

## § 15.17

field strength necessary for communications, to provide greater attenuation of unwanted emissions than required by these regulations, and to advise the user as to how to resolve harmful interference problems (for example, see § 15.105(b)).

### § 15.17 Susceptibility to interference.

(a) Parties responsible for equipment compliance are advised to consider the proximity and the high power of non-Government licensed radio stations, such as broadcast, amateur, land mobile, and non-geostationary mobile satellite feeder link earth stations, and of U.S. Government radio stations, which could include high-powered radar systems, when choosing operating frequencies during the design of their equipment so as to reduce the susceptibility for receiving harmful interference. Information on non-Government use of the spectrum can be obtained by consulting the Table of Frequency Allocations in § 2.106 of this chapter.

(b) Information on U.S. Government operations can be obtained by contacting: Director, Spectrum Plans and Policy, National Telecommunications and Information Administration, Department of Commerce, Room 4096, Washington, DC 20230.

[54 FR 17714, Apr. 25, 1989, as amended at 62 FR 4655, Jan. 31, 1997; 63 FR 40835, July 31, 1998]

### § 15.19 Labelling requirements.

(a) In addition to the requirements in part 2 of this chapter, a device subject to certification, or verification shall be labelled as follows:

(1) Receivers associated with the operation of a licensed radio service, e.g., FM broadcast under part 73 of this chapter, land mobile operation under part 90, etc., shall bear the following statement in a conspicuous location on the device:

## 47 CFR Ch. I (10–1–02 Edition)

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

(2) A stand-alone cable input selector switch, shall bear the following statement in a conspicuous location on the device:

This device is verified to comply with part 15 of the FCC Rules for use with cable television service.

(3) All other devices shall bear the following statement in a conspicuous location on the device:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

(4) Where a device is constructed in two or more sections connected by wires and marketed together, the statement specified under paragraph (a) of this section is required to be affixed only to the main control unit.

(5) When the device is so small or for such use that it is not practicable to place the statement specified under paragraph (a) of this section on it, the information required by this paragraph shall be placed in a prominent location in the instruction manual or pamphlet supplied to the user or, alternatively, shall be placed on the container in which the device is marketed. However, the FCC identifier or the unique identifier, as appropriate, must be displayed on the device.

(b) Products subject to authorization under a Declaration of Conformity shall be labelled as follows:

(1) The label shall be located in a conspicuous location on the device and shall contain the unique identification described in § 2.1074 of this chapter and the following logo:

(i) If the product is authorized based on testing of the product or system; or

(ii) If a personal computer is authorized based on assembly using separately authorized components, in ac-

cordance with §15.101(c)(2) or (c)(3), and the resulting product is not separately tested:

(2) Label text and information should be in a size of type large enough to be readily legible, consistent with the dimensions of the equipment and the label. However, the type size for the text is not required to be larger than eight point.

(3) When the device is so small or for such use that it is not practicable to place the statement specified under paragraph (b)(1) of this section on it, such as for a CPU board or a plug-in circuit board peripheral device, the text associated with the logo may be placed in a prominent location in the instruction manual or pamphlet supplied to the user. However, the unique identification (trade name and model number) and the logo must be displayed on the device.

(4) The label shall not be a stick-on, paper label. The label on these products shall be permanently affixed to the product and shall be readily visible to the purchaser at the time of purchase, as described in §2.925(d) of this chapter. "Permanently affixed" means that the label is etched, engraved, stamped, silkscreened, indelibly printed, or otherwise permanently marked on a permanently attached part of the equipment or on a nameplate of metal, plastic, or other material fastened to the equipment by welding, riveting, or a permanent adhesive. The label must be designed to last the expected lifetime of the equipment in the environment in which the equipment may be operated and must not be readily detachable.

**§ 15.19**

(c) [Reserved]

(d) Consumer electronics TV receiving devices, including TV receivers, videocassette recorders, and similar devices, that incorporate features intended to be used with cable television service, but do not fully comply with the technical standards for cable ready equipment set forth in §15.118, shall not be marketed with terminology that describes the device as “cable ready” or “cable compatible,” or that otherwise conveys the impression that the device is fully compatible with cable service. Factual statements about the various features of a device that are intended for use with cable service or the quality of such features are acceptable so long as such statements do not imply that the device is fully compatible with cable service. Statements relating to product features are generally acceptable where they are limited to one or more specific features of a device, rather than the device as a whole. This requirement applies to consumer TV receivers, videocassette recorders and similar devices manufactured or imported for sale in this country on or after October 31, 1994.

(1) Consumer electronics TV receiving devices, including TV receivers, videocassette recorders, and similar devices, that include digital video signal processing capability and incorporate features intended to be used with digital cable television service, but do not provide one or more of the feature sets described in paragraph (d)(2) of this section shall not be marketed with terminology that describes the device as “cable ready” or “cable compatible” or otherwise conveys the impression that the device is fully compatible with digital cable service. Devices marketed as “digital cable ready” or “digital cable compatible” or otherwise conveying the impression that the device is fully compatible with digital cable service must offer one or more of the feature sets (*i.e.*, Digital Cable Ready 1, Digital Cable Ready 2, Digital Cable Ready 3) specified in paragraph (d)(2) of this section and carry the corresponding descriptive label or labels. With respect to their analog signal processing capabilities, these devices must also comply with the technical standards for cable ready equipment set forth in

**47 CFR Ch. I (10–1–02 Edition)**

§15.118. Devices not marketed as “digital cable ready” or “digital cable compatible” may be accompanied by factual statements about the various features of the devices that are intended for use with digital cable service and/or the quality of such features, provided that such statements do not imply that the device is fully compatible with digital cable service. Statements relating to product features are generally acceptable where they are limited to one or more specific features of a device, rather than the device as a whole.

(2) Descriptive Labels for consumer electronics TV receiving devices with digital signal processing capability.

(i) Digital Cable Ready 1 refers to a consumer electronics TV receiving device capable of receiving analog basic, digital basic and digital premium cable television programming by direct connection to a cable system providing digital programming. This device does not have a 1394 connector or other digital interface. A security card (or POD) provided by the cable operator is required to view encrypted programming.

(ii) Digital Cable Ready 2 refers to a consumer electronics TV receiving device capable of receiving analog basic, digital basic and digital premium cable television programming by direct connection to a cable system providing digital programming. This receiving device will incorporate all features defined in Digital Cable Ready 1 and will also include the 1394 digital interface connector. A security card (or POD) provided by the cable operator is required to view encrypted programming.

(iii) Digital Cable Ready 3 refers to a consumer electronics TV receiving device capable of receiving analog basic, digital basic and digital premium cable television programming. This device will incorporate all features defined in Digital Cable Ready 1 and will also receive advanced and interactive digital services by direct connection to a cable system providing digital programming and advanced and interactive digital services and programming. A security card (or POD) provided by the cable operator is required to view encrypted programming.

(3) Consumer electronics TV receiving devices, including TV receivers,

videocassette recorders, and similar devices, that include digital video signal processing capability and that provide one or more of the feature sets (*i.e.*, Digital Cable Ready 1, Digital Cable Ready 2, Digital Cable Ready 3) described in paragraph (d)(2) of this section, must carry the label or labels from paragraph (d)(2) of this section that describe the feature sets offered by the device. The format of the label or labels shall conform to the provisions of §2.925 (d) and (e) of this chapter.

(4) The requirements of this section apply to consumer TV receivers, videocassette recorders and similar devices manufactured or imported for sale in this country on or after July 1, 2001.

[54 FR 17714, Apr. 25, 1989, as amended at 59 FR 25341, May 16, 1994; 61 FR 18509, Apr. 26, 1996; 61 FR 31048, June 19, 1996; 62 FR 41881, Aug. 4, 1997; 63 FR 36602, July 7, 1998; 65 FR 64391, Oct. 27, 2000]

EFFECTIVE DATE NOTE: At 65 FR 64391, Oct. 27, 2000, §15.19 was amended by adding paragraphs (d)(1) through (d)(4). This section contains information collection and record-keeping requirements and will not become effective until approval has been given by the Office of Management and Budget.

#### § 15.21 Information to user.

The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### § 15.23 Home-built devices.

(a) Equipment authorization is not required for devices that are not marketed, are not constructed from a kit, and are built in quantities of five or less for personal use.

(b) It is recognized that the individual builder of home-built equipment may not possess the means to perform the measurements for determining compliance with the regulations. In this case, the builder is expected to employ good engineering practices to meet the specified technical standards to the greatest extent practicable. The provisions of §15.5 apply to this equipment.

#### § 15.25 Kits.

A TV interface device, including a cable system terminal device, which is marketed as a kit shall comply with the following requirements:

(a) All parts necessary for the assembled device to comply with the technical requirements of this part must be supplied with the kit. No mechanism for adjustment that can cause operation in violation of the requirements of this part shall be made accessible to the builder.

(b) At least two units of the kit shall be assembled in exact accordance with the instructions supplied with the product to be marketed. If all components required to fully complete the kit (other than those specified in paragraph (a) of this section which are needed for compliance with the technical provisions and must be included with the kit) are not normally furnished with the kit, assembly shall be made using the recommended components. The assembled units shall be certified or authorized under the Declaration of Conformity procedure, as appropriate, pursuant to the requirements of this part.

(1) The measurement data required for a TV interface device subject to certification shall be obtained for each of the two units and submitted with an application for certification pursuant to subpart J of part 2 of this chapter.

(2) The measurement data required for a TV interface device subject to Declaration of Conformity shall be obtained for the units tested and retained on file pursuant to the provisions of subpart J of part 2 of this chapter.

(c) A copy of the exact instructions that will be provided for assembly of the device shall be submitted with an application for certification. Those parts which are not normally furnished shall be detailed in the application for equipment authorization.

(d) In lieu of the label required by §15.19, the following label, along with the label bearing the FCC identifier and other information specified in §§2.925 and 2.926, shall be included in the kit with instructions to the builder that it shall be attached to the completed kit:
