment?

The initial period of temporary storage at Government expense shall not exceed 90 days in connection with any authorized HHG shipment. The HHG may be placed in temporary storage at origin, in transit, at destination, or any combination thereof. However, upon your written request, an additional 90 days may be authorized by the designated agency official. In no case may the maximum time limit for temporary storage exceed 180 days.

§ 302-7.9 What are some reasons that would justify the additional storage beyond the initial 90-day limit?

Reasons for justifying temporary storage beyond the initial 90-day limit include, but are not limited to:

- (a) An intervening temporary duty or long-term training assignment;

- (b) Non-availability of suitable housing;

- (c) Completion of residence under construction;

- (d) Serious illness of employee or illness or death of a dependent;

- (e) Strikes, acts of God, or other circumstances beyond the control of the employee; or

- (f) Similar reasons.

§ 302-7.10 Is property acquired en route eligible for transportation at Government expense?

No, property acquired en route will not be eligible for transportation at Government expense.

§ 302-7.11 What is the Government's liability for loss or damage to HHG?

The Government's liability for loss or damage to HHG is determined by your agency under title 31 U.S.C. 3721-3723 and agency implementing rules and regulations issued pursuant to the law.

§ 302-7.12 What are the various methods of shipping HHG and how is the weight determined for each type of shipment?

HHG should be shipped by the most economical method available. The various methods of shipment and weight calculations include the following:

Method of shipment	How weight of shipment is determined
(a) Uncrated (shipped in HHG movers van or similar conveyance).	The net weight will be shown on the bill of lading or weight certificate attached and includes the weight of barrels, boxes, cartons, and similar material used in packing, but does not include pads, chains, dollies and other equipment to load and secure the shipment.
(b) Crated shipments	When crated the net weight will not include the weight of the crating material. The net weight will be computed as being 60 percent of the gross weight. However, if the net weight computed in this manner exceeds the applicable weight limitation and if it is determined that, for reasons beyond the employee's control, unusually heavy crating and packing materials were necessarily used, the net weight may be computed at less than 60 percent of the gross weight.
(c) Containerized shipments (Special containers designed, e.g., lift vans, CONEX transporters, HHG shipping boxes, for repeated use).	When the known tare weight does not include the weight of interior bracing and padding materials but only the weight of the container, the net weight will be 85 percent of the gross weight less the weight of the container. If the known tare weight includes such material, so that the net weight is the same as it would be for uncrated shipments in interstate commerce, the net weight will not be subject to reduction.
(d) Constructive weight	If adequate scales are not available at origin, en route or at destination, a constructive weight based on 7 pounds per cubic foot of properly loaded van space may be used. Such weight may be used for a part-load when its weight could not be obtained, without first unloading it or other part-loads being carried in the same vehicle or when the HHG are not weighed because the carrier's charges for local or metropolitan area moves are properly computed on the basis other than weight or volume of the shipment (as when payment is based on an hourly rate and distance involved). In such instances a statement from the carrier showing the properly loaded van space required for the shipment should be obtained with respect to proof of entitlement to a commuted rate payment when net weight cannot be shown.

§ 302-7.13

41 CFR Ch. 302 (7-1-02 Edition)

§ 302-7.13 What methods of transporting and paying for the movement of HHG, PBP&E and temporary storage are authorized?

There are two authorized methods of transporting and paying for the movement of HHG, PBP&E and temporary storage. Your agency will determine which of the following methods will be authorized.

(a) *Commuted Rate System.* Under the commuted rate system you assume total responsibility for arranging and paying for, at least the following services: packing/unpacking, crating/uncrating, pickup/deliver, weighing, line-haul, drayage, and temporary storage of your HHG and PBP&E with a commercial HHG carrier or by renting self drive equipment for a do-it-yourself move. When any PBP&E is transported as an administrative expense of your agency, all arrangements (e.g., packing/unpacking, pickup/delivery, weighing, temporary storage, etc.) will be handled and paid for by your agency.

(b) *Actual Expense Method.* Under the actual expense method, your agency assumes the responsibility for arranging and paying for all aspects (e.g., packing/unpacking, pickup/delivery, weighing, line-haul, drayage, temporary storage, etc.), of transporting your HHG and PBP&E with a commercial HHG carrier.

§ 302-7.14 Are there any disadvantages to using the commuted rate method for transporting HHG, PBP&E and temporary storage?

Yes. The disadvantages to using the commuted rate method for transporting HHG, PBP&E and temporary storage are that the:

- (a) Government cannot take advantage of any special rates that may be offered only to Government shipments;
- (b) Commuted rate method does not apply to intrastate moves; and
- (c) Commuted rate method may not fully reimburse your out-of-pocket expenses.

§ 302-7.15 Must I use the method selected by my agency for transporting my HHG, PBP&E and temporary storage?

No, you do not have to use the method selected (§ 302-7.301) by your agency, and you may pursue other methods, however, your reimbursement is limited to the actual cost incurred, not to exceed what the Government would have incurred under the commuted rate system within CONUS and the actual expense method OCONUS.

§ 302-7.16 Is the maximum weight allowance for HHG and temporary storage limited when quarters are furnished or partly furnished by the Government OCONUS or upon return to CONUS?

When quarters are furnished or partly furnished by the Government OCONUS, your agency may limit the weight of HHG and temporary storage that can be transported to that location. Only the authorized weight allowance that was shipped to the OCONUS location may be returned to CONUS upon completion of the tour of duty, unless the agency makes an exception under conditions specified in agency internal regulations.

§ 302-7.17 May PBP&E be transported at Government expense upon returning to CONUS for separation from Government service, after completion of an OCONUS assignment?

Any PBP&E that was transported as an administrative expense of the Government to the OCONUS assignment will be returned as an administrative expense of the Government to the place of actual residence or any other location, not to exceed the cost to the authorized destination.

§ 302-7.18 Who is liable for any loss or damage to HHG incident to an authorized relocation?

When transporting HHG under the commuted rate or actual expense method and a commercial HHG carrier
