

Bureau of Land Management, Interior

§ 3712.2-1

Provided, further, That nothing in this act shall be construed as affecting or intended to affect or in any way interfere with or modify the laws of the States which lie wholly or in part westward of the ninety-eighth meridian relating to the ownership, control, appropriation, use, and distribution of ground or surface waters within any unpatented mining claim.

Except to the extent required for the mining claimant's prospecting, mining or processing operations and uses reasonably incident thereto, or for the construction of buildings or structures in connection therewith, or to provide clearance for such operations or uses, or to the extent authorized by the United States, no claimant of any mining claim hereafter located under the mining laws of the United States shall, prior to issuance of patent therefor, sever, remove, or use any vegetative or other surface resources thereof which are subject to management or disposition by the United States under the preceding subsection (b). Any severance or removal of timber which is permitted under the exceptions of the preceding sentence, other than severance or removal to provide clearance, shall be in accordance with sound principles of forest management.

(b) The locator of an unpatented mining claim subject to the Act is limited in his use of the claim to those uses specified in the act, namely prospecting, mining, or processing operations and uses reasonably incident thereto. He is forbidden to use it for any other purpose such, for example, as for filling stations, curio shops, cafes, tourist, or fishing and hunting camps. Except as such interference may result from uses permitted under the act, the locator of an unpatented mining claim subject to the act may not interfere with the right of the United States to manage the vegetative and other surface resources of the land, or use it so as to block access to or egress from adjacent public land, or use Federal timber for purposes other than those permitted under the act, or block access to water needed in grazing use of the national forests or other public lands, or block access to recreational areas, or prevent agents of the Federal Government from crossing the locator's claim in order to reach adjacent land for purposes of managing wild-game habitat or improving fishing streams so as to thwart the public harvest and proper management of fish and game resources on the public lands generally, both on located and on adjacent lands.

(c) Mining claims located prior to the date of the act will be subject to the Act where determination has been made pursuant to section 5 of the Act, that the locator's surface rights are limited as provided in section 4 of the Act, or where the owners have waived and relinquished all rights under section 6 of the Act, which are contrary to or in conflict with the limitations and restrictions specified as to hereafter located unpatented mining claims in section 4 of the Act. See § 3714.3 as to effect on existing rights.

(d) On mining claims subject to the provisions of the Act, timber may be used by the claimants only for the purposes permitted under the Act, and, except where timber is removed to provide clearance for operations or uses permitted under the Act, such timber must be cut in accordance with sound principles of forest management. When timber on a mining claim is disposed of by the Government subsequent to the location of the claim, free use of timber by the mining claimant of like kind and quantity from the nearest timber administered by the disposing agency is provided for, but only when and to the extent that is required for their mining operations and only in kind and quantity substantially equivalent to the timber removed from the claim by the Government. Any such timber may be cut and removed only under the rules and regulations of the administering agency. Regulations governing applications and issuance of permits for the use of such timber on public lands administered by the Bureau of Land Management are contained in part 5510 of this chapter.

§ 3712.2 Publication of notice.

§ 3712.2-1 Request for publication of notice to mining claimant.

(a) The Act in the first paragraph of section 5(a) provides as follows:

The head of a Federal department or agency which has the responsibility for administering surface resources of any lands belonging to the United States may file as to such lands in the office of the Secretary of the Interior, or in such office as the Secretary of the Interior may designate, a request for publication of notice to mining claimants, for determination of surface

rights, which request shall contain a description of the lands covered thereby, showing the section or sections of the public land surveys which embrace the lands covered by such request, or if such lands are unsurveyed, either the section or sections which would probably embrace such lands when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument.

The "request for publication of notice to mining claimants" authorized to be filed by the above-quoted portion of the act can be filed by the Federal department or agency which has the responsibility for administering surface resources of the lands to which the requested notice would relate. It must describe the land covered by the request by section, township, range, and meridian or, if the land is unsurveyed, either the section or sections which would probably embrace such lands when the public land surveys are extended to such lands, or by a metes and bounds description of such area with a tie to a United States mineral monument.

(b) A request for publication of notice under this subsection shall be filed with the proper office of the Bureau of Land Management. No request for publication may include lands in more than one district.

§ 3712.2-2 Evidence necessary to support a request for publication.

(a) The second and third paragraphs of section 5(a) of the Act provide in detail for the filing by the head of a Federal department or agency of certain evidence in support of the request for publication of the notice referred to in § 3712.2-1 as follows:

The filing of such request for publication shall be accompanied by an affidavit or affidavits of a person or persons over twenty-one years of age setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in actual possession of or engaged in the working of such lands or any part thereof, and, if no person or persons were found to be in actual possession of or engaged in the working of said lands or any part thereof, on the date of such examination, setting forth such fact, or, if any person or persons were so found to be in actual possession or engaged in such working on the date of such examination, setting forth the name and address of each such person, unless affiant shall have been unable through reasonable inquiry to obtain information as to the name and address of any such person, in

which event the affidavit shall set forth fully the nature and results of such inquiry.

The filing of such request for publication shall also be accompanied by the certificate of a title or abstract company, or of a title abstractor, or of an attorney, based upon such company's abstractor's or attorney's examination of those instruments which are shown by the tract indexes in the county office of record as affecting the lands described in said request, setting forth the name of any person disclosed by said instruments to have an interest in said lands under any unpatented mining claim heretofore located, together with the address of such person if such address is disclosed by such instruments of record. "Tract indexes" as used herein shall mean those indexes, if any, as to surveyed lands identifying instruments as affecting a particular legal subdivision of the public land surveys, and as to unsurveyed lands identifying instruments as affecting a particular probable legal subdivision according to a projected extension of the public land surveys.

(b) This part of the Act requires the filing of an affidavit which may be made by any person or persons over twenty-one years of age who have examined the lands. It must show whether any person or persons were "in actual possession of or engaged in the working of such lands (the lands described in the request for publication of notice) or any part thereof" and, if they were, the name and address of each such person must be given if it can be learned by reasonable inquiry and if it cannot be so learned, the affidavit must show in detail what inquiry or inquiries were made to obtain each such name and address. No definition of the terms "in actual possession" or "engaged in the working of said lands" will be attempted here, but the affidavits should recite what evidences of occupancy or workings were found. The request for publication must also be accompanied by a certificate executed as provided in the third paragraph of section 5(a) and containing the information required by that paragraph to be furnished. If there are no tract indexes, as defined in the Act, in the county office of record affecting the lands described in the request for publication, a certificate executed as provided in the said third paragraph of section 5(a) to that effect must be furnished.
