

Fishery Conservation and Management

§ 635.27

land, and sell each fishing year only one large medium or giant BFT that is taken incidentally while fishing for other species with a pound net or fish weir. No other Atlantic tunas caught in a pound net or fish weir may be retained.

[64 FR 29135, May 28, 1999, as amended at 65 FR 42887, July 12, 2000]

§ 635.24 Commercial retention limits for sharks and swordfish.

The retention limits in this section are subject to the quotas and closure provisions in §§ 635.27 and 635.28.

(a) *Sharks*. (1) Persons who own or operate a vessel that has been issued a directed ILAP or LAP for shark may retain, possess or land no more than 4,000 lb (1,814 kg), dw, of LCS per trip.

(2) Persons who own or operate a vessel that has been issued an incidental catch ILAP or LAP for sharks may retain, possess or land no more than 5 LCS and 16 SCS and pelagic sharks, combined, per trip.

(b) *Swordfish*. (1) Persons aboard a vessel that has been issued an incidental ILAP or LAP for swordfish may retain, possess, or land no more than two swordfish per trip in or from the Atlantic Ocean north of 5° N. lat.

(2) Persons aboard a vessel in the squid trawl fishery that has been issued an incidental ILAP or LAP for swordfish may retain, possess, or land no more than five swordfish per trip in or from the Atlantic Ocean north of 5° N. lat. A vessel is considered to be in the squid trawl fishery when it has no commercial fishing gear other than trawls on board and when squid constitute not less than 75 percent by weight of the total fish on board or offloaded from the vessel.

§ 635.25 [Reserved]

§ 635.26 Catch and release.

(a) *BFT*. (1) Notwithstanding the other provisions of this part, a person aboard a vessel issued a permit under this part, other than a person aboard a vessel permitted in the General category on a designated RFD, may fish with rod and reel or handline gear for BFT under a tag and release program, provided the person tags all BFT so caught, regardless of whether pre-

viously tagged, with conventional tags issued or approved by NMFS, returns such fish to the sea immediately after tagging with a minimum of injury, and reports the tagging and, if the BFT was previously tagged, the information on the previous tag. If NMFS-issued or NMFS-approved conventional tags are not on board a vessel, all persons aboard that vessel are ineligible to fish under the tag-and-release program.

(2) Persons may obtain NMFS-issued conventional tags, reporting cards, and detailed instructions for their use from the NMFS Cooperative Tagging Center. Persons may use a conventional tag obtained from a source other than NMFS to tag BFT, provided the use of such tags is registered each year with the Cooperative Tagging Center and the NMFS program manager has approved the use of a conventional tag from that source. An angler using an alternative source of tags wishing to tag BFT may contact the NMFS Cooperative Tagging Center at the Southeast Fishery Science Center.

(3) An angler registering for the HMS tagging program is required to provide his or her name, address, phone number and, if applicable, the identity of the alternate source of tags.

(b) *Billfish*. NMFS is encouraging further catch and release of Atlantic billfish by establishing a recreational catch-and-release fishery management program, consistent with the guidance of § 600.350(c).

(c) *Sharks*. Notwithstanding the other provisions of this part, a person may fish for white sharks (*Carcharodon carcharias*) with rod and reel, provided the person releases such fish to the sea immediately with a minimum of injury, and that such fish may not be removed from the water.

[64 FR 29135, May 28, 1999, as amended at 65 FR 42887, July 12, 2000]

§ 635.27 Quotas.

(a) *BFT*. Consistent with ICCAT recommendations, NMFS will subtract any allowance for dead discards from the fishing year's total U.S. quota for BFT that can be caught and allocate the remainder to be retained, possessed, or landed by persons and vessels subject to U.S. jurisdiction. The total landing quota will be divided among

§ 635.27

50 CFR Ch. VI (10-1-02 Edition)

the General, Angling, Harpoon, Purse Seine, Longline, and Trap categories. Consistent with these allocations and other applicable restrictions of this part, BFT may be taken by persons aboard vessels issued Atlantic Tunas permits or HMS Charter/Headboat permits. Allocations of the BFT landings quota will be made according to the following percentages: General - 47.1 percent; Angling - 19.7 percent, which includes the school BFT held in reserve as described under paragraph (a)(7)(ii) of this section; Harpoon - 3.9 percent; Purse Seine - 18.6 percent; Longline - 8.1 percent; and Trap - 0.1 percent. The remaining 2.5 percent of the BFT landings quota will be held in reserve for inseason adjustments, to compensate for overharvest in any category other than the Angling category school BFT subquota or for fishery independent research. NMFS may apportion a landings quota allocated to any category to specified fishing periods or to geographic areas. BFT landings quotas are specified in whole weight.

(1) *General category landings quota.* Prior to each fishing year, NMFS will set the General category effort control schedule, including time-period subquotas and restricted-fishing days, through proposed and final specifications published in the FEDERAL REGISTER.

(i) Catches from vessels for which General category Atlantic Tunas permits have been issued and certain catches from vessels for which an HMS or Atlantic tunas Charter/Headboat permit has been issued are counted against the General category landings quota. See §635.23(c)(3) regarding landings by vessels with an HMS or Atlantic tunas Charter/Headboat permit that are counted against the General category landings quota. The total amount of large medium and giant BFT that may be caught, retained, possessed, landed, or sold under the General category landings quota is 47.1 percent of the overall U.S. BFT landings quota, less 10 mt which is set aside for an area comprising the waters south and west of a straight line originating at a point on the southern shore of Long Island at 72° 27' W. long (Shinnecock Inlet) and running SSE 150° true, and north of 38°47' N. lat. as

specified in §635.27(a)(1)(iii). This 47.1 percent, less the 10 mt set aside as specified in §635.27(a)(1)(iii), is apportioned as follows:

(A) June 1 through August 31—60 percent;

(B) September 1 through September 30—30 percent; and

(C) October 1 through December 31—10 percent.

(ii) NMFS will adjust each period's apportionment based on overharvest or underharvest in the prior period.

(iii) When the coastwide General category fishery has been closed in any quota period under §637.28(a)(1), NMFS may publish notification in the FEDERAL REGISTER to make available all or part of the 10 mt landings quota set aside for an area comprising the waters south and west of a straight line originating at a point on the southern shore of Long Island at 72°27' W. long. (Shinnecock Inlet) and running SSE 150° true, and north of 38°47' N. lat. The daily catch limit for the set-aside area will be one large medium or giant BFT per vessel per day. Upon the effective date of the set-aside fishery, fishing for, retaining, or landing large medium or giant BFT is authorized only within the set-aside area. Any portion of the set-aside amount not harvested prior to the reopening of the coastwide General category fishery in the subsequent quota period established under paragraph (a)(1)(i) of this section may be carried over for the purpose of renewing the set-aside fishery at a later date.

(2) *Angling category landings quota.* The total amount of BFT that may be caught, retained, possessed, and landed by anglers aboard vessels for which an Angling category Atlantic Tunas permit or an HMS or Atlantic Tunas Charter/Headboat permit has been issued is 19.7 percent of the overall annual U.S. BFT landings quota. No more than 2.3 percent of the annual Angling category landings quota may be large medium or giant BFT and, over each 4-consecutive-year period, no more than 8 percent of the overall U.S. BFT landings quota may be school BFT. The Angling category landings quota includes the amount of school BFT held in reserve as specified under paragraph (a)(7)(ii) of this section. The size class

subquotas for BFT are further subdivided as follows:

(i) Under paragraph (a)(7)(ii) of this section, 52.8 percent of the school BFT Angling category landings quota, after adjustment for the school BFT quota held in reserve, may be caught, retained, possessed, or landed south of 39°18' N. lat., with the remaining quota being available to the fisheries north of the dividing line.

(ii) An amount equal to 52.8 percent of the large school/small medium BFT Angling category quota may be caught, retained, possessed, or landed south of 39°18' N. lat., with the remaining quota being available to the fisheries north of the dividing line.

(iii) An amount equal to 66.7 percent of the large medium and giant BFT Angling category quota may be caught, retained, possessed, or landed south of 39°18' N. lat., with the remaining quota being available to the fisheries north of the dividing line.

(3) *Longline category quota.* The total amount of large medium and giant BFT that may be caught incidentally and retained, possessed, or landed by vessels for which Longline category Atlantic tunas permits have been issued is 8.1 percent of the overall U.S. BFT quota. No more than 78.9 percent of the Longline category quota may be caught, retained, possessed, or landed in the area south of 34°00' N. lat.

(4) *Purse Seine category quota.* (i) The total amount of large medium and giant BFT that may be caught, retained, possessed, or landed by vessels for which Purse Seine category Atlantic Tunas permits have been issued is 18.6 percent of the overall U.S. BFT landings quota. The directed purse seine fishery for BFT commences on August 15 each year.

(ii) An owner of a vessel for which a Purse Seine category Atlantic Tunas permit has been issued must apply in writing to NMFS at an address designated by NMFS, for an allocation of BFT from the Purse Seine category quota. The application must be post-marked no later than April 15 for an allocation of the quota that becomes available on June 1.

(iii) On or about May 1, NMFS will make equal allocations of the available size classes of BFT among purse seine

vessel permit holders so requesting, adjusted as necessary to account for underharvest or overharvest by each participating vessel or the vessel it replaces from the previous fishing year, consistent with paragraph (a)(9)(i) of this section. Such allocations are freely transferable, in whole or in part, among vessels that have Purse Seine category Atlantic Tunas permits. Any purse seine vessel permit holder intending to land bluefin tuna under an allocation transferred from another purse seine vessel permit holder must provide written notice of such intent to NMFS, at an address designated by NMFS, 3 days before landing any such bluefin tuna. Such notification must include the transfer date, amount (mt) transferred, and the permit numbers of vessels involved in the transfer. Trip or seasonal catch limits otherwise applicable under §635.23(e) are not altered by transfers of bluefin tuna allocation. Purse seine vessel permit holders who, through landing and/or transfer, have no remaining bluefin tuna allocation may not use their permitted vessels in any fishery in which Atlantic bluefin tuna might be caught, regardless of whether retained.

(iv) An owner of a vessel for which a Purse Seine category Atlantic Tunas permit has been issued may apply to NMFS to permanently consolidate Purse Seine category vessel permits issued under §635.4. Upon written approval of consolidation by NMFS, the Purse Seine Category Atlantic Tunas Permit of a transferring vessel will be canceled, and the receiving owner may apply for allocations of BFT commensurate with the number of consolidated permits. An owner of a purse seine vessel whose permit is canceled through consolidation may not use his or her vessel in any purse seine fishery in which BFT might be caught.

(5) *Harpoon category quota.* The total amount of large medium and giant BFT that may be caught, retained, possessed, landed, or sold by vessels for which Harpoon category Atlantic Tunas permits have been issued is 3.9 percent of the overall U.S. BFT quota.

(6) *Trap category quota.* The total amount of large medium and giant BFT that may be caught, retained, possessed, or landed by vessels for which

Trap category Atlantic Tunas permits have been issued is 0.1 percent of the overall U.S. BFT quota.

(7) *Reserve.* (i) The total amount of BFT that is held in reserve for inseason adjustments and fishery-independent research using quotas or subquotas other than the Angling category school BFT subquota, is 2.5 percent of the overall U.S. BFT quota. Consistent with paragraph (a)(7)(iii) of this section, NMFS may allocate any portion of this reserve for inseason adjustments to any category quota in the fishery, other than the Angling category school BFT subquota.

(ii) The total amount of school BFT that is held in reserve for inseason adjustments and fishery independent research is 18.5 percent of the total school BFT quota for the Angling category as described under paragraph (a)(2) of this section, which is in addition to the amounts specified in paragraph (a)(7)(i) of this section. Consistent with paragraph (a)(7)(iii) of this section, NMFS may allocate any portion of the school BFT held in reserve for inseason adjustments to the Angling category.

(iii) NMFS will file with the Office of the Federal Register for publication notification of any inseason adjustment. Before making any such adjustment, NMFS will consider the following factors:

(A) The usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock.

(B) The catches of the particular category quota to date and the likelihood of closure of that segment of the fishery if no allocation is made.

(C) The projected ability of the vessels fishing under the particular category quota to harvest the additional amount of BFT before the end of the fishing year.

(D) The estimated amounts by which quotas for other gear categories of the fishery might be exceeded.

(E) Effects of the transfer on BFT rebuilding and overfishing.

(F) Effects of the transfer on accomplishing the objectives of the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks.

(8) *Inseason adjustments.* Within a fishing year, NMFS may transfer quotas among categories or, as appropriate, subcategories. If it is determined, based on the factors in paragraphs (a)(7)(iii)(A) through (a)(7)(iii)(F) of this section and the probability of exceeding the total quota, that vessels fishing under any category or subcategory quota are not likely to take that quota, NMFS may transfer inseason any portion of the remaining quota of that fishing category to any other fishing category or to the reserve as specified in paragraphs (a)(7)(i) and (a)(7)(ii) of this section. NMFS will file with the Office of the Federal Register for publication notification of any inseason adjustment.

(9) *Annual adjustments.* (i) If NMFS determines, based on landings statistics and other available information, that a BFT quota in any category or, as appropriate, subcategory has been exceeded or has not been reached, with the exception of the Purse Seine category, NMFS shall subtract the overharvest from, or add the underharvest to, that quota category for the following fishing year, provided that the total of the adjusted category quotas and the Reserve is consistent with a recommendation of ICCAT regarding country quotas, the take of school BFT, and the allowance for dead discards. For the Purse Seine category, if NMFS determines, based on landings statistics and other available information, that a purse seine vessel's allocation, as adjusted, has been exceeded or has not been reached, NMFS shall subtract the overharvest from, or add the underharvest to, that vessel's allocation for the following fishing year.

(ii) NMFS may allocate any quota remaining in the reserve at the end of a fishing year to account for overharvest in any fishing category, provided such allocation is consistent with the criteria specified in paragraph (a)(7)(iii) of this section.

(iii) Regardless of the estimated landings in any year, NMFS may adjust the annual school BFT quota to ensure that the average take of school BFT over each 4-consecutive-year period beginning in the 1999 fishing year does not exceed 8 percent by weight of

Fishery Conservation and Management

§ 635.27

the total U.S. BFT quota for that period.

(iv) If NMFS determines that the annual dead discard allowance has been exceeded in one fishing year, NMFS shall subtract the amount in excess of the allowance from the amount of BFT that can be landed in the subsequent fishing year by those categories accounting for the dead discards. If NMFS determines that the annual dead discard allowance has not been reached, NMFS may add one-half of the remainder to the amount of BFT that can be landed in the subsequent fishing year. Such amount may be allocated to individual fishing categories or to the Reserve.

(v) NMFS will file with the Office of the Federal Register for publication notification of the amount subtracted or added and the basis for the quota reductions or increases made pursuant to paragraphs (a)(9)(i) through (a)(9)(iv) of this section.

(b) *Sharks*—(1) *Commercial quotas*. The commercial quotas for shark specified in paragraphs (b)(1)(i) through (b)(1)(iv) of this section apply to sharks harvested from the management unit, regardless of where harvested. Commercial quotas are specified for each of the management groups of large coastal sharks, small coastal sharks, and pelagic sharks.

(i) *Large coastal sharks*. The annual commercial quota for large coastal sharks is 816 mt dw, apportioned between ridgeback and non-ridgeback shark and divided between two equal semiannual fishing seasons, January 1 through June 30, and July 1 through December 31. The length of each season will be determined based on the projected catch rates, available quota, and other relevant factors. NMFS will file with the Office of the Federal Register for publication notification of each season's length at least 30 days prior to the beginning of the season. The quotas for each fishing season (unless otherwise specified in the FEDERAL REGISTER as provided in paragraph (b)(1)(iv) of this section are as follows:

(A) Ridgeback shark—310 mt dw.

(B) Non-ridgeback shark—98 mt dw.

(ii) *Small coastal sharks*. The annual commercial quota for small coastal shark is 359 mt dw, (unless otherwise

specified in the FEDERAL REGISTER as provided in paragraph (b)(1)(iv) of this section) divided between two equal semiannual seasons, January 1 through June 30, and July 1 through December 31. The quota for each semiannual season is 179.5 mt, dw.

(iii) *Pelagic sharks*. The annual commercial quotas for pelagic sharks are 92 mt dw for porbeagle sharks, 273 mt dw for blue sharks, and 488 mt dw for pelagic sharks other than porbeagle or blue sharks (unless otherwise specified in the FEDERAL REGISTER as provided in paragraph (b)(1)(iv) of this section). These quotas are divided between two semiannual periods, January 1 through June 30, and July 1 through December 31. The quotas for each semiannual period are as follows:

(A) Porbeagle shark—46 mt dw.

(B) Blue sharks—136.5 mt dw.

(C) Pelagic sharks, other than porbeagle or blue sharks—244 mt dw.

(iv) *Annual adjustments*. (A) NMFS will adjust the next year's semiannual quotas for large coastal, small coastal, and pelagic sharks to reflect actual landings during any semiannual period. For example, a commercial quota underage or overage in the season that begins January 1 will result in an equivalent increase or decrease in the following year's quota for the season that begins January 1, provided that the annual quotas are not exceeded. NMFS will file with the Office of the Federal Register for publication notification of any adjustment at least 30 days prior to the start of the next fishing season.

(B) NMFS will reduce the annual commercial quota for pelagic sharks by the amount that the blue shark quota is exceeded at least 30 days prior to the start of the next fishing season.

(C) Sharks discarded dead are counted against the applicable directed fishery quota. Sharks taken and landed from state waters are counted against the applicable directed fishery quota.

(D) NMFS will adjust the next year's corresponding semiannual quota for pelagic sharks to reflect actual landings during any semiannual period. NMFS will adjust the semiannual quota for large coastal and small coastal sharks to reflect actual landings during the

previous semiannual period. Such adjustment shall be an increase or decrease equivalent to the amount of underharvest or overharvest. NMFS will file, for publication in the FEDERAL REGISTER, notification of any adjustment at least 30 days prior to the start of the next fishing season.

(v) *Large coastal sharks.* The annual commercial quota for large coastal sharks is 1,285 mt dw, divided between two equal semiannual seasons, January 1 through June 30, and July 1 through December 31. The quota for each semiannual large coastal shark season is 642.5 mt dw unless otherwise specified in the FEDERAL REGISTER as provided in paragraph (b)(1)(iv) of this section. The length of each large coastal shark season will be determined based on the projected catch rates, available quota, and other relevant factors. NMFS will file, for publication in the FEDERAL REGISTER, notification of the length of each season for large coastal sharks at least 30 days prior to the beginning of the season.

(vi) *Small coastal sharks.* The annual commercial quota for small coastal sharks is 1,760 mt dw, divided between two equal semiannual seasons, January 1 through June 30, and July 1 through December 31. The quota for each semiannual small coastal shark season is 880 mt dw unless otherwise specified in the FEDERAL REGISTER as provided in paragraph (b)(1)(iv) of this section.

(2) *Public display quota.* The annual quota for persons who collect sharks from any of the management groups under an EFP is 60 mt whole weight (43 mt dw). All sharks collected under the authority of an EFP, subject to restrictions at § 635.32, will be counted against this quota.

(c) *Swordfish.* (1) Consistent with ICCAT recommendations, the fishing year's total amount of swordfish that may be caught, retained, possessed, or landed by persons and vessels subject to U.S. jurisdiction is divided into quotas for the North Atlantic swordfish stock and the South Atlantic swordfish stock. The quota for the North Atlantic swordfish stock is further divided into semi-annual directed fishery quotas and an incidental catch quota for fishermen targeting other species. A swordfish from the North At-

lantic swordfish stock caught prior to the directed fishery closure by a vessel for which a directed fishery permit or a handgear permit for swordfish has been issued is counted against the directed fishery quota. A swordfish from the North Atlantic swordfish stock landed by a vessel for which an incidental catch permit for swordfish has been issued, landed consequent to recreational fishing, or caught after the effective date of a closure of the directed fishery from a vessel for which a directed fishery permit or a handgear permit for swordfish has been issued is counted against the incidental catch quota. The entire quota for the South Atlantic swordfish stock is reserved for longline vessels for which a directed fishery permit for swordfish has been issued; retention of swordfish caught incidental to other fishing activities is prohibited in the Atlantic Ocean south of 5° N. lat.

(i) *North Atlantic swordfish stock.* (A) The directed fishery quota for the North Atlantic swordfish stock is 1,919 mt dw for each fishing year beginning June 1, 2000. The annual directed fishery quota is subdivided into two equal semiannual quotas of 959.5 mt dw, one for June 1 through November 30, and the other for December 1 through May 31 of the following year.

(B) The annual incidental catch quota for the North Atlantic swordfish stock is 300 mt dw.

(C) The dead discard allowance for the North Atlantic swordfish stock is: 320 mt ww for the fishing year beginning June 1, 2000; 240 mt ww for the fishing year beginning June 1, 2001; and 160 mt ww for the fishing year beginning May 1, 2001. All swordfish discarded dead from U.S. fishing vessels, regardless of whether discarded from vessels permitted under this part, shall be counted against the allowance.

(ii) *South Atlantic swordfish stock.* The annual directed fishery quota for the South Atlantic swordfish stock is 289 mt dw. Incidental harvest of swordfish is prohibited in the Atlantic Ocean south of 5° N. lat.

(2) *Inseason adjustments.* (i) NMFS may adjust the December 1 through May 31 semiannual directed fishery quota to reflect actual catches during

Fishery Conservation and Management

§ 635.28

the June 1 through November 30 semi-annual period, provided that the fishing year's directed fishery quota is not exceeded.

(ii) If NMFS determines that the annual incidental catch quota will not be taken before the end of the fishing year, the excess quota may be allocated to the directed fishery quota.

(iii) If NMFS determines that it is necessary to close the directed swordfish fishery prior to the scheduled end of a semi-annual fishing season, any estimated overharvest or underharvest of the directed fishery quota for that semi-annual season will be used to adjust the annual incidental catch quota accordingly.

(iv) NMFS will file with the Office of the Federal Register for publication notification of any inseason swordfish quota adjustment and its apportionment made under this paragraph (c)(2) of this section.

(3) *Annual adjustments.* (i) Except for the carryover provisions of paragraphs (c)(3)(ii) and (iii) of this section, NMFS will file with the Office of the Federal Register for publication notification of any adjustment to the annual quota necessary to meet the objectives of the Fishery Management Plan for Atlantic Tunas, Swordfish and Sharks. NMFS will provide at least 30 days opportunity for public comment.

(ii) If consistent with applicable ICCAT recommendations, total landings above or below the specific North Atlantic or South Atlantic swordfish annual quota shall be subtracted from, or added to, the following year's quota for that area. Any adjustments to the 12-month directed fishery quota will be apportioned equally between the two semiannual fishing seasons. NMFS will file with the Office of the Federal Register for publication notification of any adjustment or apportionment made under this paragraph (c)(3)(ii).

(iii) The dressed weight equivalent of the amount by which dead discards exceed the allowance specified at paragraph (c)(1)(i)(C) of this section shall be subtracted from the landings quota in the following fishing year. NMFS will file with the Office of the Federal Register for publication notification of any

adjustment made under this paragraph (c)(3)(iii).

[64 FR 29135, May 28, 1999, as amended at 64 FR 58796, Nov. 1, 1999; 65 FR 42887, July 12, 2000; 65 FR 77526, Dec. 12, 2000; 66 FR 8904, Feb. 5, 2001; 66 FR 42805, Aug. 15, 2001; 66 FR 67121, Dec. 28, 2001]

EFFECTIVE DATE NOTE: At 66 FR 67121, Dec. 28, 2001, in §635.27, paragraphs (b)(1)(i), (b)(1)(ii), (b)(1)(iv)(A), and (b)(1)(iv)(C) were suspended and paragraphs (b)(1)(iv)(D), (b)(1)(v), and (b)(1)(vi) were added, effective Jan. 1, 2002 through July 1, 2002. At 67 FR 37354, May 29, 2002, the effective date was extended to Dec. 30, 2002.

§ 635.28 Closures.

(a) *BFT.* (1) When a BFT quota, other than the Purse Seine category quota specified in §635.27(a)(4), is reached, or is projected to be reached, NMFS will file with the Office of the Federal Register for publication notification of closure. On and after the effective date and time of such notification, for the remainder of the fishing year or for a specified period as indicated in the notice, fishing for, retaining, possessing, or landing BFT under that quota is prohibited until the opening of the subsequent quota period or until such date as specified in the notice.

(2) From August 15 through December 31, the owner or operator of a vessel that has been allocated a portion of the Purse Seine category quota under §635.27(a)(4) may fish for BFT. Such vessel may be used to fish for yellowfin, bigeye, albacore, or skipjack tuna at any time, however, landings of BFT taken incidental to fisheries targeting other Atlantic tunas or in any fishery in which BFT might be caught will be deducted from the individual vessel's quota for the following BFT fishing season (i.e., August 15 through December 31). Upon reaching its individual vessel allocation of BFT, the vessel may not participate in a directed purse seine fishery for Atlantic tunas or in any fishery in which BFT might be caught for the remainder of the fishing year.

(3) If NMFS determines that variations in seasonal distribution, abundance, or migration patterns of BFT, or the catch rate in one area, precludes anglers in another area from a reasonable opportunity to harvest a portion of the Angling category quota, NMFS
