

Subpart 923.70—Environmental, Conservation, and Occupational Safety Programs

923.7001 Nuclear safety.

(a) The DOE regulates the nuclear safety of its major facilities under its own statutory authority derived from the Atomic Energy Act and other legislation. The DOE also regulates, under certain specific conditions, the use by its contractors of radioactive materials and ionizing radiation producing machines.

[49 FR 12003, Mar. 28, 1984, as amended at 59 FR 9106, Feb. 25, 1994]

923.7002 Contract clauses.

(a) A decision to include or not include environmental, safety and health clauses in DOE contracts shall be made by the contracting officer in consultation with appropriate environmental, safety and health program management personnel.

(b) When work is to be performed at a facility where the DOE will exercise its statutory authority to enforce occupational safety and health standards applicable to the working conditions of the contractor and subcontractor employees at such facility, the clause at 952.223-71 shall be used in such contract or subcontract if conditions (b) (1) through (3), are satisfied:

(1) DOE work is segregated from the contractor's or subcontractor's other work;

(2) The operation is of sufficient size to support its own safety and health services; and

(3) The facility is government-owned, or leased by or for the account of the government.

(c) In facilities not meeting the requirements of 923.7002(b) above and which are a production or utilization facility where there is use or possession of source, special nuclear, or by-product materials, DOE policy is not to enforce radiological safety and health standards pursuant to the contract or subcontract but rather to rely upon Nuclear Regulatory Commission (NRC) licensing requirements (including agreements with states under section 274 of the Atomic Energy Act). Pursuant to this policy, neither the clause

found at 952.223-71 nor 952.223-72 is to be incorporated in the contracts or subcontracts for work at such facilities. Notwithstanding this general policy with respect to facilities not meeting the requirements of paragraph (b) above, the Secretary or his designee may determine in special cases, that DOE needs to enforce radiological safety and health standards pursuant to the contract or subcontract (see paragraph (d) below). When such a determination is made, the clause found at 952.223-72 shall be included in the contract or subcontract.

(d) In facilities not meeting the requirements of either 923.7002(b) or 923.7002(c) of this section and where there is a machine capable of producing ionizing radiation, it is DOE policy not to regulate such activity where it is adequately regulated by a state or other Federal agency. In such cases, neither clause 952.223-71 nor 952.223-72 shall be incorporated in the contract. Where the contracting officer, with appropriate environmental, safety and health advice determines that no state or other Federal agency exists to adequately regulate the operation and/or use of such machines, the clause found at 952.223-72 shall be included in the contract. The Assistant Secretary for Environment, Safety and Health (or designee) shall be consulted to determine if a non-agreement (NRC) state or a facility located in a non-agreement state has been reviewed by any other DOE office to establish that the state agency has the essential authority and resources for enforcing the radiation protection standards. This is to assure reasonable consistency in the assessment of radiation protection in non-agreement states and subsequent use of 952.223-72.

(e) In a situation where the contractor or subcontractor is performing DOE work at more than one location, inclusion of either, or both, 952.223-71 and 952.223-72 may be appropriate. In such cases, the contract or subcontract must include language to specify the extent of applicability of each clause used. For example, with a parenthetical: (Applicable only to work performed at a contractor site which has
